Re: Docket No. 20180117-GU: Petition for approval of tariff modifications for use of natural gas for gas heat pumps by customers of Peoples Gas System.

Dear Mr. Brown and Ms. Brown:

By this letter, Commission staff respectfully requests the following information from Peoples Gas System (Peoples or company).

1. In response to Staff's First Data Request No. 6, Peoples states that company currently has an approved Gas Space Conditioning program which has an allowance of \$150/ton which would be applicable to GHP program proposed in the subject docket. Please explain if the current \$150/ton allowance includes a monetary amount for piping and venting the GHP installations.
2. In response to Staff's First Data Request No. 8, Peoples provided a table on page 11 showing price comparisons to operate a traditional electric heat pump and a gas heat pump. The table shows the residential market category using an 8 ton capacity GHP system. Is an 8 ton GHP system for a residential customer the norm? What would be an approximate square footage of a residential unit(s) that uses an 8 ton GHP system?

Andrew M. Brown, Esq.

3. In response to Staff's First Data Request No. 15, the company states that it will inform customers of the new GHP tariffs via advertising, outreach, on-bill messaging, and company website. Please state as to when the company anticipates informing the customers and please provide a copy of customer notifications for staff review that is currently available. In the alternative, please provide any notifications when available at a later date (but prior to implementation).

Please file all responses electronically no later than June 26, 2018, via the Commission's website at www.floridapsc.com by selecting the Clerk's Office tab and Electronic Filing Web Form. Please contact me at sguffey@psc.state.fl.us or at 850.413.6204 if you have any questions.

Thank you,

/s/Sevini Guffey
