**Subject:** .FPL customers

To Whom It May Concern,

As an FPL customer, I am enraged at the thought that FPL is actually proposing that we be charged for their clean up. This is a HUGE deal. As a retired citizen, I am living very frugally off my Social Security . Why do we, the customers, always have to assume the utility's errors.

NOT RIGHT. PLEASE DO THE RIGHT THING AND VOTE NO.

Sincerely,

**Subject:** Case Docket number 20170007

Dear Public Service Commission,

I am writing you concerning Florida Power & Light request to pass along \$200 million to its customers to clean up Turkey Point case docket number 20170007. Florida Power & Light is a for profit corporation. They are in business to supply electricity to customers that pay for the service. It is their responsibility as a for profit corporation to take care of everything that goes into supplying the service. Just like any other for profit corporation would be responsible for all aspects of the business. A tire company would not ask their customers to pay for cleaning up used tire mounds. An airline would not ask their customers to pay for new airplane hangars. A truck company would not ask their customers to pay for a used parts recycling plant. It is the cost of doing business. Florida Power & Light needs to take on the responsibility for cleaning up Turkey Point. They are the ones who have profited for years from the site. It is not the customers responsibility.

As the watch dog for the people I urge you to send a strong message to Florid Power & Light that as a for profit business they are subject to the same ups & downs as any other business and they are responsible for the cleanup of Turkey Point not their customers.

Thank you for protecting the consumer. I know you will do the right thing.

Marianne Schmidhofer  
Miami Shores, FL 33138

**Subject:** proposed expansion of Turkey Point cooling canals

To whom it may concern:

I'm a US citizen residing in Key West, Florida and am very concerned about the proposed expansion of the cooling canals for the Turkey Point cooling canals and their effect on drinking water and marine life in the Keys.

It is my opinion that Florida Power and Light needs to be looking for eco friendly alternatives to nuclear power and shutting down Turkey Point, not expanding its capacity, especially given the increasing severity of hurricanes due to Climate Change.

Thank you,

Anthony Antich

**Subject:** Should customers pay \$200 million to clean up Turkey Point? Now's your chance to speak up.

Dear Public Service Commission,

My name is Caroline Matlick and I am very passionate about the environment. I am in eighth grade. I recently read an article stating that Turkey Point is refusing to clean up their mess. No, we should not be forced to pay for their mess. We only have one environment and we have got to take care of it. It is very disturbing to know that they can not take credit for their deadly mistake. I'm triggered because this is outrageous, we already have enough harm to our environment, and now this on top of it?! I call on you to hear the people's voice, and protect our world.

Sincerely,  
Caroline Matlick
