Dear Clerk Florida PSC Clerk,

The only way South Florida will be able to transition to the inevitable renewable energy future is if we have energy efficient homes. Don't let the utilities get away with goals at zero or close to zero. Energy efficiency lowers bills and saves our precious environmental resources. I am a Miami Beach resident and would like to stay in my city, however I am at risk of becoming a climate refugee within my lifetime. Please, let's do our part as Floridians to ensuring that our state is thriving for centuries to come.

Sincerely,
Zelalem Adefris
