**Sent:** Saturday, August 10, 2019 4:13 PM  
**To:** Office of Commissioner Polmann  
**Subject:** Florida needs strong energy efficiency standards

Dear Mr. Polmann,

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. Investing in energy efficiency standards has the potential to reduce energy bills for Floridians and create quality manufacturing and construction jobs, all while reducing greenhouse gas emissions.

I urge you to set strong energy efficiency goals this year. Several utilities have proposed goals of zero or close to zero in energy savings through efficiency standards. These ridiculous "goals" are unacceptable.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Melvin Boykin  
5718 NW 68th Ave  
Tamarac FL, 33321-5743

**Sent:** Saturday, August 10, 2019 11:57 AM  
**To:** Office of Commissioner Polmann  
**Subject:** Florida needs strong energy efficiency standards

Dear Mr. Polmann,

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. Investing in energy efficiency standards has the potential to reduce energy bills for Floridians and create quality manufacturing and construction jobs, all while reducing greenhouse gas emissions.

I urge you to set strong energy efficiency goals this year. Several utilities have proposed goals of zero or close to zero in energy savings through efficiency standards. These ridiculous "goals" are unacceptable.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Rebecca Leas  
21287 Sandal Foot Dr  
Venice FL, 34293-5781

Dear Mr. Polmann,

THE TRUMP GOP IS MAKING ME ASHAMED TO BE A REPUBLICAN!

LOOK AT THE BIG PICTURE FOR THE GOOD OF THE PLANET. OUR FAILURE TO ELIMINATE DEPENDENCE ON COAL AND OIL AND NUCLEAR POWER IS A MAJOR INTERNATIONAL SECURITY PROBLEM. IT IS IMPORTANT TO THE PLANET AND TO INTERNATIONAL SECURITY TO MAKE ENERGY EFFICIENCY AND SUSTAINABILITY A PRIORITY. WE MUST STOP DESTROYING OUR ENVIRONMENT AND CONVERT TO SUSTAINABLE ENERGY. SUSTAINABLE ENERGY IS THE ANSWER. NO COAL. NO OIL. NO NUCLEAR. THERE IS NO SUCH THING AS CLEAN COAL OR CLEAN OIL OR CLEAN, SAFE NUCLEAR POWER. WE HAVE TO BREATHE THIS AIR AND DRINK THIS WATER; WE DON'T WANT IT POLLUTED! WE SHOULD BE LEADING THE WORLD IN THIS EFFORT, NOT DRAGGING OUR FEET! WE NEED TO STOP ALL FAVORS, SUBSIDIES AND TAX BREAKS FOR NUCLEAR, COAL, AND OIL COMPANIES! END SEISMIC BLASTING, FRACKING, AND OIL PIPELINES!

Florida will be severely impacted if climate change isn't stopped. We're facing more flooding, compromised drinking water, and life-threatening heat waves as a result of rising temperatures and rising sea levels.

A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. A cost-effective way to reduce harmful greenhouse gas emissions is through increasing energy efficiency standards for energy utilities. Investing in energy efficiency standards has the potential to reduce energy bills for Floridians and create quality manufacturing and construction jobs, all while reducing greenhouse gas emissions.

I urge you to set strong energy efficiency goals this year. Several utilities have proposed goals of zero or close to zero in energy savings through efficiency standards. These ridiculous "goals" are unacceptable.

Please prioritize the well-being of Floridians and work to lower energy bills and greenhouse gas emissions by setting energy efficiency savings goals of 2% for the state's utilities.

Sincerely,

Terry Bulla
