Subject: In support of FPL's SolarTogether Program

Dear Commissioner Gary F. Clark,

I ask you to vote in support of FPL's SolarTogether tariff and program.

Today, solar makes up less than 2 percent of FPL's electricity. Florida needs more clean energy offerings like SolarTogether that lower overall electric system costs by \$250 million dollars, add clean, fuel-free resources to the grid, and give customers more choices when it comes to their sustainability.

Solar power is clean, abundant and affordable, and we need a lot more of it. Floridians want both voluntary subscription offerings like SolarTogether in addition to traditional solar farms that provide energy to the grid.

As the Public Service Commission considers FPL's proposal for the largest utility-sponsored community solar program in the country, I ask energy regulators to weigh the importance of this offering particularly for low-income customers, who today lack access to many traditional clean energy offerings.

Today, 1.4 million FPL customers spend more than a tenth of their income on energy bills. This program is a very important first step to unlocking solar savings for those customers who are most in need of energy bill relief.

I ask the Commission to adopt this ground-breaking program and bring more solar to the Sunshine State.

Sincerely,
Barbara Hughes

Subject: FPL's SolarTogether Program

Dear Commissioner Gary F. Clark,

Florida, THE SUNSHINE state, needs to improve the ways it's residents can use solar power.

We must be able to use it independently and sell it back to the utility company without being penalized for using solar.

In addition, I ask you to vote in support of FPL's SolarTogether tariff and program.

Today, solar makes up less than 2 percent of FPL's electricity. Florida needs more clean energy offerings like SolarTogether that lower overall electric system costs by \$250 million dollars, add clean, fuel-free resources to the grid, and give customers more choices when it comes to their sustainability.

Subject: In support of FPL's SolarTogether Program

Dear Commissioner Gary F. Clark,

The City of Tallahassee utility has a very strong community solar customer participation program with over 1800 residential customers with commercial customers taking the other 50% of generation.

FPL customers deserve the same opportunity I ask you to vote in support of FPL's SolarTogether tariff and program.

Today, solar makes up less than 2 percent of FPL's electricity. Dear Commissioner Gary F. Clark,

I ask you to vote in support of FPL's SolarTogether tariff and program.

Of all the states, Florida should have a thriving and robust solar power system. Clean energy straight from the sun. It makes so much sense for the Sunshine State that we should have done this decades ago. Florida should be leading the rest of the states in how to get this done efficiently.

Today, solar makes up less than 2 percent of FPL's electricity. Florida needs more clean energy offerings like SolarTogether that lower overall electric system costs by \$250 million, add clean, fuel-free resources to the grid, and give customers more choices when it comes to their sustainability.
