Subject: Price increase

To the FL Public Service Commission,
I believe the rate increase request of Utilities, Inc. Florida Docket No. 20160101 is unjust and not fair due to certain areas within Seminole County increasing up to +200% higher than the current rate. It is not sound or logical for 16 different systems to have a consolidated rate when there are so many different factors. Please reconsider Staff's recommendation.

Thank you!!
