Subject: FPL Assessment

Dear Commissioners,

I am writing after reading the editorial from the South Florida Sun Sentinel.

So FPL's current profit rate is guaranteed at 9.6% to 11.6% and they are asking to bill customers 1.3 billion dollars for post Irma power restoration!! I am a relative newcomer to Florida - I moved here in March 2013 so I know I have many things to learn. But I do know that Florida is known to have hurricanes. With that being said, I cant believe that the utility companies are not better prepared. I have seen the concrete poles that have been installed (great) and have heard about the many improvements to the "grid", apparently this has not made much of an impact if 90% of FPL customers lost power. In my humble opinion, Irma was not a catastrophic hurricane, I cant imagine if it was. Would all of Florida be without power for a year.

Thanks for taking the time to read this short note.
