Dear Sir or Madam,

I am currently a Vero Beach Electric customer. Having followed the details of the sale of the Vero Beach Electric system, I am fully in favor of the sale to Florida Power & Light. Myself and other members of the community have been patiently waiting for this deal to close, and for the transition process to begin. The news of this latest delay, due to the challenge of the sale, has been deeply troubling. I wish to add my voice to the many others that are being affected by this long process. It has been a disappointment to have four appeals on the issue go through right before the end of the appeal period. Mayor Harry Howle states that it is important that people in the community show what they are feeling about this issue, and I whole heartedly agree.

Respectfully,

Frank Schlitt
