Residential 5/8"x3/4" meter – Wastewater -\$ 44.00

General Service and all other residential meter sizes – Two times estimated average bill

### Cross Connection Control and Backflow Prevention Policy

The Commission approved the utility's policy, which outlines the customer's responsibility in regards to cross connection control and backflow preventers. If the utility has reason to believe a cross connection exists, the customer shall allow the utility onto the premises for an inspection pursuant to Rule 25-30.320(2)(f), F.A.C. Failure by the customer to install, inspect, repair or replace the backflow prevention device will result in disconnection of service after reasonable notice is given.

The rates shall be effective for service rendered as of the Commission's stamped approval date on the tariff sheets provided the customers have received notice. If the effective date of the new rates falls within a regular billing cycle, the initial bills at the new rate may be prorated. The old rates shall be prorated based on the number of days in the billing cycle before the effective date of the new rates. The new rates shall be prorated based on the number of days in the billing cycle on or after the effective date of the new rates. If you have any questions about your bill, please contact the utility at (863) 424-2839.
