Comments : I was fortunate enough not to lose power during Hurricane Irma but many of my friends did. I do believe that we need a power grid that is both more reliant on renewable energy (once the storm passed, the sun was shining as usual) and decentralized, so the outages are less impactful. I've lived in southern Florida since the early 1950s and have been through a number of hurricanes. We have not made the progress that we should have in all this time.
