Good afternoon Mr. French,

We will be placing your comments below in consumer correspondence in Docket No. 20170009 and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brandy Butler

Subject: Docket No. 20170009 - Oppose FPL's Unfair Request

Dear FL PSC,

Dear Commissioners,

Please reject FPL's request in Docket No. 20170009. It is not fair for the company to continue to heap the financial risk onto customers like me to pursue new reactors at Turkey Point, a project for which there is no builder. I understand the builder, Westinghouse, filed for bankruptcy and is out of the nuclear construction business. And apparently FPL will not commit to actually build the reactors, nor will it commit to a price tag. Further, the company can't even show that the reactors are in the best economic interest of their customers.

If the reactor project is so speculative that FPL cannot provide you with evidence that the project remains a good deal for customers, how can FPL then ask your permission to incur even more costs pursuing the licenses for the project, which ultimately allows it to recover its costs plus interest from customers?

I have already paid too much for too long toward this phantom project, as have all the other FPL customers. Enough is enough. Thank you in advance for considering customers' economic interest in this proceeding. Please reject FPL's heavy-handed and unprecedented request.

Before the PSC decides on this issue, please inspect the forecasted rise in sea level for the Turkey Point location by using the NOAA Sea Level Rise Viewer at <https://coast.noaa.gov/digitalcoast/tools/slr> and enter the plant address : Homestead, FL 33033 to zoom in. You will notice that the Power Plant is completely surrounded by the Atlantic Ocean

at a rise of only 2 ft above MSL! FDOT sea level rise report indicates this is a highly probable scenario by 2040 to 2060. It will not be safe to operate the nuclear reactors and the investments will not be recoverable. FPL will then be faced with huge costs for decommissioning the reactors.

Be wise and protect the citizens and tourist of this great state.

Sincerely,

Sincerely,

Bruce French
