Dear Clerk Florida PSC Clerk,

Over 5 years, my wife and I reduced the annual electricity consumption of our home by 50%, an annual rate of 10% / year. That was without changing our appliances. We have replaced appliances as the old ones wear out and our consumption has continued to drop.

We have a hard time accepting FPL's assertion that ZERO is the right target for state efficiency standards.

Please set a significantly higher and more realistic energy efficiency standard for our electric utilities. It will help Floridians economically and will help lower greenhouse gas emissions for the benefit of all.

Thank you for your consideration,

Sincerely,
Philip Stoddard
