Good morning Mr. Freeman,

We will be placing your comments below in consumer correspondence in Docket No. 20170009 and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brandy Butler
Commission Deputy Clerk I
Florida Public Service Commission

Subject: Docket No. 20170009 - Oppose FPL's Unfair Request

Dear FL PSC,

Dear Commissioners,

Please reject FPL's request in Docket No. 20170009.

As of 2016, there are already over 3,300 tons of radioactive waste from nuclear reactors stored in Florida, with no feasible option for removing it. Instead of approving a sketchy plan to add to this expensive problem that will be with us forever, the Commission should request a plan on how the reactors will be retired.

The Turkey Point reactors' license expires in 2036. This should be enough time plan and transition to an electric grid that prioritizes energy efficiency and maximizes consumer distributed energy resources.

Citizens in Florida want renewable energy and we have the resources for it. These nuclear reactors are not needed. Consumers should not be saddled with expenses for an outdated and dangerous technology.

Consumers rely on the Public Service Commission to protect the public interest by regulating our public utilities . Please reject FPL's self-serving and unprecedented request.

Sincerely,

Sincerely,

Kathy Freeman
