

Review of Electric Utility Hurricane Preparedness and Restoration Actions

Docket No : 20170215-EU

Name : Stephen Brace

Electric Utility Provider : EI802 - Florida Power & Light Company

Zip Code : 32174

Category : Other

Comments : In the wake the most recent hurricanes to have hit Florida, the best method I feel to keep the power running would be to have more of the lines underground. I saw plenty of broken live wires just sitting there in the middle of the streets during the clean up. Seeing how this is the Sunshine State, why are there not more solar arrays? You should at least make it easier to buy home solar panels so when the grid goes down, power can be maintained for a time. You need to rebuild the grid with more of these storms in mind instead of just rebuilding the same grid that fails over and over again.
