

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : MaryJo Mosca

Electric Utility Provider : EI802 - Florida Power & Light Company

Zip Code : 33020

Category : Other

Comments : Hurricane Irma showed again how undependable the power grid is when a big storm hits. My community was completely without power for days.

I know about families and businesses that were able to use solar and batteries to generate power after the storm. FPL must invest in more solar and batteries in and near our neighborhoods and stop placing unnecessary road blocks in place for those customers who want solar power NOW. This kinds of technology should be used wherever they can to prepare for hurricanes. We need to make sure FPL is doing ALL THE THINGS IT CLAIMS IN ITS EXPENSIVE COMMERCIALS: i.e. building the grid with modern technology and clean energy to make it more dependable, not just rebuilding the same old power lines that keep going down when we need them the most.
