Subject: Stop utilities from making it harder to save money on bills; Docket Nos. 20190015 to 20190021

Dear Florida Public Service Commission,

Hi my name is Elizabeth Wright and I live in Apalachicola.

I see no reason to reduce energy efficiency goals. We should be as technology improves and in the face of the climate crisis. Please stop letting Big Energy control what happens in our state; it's up to the citizens of Florida not giant corporations who aren't even headquartered here!

I am writing to urge you to reject the request by Florida utilities to have a goal of zero (or nearly zero) for energy efficiency improvements over the next ten years.

I am concerned that if the energy efficiency goals are abandoned, the utilities will stop providing the kinds of services that help people lower their power bills. People shouldn't have to choose between paying for food, medicine, or rent, and being comfortable in their own homes.

Florida is ranked near the bottom of the nation in terms of energy efficiency — we should be increasing energy efficiency measures, not abandoning them. We know that increasing energy efficiency is one of the cheapest and easiest ways to fight problems associated with climate change like the sea level rise and stronger storms that causing neighborhood flooding and other serious problems in Florida. change that's

When this issue comes back before you, I ask you please to vote to strengthen our energy efficiency goals.

Regards,
Elizabeth Wright
