The above story is from the trade journal Water Online Newsletter | May 03, 2017

Question is then: How does the left over residue and deposits in the water pipes, owned by Utilities Inc., of Florida, here in Summertree play into the part of the statement from the story below?

"" His research says that high iron in water [can remove disinfectants](#) like chlorine, allowing harmful bacteria to grow. This includes bacteria like legionella, which causes Legionnaire's Disease.""
