

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name :

Electric Utility Provider : Florida Power & Light

Zip Code : 32901

Category : Power restoration time

Comments : FPL and their electrical subcontractors did an admirable job in my neighborhood restoring power after hurricane Irma. My only complaint is about the poor tree service that their subcontractor Asplundah performs. Asplundah workers that have ebb in my neighborhood do minimal trim work. They hang around the truck wasting time before cutting any limbs and what they cut is minimal at best. Tree caused damage is one of the most common problems caused by storms and tree debris on power lines after storms cause delays in restoring power. Both are good reasons for FPL to review Asplundah's and require better performance by its crews.
