**STAFF'S FOURTH DATA REQUEST
VIA US MAIL & EMAIL**

Re: Docket No. 20170199-EI - Petition for approval of conservation street and outdoor lighting conversion program, by Tampa Electric Company.

Dear Mr. Wahlen:

By this letter, Commission staff requests the following information from Tampa Electric Company (TECO).

- 1) Please refer to TECO's response to Staff's Third Data Request, No. 3.
 - a) Does Rule 25-17.008, Florida Administrative Code, require the participation to stop at the year prior to the next avoided unit entering service in performing the cost-effectiveness tests? If so, please identify where in the Rule it is required. If not, please identify where the Company has been directed to perform the cost-effectiveness analysis in this manner.
 - b) Please provide a revised cost-effectiveness analysis of the program using the Participant Test, the Rate Impact Measure (RIM) Test, and the Total Resource Cost (TRC) Test, without the stop of participants at the year prior to the next avoided unit coming online.
- 2) Please refer to TECO's response to Staff's Third Data Request, No. 4.
 - a) Please provide a revised Excel spreadsheet that shows the impact of the change in tariffs from the customer's original tariff to the new LED conversion tariff.
 - b) Did TECO consider making its new tariffed rates for LEDs revenue neutral or beneficial to all conversion participants? Please explain your response.

Mr. Jeff Wahlen
