JOSE R. OLIVA Speaker of the House of Representatives

FILED 7/9/2020 DOCUMENT NO. 03699-2020 FPSC - COMMISSION CLERK

July 9, 2020

CONFIDENTIAL PUBLIC VERSION

Adam J. Teitzman, Commission Clerk Office of Commission Clerk Florida Public Service Commission 2540 Shumard Oak Blvd. Tallahassee, FL 32399-0850

Re: Docket No. 20190156-EI, 20190155-EI and 20190174-EI

Dear Mr. Teitzman:

On July 6, 2020, OPC filed a redacted copy of witness Helmuth W. Schultz, III, Direct Testimony. Due to an error with the redaction process used, OPC is refiling a redacted copy.

If you have any questions or concerns; please do not hesitate to contact me. Thank you for your assistance in this matter

Sincerely,

/s/Patricia A. Christensen
Patricia A. Christensen
Associate Public Counsel

BEFORE THE FLORIDA PUBLIC SERVICE COMMISSION

In re: Petition for a limited proceeding to DOCKET NO. 20190156-EI recover incremental storm restoration costs, capital costs, revenue reduction for permanently lost customers, and regulatory assets related to Hurricane Michael, by Florida Public Utilities Company.

In re: Petition for establishment of regulatory assets for expenses not recovered during restoration for Hurricane Michael, by Florida Public Utilities Company.

In re: Petition for approval of 2019 depreciation study by Florida Public Utilities Company.

DIRECT TESTIMONY

OF

Helmuth W. Schultz, III

On Behalf of the Office of Public Counsel

Before the

Florida Public Service Commission

Docket No. 20190156-EI, Docket No. 20190155-EI and Docket No. 20190174-EI

1 <u>I. STATEMENT OF QUALIFICATIONS</u>

- 2 Q. PLEASE STATE YOUR NAME, OCCUPATION, AND BUSINESS ADDRESS.
- 3 A. My name is Helmuth W. Schultz, III. I am a Certified Public Accountant licensed in
- 4 the State of Michigan and a senior regulatory consultant at the firm Larkin &
- 5 Associates, PLLC, ("Larkin") Certified Public Accountants, with offices at 15728
- 6 Farmington Road, Livonia, Michigan, 48154.
- 7 Q. PLEASE DESCRIBE THE FIRM LARKIN & ASSOCIATES, P.L.L.C.
- 8 A. Larkin performs independent regulatory consulting primarily for public service/utility
- 9 commission staffs and consumer interest groups (public counsel, public advocates,
- 10 consumer counsel, attorneys general, etc.). Larkin has extensive experience in the
- utility regulatory field as expert witnesses in over 600 regulatory proceedings,
- including water and sewer, gas, electric and telephone utilities.
- 13 Q. HAVE YOU PREPARED AN EXHIBIT WHICH DESCRIBES YOUR
- 14 EDUCATIONAL BACKGROUND AND PROFESSIONAL EXPERIENCE?

- 1 A. Yes. I have attached Exhibit No. HWS-1, which is a summary of my background,
- 2 experience and qualifications.

3 Q. HAVE YOU PREVIOUSLY TESTIFIED BEFORE THE FLORIDA PUBLIC

4 COMMISSION AS AN EXPERT WITNESS?

- 5 A. Yes. I have provided testimony before the Florida Public Service Commission
- 6 ("Commission" or "FPSC") as an expert witness in the area of regulatory accounting
- 7 and storm recovery in numerous cases as listed in Exhibit No. HWS-1.

8 Q. BY WHOM WERE YOU RETAINED, AND WHAT IS THE PURPOSE OF

9 **YOUR TESTIMONY?**

- 10 A. Larkin was retained by the Florida Office of Public Counsel ("OPC") to review the
- petitions filed by Florida Public Utilities Company's (the "Company" or "FPUC")
- requesting recovery of 2018 incremental storm costs, and requesting a limited
- 13 proceeding for recovery on new plant, accumulated depreciation, the establishment of
- regulatory assets and recovery of lost revenues. The request related to storm cost
- recovery is for an annual recovery of \$11,884,648 based on a jurisdictional rate base of
- \$67,248,113 of costs, inclusive of interest, associated with Hurricanes Michael and
- Dorian. Accordingly, I am appearing on behalf of the citizens of Florida ("Citizens")
- who are customers of FPUC.

19 II. BACKGROUND

20 Q. PLEASE SUMMARIZE YOUR UNDERSTANDING OF THE COMPANY'S

21 **REQUEST.**

¹ Company Revised MDN-1, Revised A-1.

Docket No. 20190155-EI is described by FPUC as a petition for the establishment of regulatory assets for expenses not recovered during the restoration of service associated with Hurricane Michael. Docket No. 20190156-EI is described by FPUC as a petition for a limited proceeding to recover incremental storm costs, capital costs, revenue reduction for permanently lost customers, and regulatory assets associated with Hurricane Michael. These dockets were consolidated along with the 2019 depreciation study in Docket No. 20190174-EI. What is not included in the description of these petitions is the Company's request to treat the recovery as if this is a single-issue rate case, including earning a rate of return (essentially a profit) based on the Weighted Average Cost of Capital ("WACC") on the storm costs, new capital additions and requested regulatory assets, that factors in a purported jurisdictional adjusted net operating loss and the subsequent addition of costs associated with Hurricane Dorian.

A.

A.

Q. PLEASE SUMMARIZE WHAT THE COMPANY INCLUDED IN ITS REQUEST TO THE COMMISSION?

The August 7, 2019, petition filed by FPUC seeks recovery of \$67,684,489 to pay for alleged costs resulting from Hurricane Michael. The initial request proposed recovery of \$8,777,340 on an annual basis. That request was determined by applying a rate of return to a rate base consisting of the four requested regulatory assets and the capitalized plant that was replaced during the storm. The resulting revenue requirement was then compared to a calculated jurisdictional net operating loss based on the alleged lost revenues added to the costs associated with Hurricane Michael. The proposed amortization of the regulatory assets for undepreciated plant and storm costs was for a period of 30 years. Amortization for the claimed lost revenues for unrecovered

expenses and lost customers was 5 years. The Company's initial petition acknowledged that this request is unique and that some aspects might seem more appropriately handled through a full rate case.² On March 11, 2020, FPUC filed a revised petition along with direct testimony requesting recovery of \$67,248,113 with an annual revenue requirement of \$11,884,648. The change in total costs is attributed to various changes to FPUC's original request for costs associated with Hurricane Michael and FPUC's additional request for \$1.2 million in costs attributed to Hurricane Dorian. The most significant change in the annual recovery amount is because FPUC revised the requested amortization period for the undepreciated plant and storm costs from 30 years to 10 years, which increased the alleged Net Operating Loss by \$2.5 million.

Q. WHY WAS THE AMORTIZATION PERIOD ACCELERATED AS PART OF THE COMPANY'S REVISED FILING?

A. In his testimony, Company witness Michael Cassel explains that after the initial filing, the Commission approved a reduction in FPUC's Fuel Cost Recovery factor in Order No. PSC -2019-0501-PCO-EI. He further explained that in order to avoid customer confusion by decreasing overall rates and shortly thereafter raising overall rates, the Company adjusted the amortization period of the storm costs, thereby mitigating the rate shock impact to customers.³

20 Q. ARE YOU ADDRESSING THE ENTIRETY OF THE COMPANY'S 21 REQUEST?

³ Revised Direct Testimony of Michael Cassel, Pages 9-11.

² Petition of FPUC dated August 7, 2019, Page 9, Paragraph 17, in Docket No. 20190156-EI.

Yes, I will be. The type of costs requested will be discussed by classification as well as the overall appropriateness of FPUC's unusual requests. First, I will discuss the appropriateness of the single-issue rate case approach. This will include FPUC's request for a return on new plant and a regulatory asset for unrecovered accumulated depreciation. Next, I will discuss the requested recovery of the lost revenue, then the alleged unrecovered expenses and finally the storm costs regulatory asset. As part of my analysis, I relied on my experience in analyzing storm costs in other jurisdictions, my past review of storm costs in Florida, and Rule 25-6.0143, Florida Administrative Code ("F.A.C"), which addresses what costs should be included and excluded from a utility's request for recovery of storm related costs. To the extent any of the storm costs are determined to be inappropriate, the request for recovery should be reduced.

A.

My recommended adjustments to FPUC's storm recovery requests are contained in my Exhibits labeled HWS-2 through HWS-8 attached to this testimony. On Exhibit HWS-2, I reflect my analysis of FPUC's requests and my recommendations for adjusting the requests. Exhibit HWS-3 provides a calculation that shows FPUC's requested revenue requirement using its WAAC is \$2,387,149 higher than what FPUC's revenue requirement would be if its short-term debt rate was appropriately applied to the requested rate base treatment. Exhibit HWS-4 provides a calculation that shows FPUC's revenue requirement would be \$2,493,271 lower if plant costs were appropriately excluded from FPUC's request. On Exhibit HWS-5, I have calculated an adjustment to line contractor costs for excessive charges billed by Florida Power and Light Company ("FPUC_FPL") when compared to all the other vendors' costs, including the related costs for logistics and other costs. Exhibit HWS-6 provides a

- sample of the detail provided by a vendor as support for its invoices, and Exhibits
- 2 HWS-7 and Exhibit HWS-8 are samples of FPUC review documents.

3 III. SINGLE-ISSUE RATE CASE

4 O. DO YOU CONSIDER FPUC'S REQUESTS IN ITS LIMITED PROCEEDING

5 TO BE A SINGLE-ISSUE RATE CASE?

- 6 A. Yes, I do. In its petition for limited proceeding, FPUC is requesting the Commission
- 7 to allow a return on new plant and to focus solely on selective increased costs and to
- 8 establish them as regulatory assets. This is essentially a single-issue rate case.

9 O. WHAT IS A SINGLE-ISSUE RATE CASE?

16

A. A single-issue rate case focuses on essentially a single group of issues (or costs in this docket) that would typically be included in a traditional rate case but excludes any consideration to other changes in costs, revenues or rate base. A traditional rate case includes many issues for consideration such as estimated costs for payroll, changes in maintenance and operating costs, changes to plant and other rate base components, changes to the capital structure and changes in the return on equity based on current

economic conditions and comparable returns currently allowed other regulated utilities.

17 Q. CAN YOU EXPLAIN WHY YOU BELIEVE FPUC'S REQUEST IS A SINGLE-ISSUE RATE CASE?

19 A. Yes. In a normal storm recovery petition, a utility will request recovery of only the
20 expenses it incurred to bring its system back on-line after a named storm event. The
21 recovery of these expenses is governed by Rule 25-6.0143, F.A.C. The actual,
22 legitimate storm costs are recovered from the storm accrual account or as a surcharge

per a settlement agreement. No profit is added to these costs, and new capital additions are addressed in the utility's next base rate case.

Α.

In contrast, in this docket FPUC is seeking unusual treatment for certain costs it allegedly incurred associated with Hurricane Michael. Specifically, FPUC is requesting to earn a rate of return based on the WACC on both the storm costs and new capital additions. In addition, FPUC is seeking creation of regulatory assets for lost revenues due to the reduction in its customers and O&M expenses that it claims were unrecovered which also includes a profit margin based on WACC. The Company is also seeking creation of a regulatory asset for depreciation-related costs.

Q. WHAT IS THE ISSUE WITH FPUC'S REQUEST WITH RESPECT TO IT BEING A SINGLE-ISSUE RATE CASE?

The Company's filing assumes that there are no changes to revenue and expenses outside of the costs included in its filing. As a result, FPUC wants the Commission to focus on one set of costs and disregard the consideration of any other issues related to changes in revenue or costs. It is not appropriate to make this assumption and disregard other adjustments since it has been years since FPUC has filed a base rate case. In addition, it is clear that FPUC is more likely than not to file a rate case in the near future. In response to Citizen's Interrogatory No. 5-107, the Company stated the loss reflected in its calculated revenue requirement for 2020 is based on a traditional rate case approach. Clearly, the filing in this docket is not a traditional rate case because FPUC does not want to factor in *all* revenues and expenses normally considered when setting base rates. Using the single-issue calculated loss from the hurricane is not appropriate because: (1) it includes amortization of lost revenues due to lost customers

1	in 2018 and all of 2019 which is not allowed as part of the recovery process for storm
2	restoration; (2) it includes amortization of what is labeled an unrecovered expense that
3	is in reality lost revenue, which is not allowed by the Commission's storm Rule as part
4	of recovery of storm costs; (3) and it includes amortization and depreciation of retired
5	plant and new plant, respectively, that are more appropriate to be addressed in FPUC's
6	next base rate case.

7 Q. CAN YOU BRIEFLY EXPLAIN THE DIFFERENCE BETWEEN THE

CALCULATION OF A TRADITIONAL STORM CHARGE AND FPUC'S

9 **REQUEST?**

8

15

16

17

- In a traditional petition seeking the recovery of storm costs incurred during restoration related to a named storm event, the Commission determines the amount of prudently incurred storm costs for recovery, establishes the recovery period, and establishes the annual surcharge based on recovery of the approved amount of prudent storm costs over the approved time period.
 - In this docket, FPUC is not only seeking to recover normal storm costs but also additional costs by applying traditional base rate case calculations to specific cost items without consideration of all traditional base rate case issues.
- Q. EARLIER YOU STATED THAT THERE WAS AN INCREASE IN THE
 REVENUE REQUIREMENT FROM \$8,777,340 IN THE ORIGINAL FILING
 TO \$11,884,648 IN THE REVISED FILING AND THAT WAS ATTRIBUTED,
 IN PART, TO AN INCREASE IN THE NET OPERATING LOSS BY \$2.5

1 MILLION. WOULD YOU EXPLAIN IN MORE DETAIL HOW THAT

2 CHANGED FPUC'S REQUEST FOR RECOVERY?

A.

A. Yes. The Company's initial filing included lost revenue and depreciation expense, amortization expense and added taxes in calculating a Jurisdictional Adjusted Net Operating Loss of \$2,292,738. After applying the requested Net Operating Income Multiplier of 1.3442, the Revenue Requirement for the Jurisdictional Adjusted Net Operating Loss, alone, was \$3,081,898 of the \$8,777,340. That one component is 35.11% of the initial requested amount. When the Company revised its filing, the Jurisdictional Adjusted Net Operating Loss increased to \$4,722,730 (an increase of \$2.5 million). After, application of the Net Operating Income Multiplier of 1.3295 the Revenue Requirement for the Jurisdictional Adjusted Net Operating Loss increased to \$6,278,870, which is 52.83% of the current Revenue Requirement request of \$11,884,648. Thus, single issue rate making is the major contributor to FPUC's requested Revenue Requirement.

Q. IS FPUC'S UNPRECEDENTED REQUEST TO APPLY WACC TREATMENT

TO THE RECOVERY OF STORM RESTORATION COSTS APPROPRIATE?

No, it is not. First, FPUC's request to apply a rate of return to storm cost recovery effectively rewards the Company with a profit margin on the storm costs by applying a WACC. It is not appropriate for any utility to earn a profit on costs it incurs to restore service after a storm. These are extraordinary costs incremental to a utility's normal operations and maintenance (O&M) costs that are recovered through base rates, and there is no justification for those storm dollars to earn a profit for shareholders.

1	Q.	DOES FPUC'S REQUEST TO APPLY WACC TO THE NEW CAPITAL
2		ADDITIONS REWARD THE COMPANY WITH A PROFIT MARGIN?
3	A.	Yes, it would. If the Company's request is approved by the Commission, FPUC would
4		be allowed to recover costs for new plant that would typically (and should) be delayed
5		until the Company files its next base rate case. This issue is complicated by the fact
6		that FPUC's request includes recovery of the net book value of retired plant without
7		considering the fact that the cost of that retired plant is being recovered through current
8		base rates, essentially allowing a double recovery. This new plant request is another
9		issue that is not part of a typical storm recovery proceeding and should be considered
10		in a future base rate case.
11	Q.	DOES FPUC'S REQUEST TO APPLY WACC TO THE REQUESTED
12		REGULATORY ASSETS REWARD THE COMPANY WITH A PROFIT
13		MARGIN?
14	A.	Yes, it would. FPUC is requesting the application of WACC to its requested recovery
15		of lost revenues for prior periods in two ways. First, the Company is requesting
16		recovery for what is specifically identified as lost revenues due to the loss of customers.
17		The second lost revenues requested are masked by the title "expenses not recovered."
18		If FPUC's request is approved by the Commission, it would earn a profit on both of
19		these amounts which is not appropriate.
20	Q.	ARE THERE FAIRNESS REASONS WHY THE COMPANY SHOULD NOT
21		BE ALLOWED TO EARN A PROFIT ON RESTORATION COSTS
22		INCURRED AS A RESULT OF A STORM EVENT?

Yes, the occurrence of a storm is a unique event that impacts service to a utility's customers and creates an additional level of costs over and above that which is necessary for providing every day electrical service. As a result of Hurricanes Michael and Dorian, FPUC's customers were inconvenienced with a loss of service and incurred damages to their own property. Awarding FPUC with a profit margin in the form of a return on equity penalizes FPUC's customers even more. The question to the Commission is whether a utility's shareholders should benefit financially from a storm event? In my professional opinion, the answer is a resounding no.

22.

A.

A.

9 Q. IS IT APPROPRIATE IN THIS DOCKET TO ALLOW THIS SINGLE ISSUE 10 RATE CASE?

No, it is not. Normally, customers provide a fair and reasonable profit margin to FPUC as part of a base rate filing when the WACC is applied to the Company's rate base. A base rate case looks at all of the new capital additions and retirements added to rate base since the utility's last rate case, its current cost of capital and its current O&M expenses.

Clearly, there is a significant difference between the costs that are considered in a single-issue rate case which are selectively limited versus a traditional rate case which is inclusive of all relevant costs. This difference is significant and should not be ignored. When you actually review FPUC's petitions and move beyond the subterfuge, what the Company is actually seeking is a single-issue rate case that not only duplicates some cost recovery, but also ignores FPUC's changes in revenues and expenses that would be evaluated as part of a full base rate filing petition.

1	Q.	IF THE COMPANY INCURRED ADDITIONAL COSTS NOT CHARGEABLE
2		TO ACCOUNT 228.1 DUE TO THE STORMS, WHAT IS THE APPROPRIATE
3		RECOVERY MECHANISM FOR THOSE COSTS?
4	A.	If FPUC accumulated legitimate costs not chargeable to Account 228.1, then the
5		Company could request regulatory asset treatment for consideration in a future base
6		rate proceeding. Since the timing of recovery is at a cost to the Company, FPUC should
7		be allowed to accrue interest at the short-term cost of debt until fully recovered. The
8		cost incurred, if determined to be appropriate, plus interest would then be amortized
9		into rates over a period of time but excluded from rate base. This approach would
10		ensure ratepayers are not penalized by having to pay a profit margin to FPUC, and the
11		Company is not penalized because it will be compensated for the additional costs it
12		incurred that were associated with the storms.
13	Q.	HOW WOULD THE REQUESTED 2020 PROJECTED ANNUAL REVENUE
14		REQUIREMENT OF \$11,884,648 BE IMPACTED IF THE DEBT-ONLY
15		APPROACH WAS APPLIED TO FPUC'S REQUEST?
16	A.	On Exhibit No. HWS-3, I have recalculated the annual revenue requirement, assuming
17		no cost adjustments to FPUC's request. The difference between the return based on
18		WACC and the short-term debt rate is \$2,387,149, annually. That change would have
19		a significant impact on reducing the annual revenue requirement customers will pay
20		when compared to FPUC's requested \$11,884,648 based on the application of WACC.
21		I would note that this calculation is only to show the significance of the application of

the overall costs as requested are reasonable and appropriate.

22

23

WAAC compared to the use of the short-term debt rate and is in no way suggesting that

A.

Q. PLEASE EXPLAIN WHY REQUESTING RECOVERY ON THE NEW CAPITALIZED PLANT IS NOT APPROPRIATE IN THIS PROCEEDING?

FPUC is requesting recovery of new plant due to replacement of plant such as poles and wires caused by the impact of Hurricane Michael. Under traditionally rate-making principles, the cost of new plant is allowed to be recovered by means of a traditional base rate case filing. However, this docket is not a traditional base rate case. Including new plant as a single rate case issue in the storm proceeding is not appropriate because it fails to consider offsetting costs associated with the inclusion of the new plant and the retirement of old plant. For example, one potential offsetting cost relates to the assumption that O&M costs previously required for the old plant that is being retired or replaced, will be the same for the new plant. Another example relates to tree trimming costs, Company witness Michael Cassel stated that the new plant will not have an offsetting reduction to expense mainly due to tree trimming.⁴ However, given Hurricane Michael's impact, it is reasonable to assume that there are fewer trees than before, thus there should be a reduction in future tree trimming activities. To assume that there are no costs reductions realized when you replace old plant with new plant is just not reasonable. Therefore, while the maintenance costs being recovered through base rates would remain the same (i.e. FPUC would continue to collect these costs), any efficiencies related to the new plant would not be captured.

Moreover, it is more likely than not that FPUC will be filing a base rate petition in the near future. It will be more appropriate to consider the new added plant, along

⁴ Revised Direct Testimony of Michael Cassel, Page 8, Lines 10-22.

- with the retired plant plus applicable deprecation and accumulated depreciation issues,
- 2 in that base rate case. This issue is more fully discussed below.
- 3 Q. ARE THERE ANY ADDITONAL REASONS THAT INCLUDING
- 4 CAPITAILIZATION OF NEW PLANT AS PART OF THE STORM
- 5 RESTORATION REQUEST IS INAPPROPRIATE?
- Yes, there are. In addition to the concerns I previously enumerated, FPUC is seeking recovery of the net book value of assets retired which are still being recovered through current base rates. Normally in a base rate case, the old plant is retired and the new
- 9 plant is added to rate base and rates are established on the new plant only. However,
- in this docket, FPUC's is asking its customers to pay additional revenues for new plant
- and old plant, on top of the depreciation on the old plant, and a return on the old plant
- that is being recovered through current base rates. As explained in more detail below,
- if FPUC's request for a regulatory asset is approved, base rates would continue to
- reflect a return on the plant identified as retired and FPUC's requested regulatory asset
- would earn a return on that same net plant, an asset that no longer exists. Thus, FPUC's
- request for a regulatory asset on retired plant would result in a double recovery.
- 17 Q. WHAT IS THE FPUC'S POSITION ON WHETHER IT IS SEEKING DOUBLE
- 18 RECOVERY IN THEIR REQUEST?
- 19 A. The Company alleges that there is no double recovery. However this is inaccurate.
- 20 Citizens' Interrogatory No. 4-83 asked whether costs for the undepreciated plant
- balance being retired would be recovered as part of base rates as well as part of the
- 22 regulatory asset for the undepreciated plant balance being retired. The Company's
- response was as follows:

No, the new plant added was reduced by the plant retired on Schedule B-3. Depreciation was computed on the net increase to plant. Since we requested the undepreciated plant as part of the regulatory asset, we did not reduce accumulated depreciation on B-3 by the entire amount of the retired plant as required by FERC accounting instructions. On B-3 accumulated depreciation was reduced by the estimated amount of the retired assets depreciated. The undepreciated plant was included in the regulatory asset petition. Please refer to the response to OPC Interrogatory 42.

A.

In its response to Citizens' Interrogatory No. 42, the Company stated it would be earning a return on plant that was destroyed. Additionally, FPUC stated that, because of the early retirement of destroyed plant, it is required to debit accumulated depreciation for the retired plant thereby creating a negative reserve in accumulated depreciation. This undepreciated asset and the cost of removal would be included in rate base and recovered through traditional methodology (i.e. a base rate case) or as a regulatory asset. The Company's response concluded by stating that, to avoid shareholders having to bearing the loss of these assets, FPUC is proposing to earn a return now instead of waiting until the next rate case. Essentially, the Company's proposal ignores the fact that under traditional ratemaking shareholders are allowed a return on equity that assumes there are risks and regulatory lag.

Q. GIVEN THE EXPLANTION PROVIDED BY FPUC, IS THE POSSIBILITY OF DOUBLE RECOVERY ELIMINATED?

No. In essence, FPUC is stating that the possibility of double recovery is eliminated, and in theory that could possibly be true if all the numbers were synchronized. However, everything is not synchronized because the proposed treatment by FPUC is in reality a single-issue rate case that ignores what is currently being recovered through base rates. Regarding the issue of double recovery, the reduction to the cost of new

plant by an amount for plant being retired only creates an illusion that double recovery is not occurring. The adjustment made by FPUC simply shifts the dollars from the requested recovery amount being depreciated to an amount identified as part of a regulatory asset on which recovery of and on is still being requested. With respect to the return on retired plant, FPUC's proposal does reduce the plant amount requested for some retired plant; however, it also provides an added return on that same plant by the creation of a regulatory asset that reflects the net plant identified as undepreciated retired plant. This regulatory asset is the \$856,500 shown as part of the \$8,251,471 requested on Company Exhibit MDN-7. Since base rates continue to reflect a return of and on the plant identified as retired and the requested regulatory asset in this proceeding asks for a return of and on that same net plant, there is a double recovery of this asset which is no longer used and useful. In fact, the recovery is in actuality higher than double recovery since the \$1,429,416 of retired plant had an accumulated depreciation balance that was lower than the \$572,916 that was reflected in FPUC's current filing.

A.

Q. HOW IS THE DOUBLE RECOVERY ACTUALLY HIGHER BASED ON THE COMPANY'S FILING?

FPUC's filing indicates the retired plant has a cost of \$1,429,416 and an accumulated depreciation balance of \$572,916 for net book value of \$856,500. This \$856,500 is included in the regulatory asset of \$8,251,471 that FPUC is seeking to amortize as an expense which increases the amount sought for recovery and that regulatory asset is also included in the rate base request that recovery is being sought on. Current rates were last set years prior to this proceeding. Based on the low value of the retired plant

in comparison to the replacement value, this \$1,429,416 of plant was factored into base rates when last reset. Since that occurred years ago, the accumulated depreciation on that plant would have been far less. If you assume accumulated depreciation was \$150,000 at the time rates were last reset, the current base rates reflect a return on \$1,279,416 (\$1,429,416 – \$150,000) of net plant. Thus, if the Commission were to approve FPUC's request as filed, the ratepayers' base rates would continue to reflect a return on the amount \$1,279,416 and the single-issue case would provide a return on the \$856,500 current balance. Therefore, not only would this result in a earning double on the same plant, but it would also be higher.

10 Q. HOW COULD THIS DOUBLE RECOVERY BE AVERTED?

The Commission has two options. First, if the requested regulatory asset is allowed as part of a single-issue rate case, the only way to prevent double recovery would be for the Commission to adjust base rates to exclude the identified plant being recovered through current base rates. Absent some form of credit mechanism to this request, FPUC would be recovering a return of and on the same dollars twice. That option would be highly unusual. The second, and best option, would be for the Commission to exclude the \$856,500 from the regulatory asset that might be established. That would legitimize the adjustment to plant made by FPUC because the adjustment was not simply shifted from plant to a regulatory asset. As explained elsewhere in my testimony, all issues related to new plant, retired plant, and applicable depreciation and accumulated issues should be considered in FPUC's next base rate case, not considered in this case to establish regulatory assets.

A.

1 Q. DO YOU HAVE ANY OTHER CONCERNS WITH THE PLANT

2 REQUESTED?

Yes. The retired plant according to Company Exhibit MDN-9, page 4 was \$1,429,416 3 A. and the replacement cost was \$20,003,327. This is a significant difference. According 4 to FPUC's response to Citizens' Interrogatory No. 2-41, the difference in these amounts 5 6 is based upon the following: (1) the replaced plant was old; (2) inflation has increased 7 the cost; and (3) contractors performed much of the work and contractor costs are higher than internal labor costs. I do not dispute any of these reasons, and in fact, I 8 9 have taken the same position on many occasions when taking issue with the capitalization quantification employed by utilities as part of storm restoration 10 proceedings. However, I have a concern as to whether the cost of plant removed is 11 In response to Staff Interrogatory No. 1-11, FPUC stated that 12 accurate. "Approximately 10 to 12% of the Northwest Division's Distribution System" required 13 replacement. The Company's response to Citizens' Interrogatory No. 4-71 indicated 14 the Northwest Division's Distribution System's gross plant prior to Hurricane Michael 15 was \$46,281,784. Applying 10% to that number suggests the replaced plant should be 16 upward of \$4 million which is significantly more than the \$1,429,416 of retired plant 17 18 reflected on page 4 of Company Exhibit MDN-9. Thus, it appears the Company's estimate for plant retirement may be understated, resulting in a less than sufficient 19 offset to plant when determining the depreciation expense. 20

Q. WHAT IS THE RATE IMPACT OF FPUC'S REQUEST FOR RECOVERY ON

22 THE NEW PLANT?

21

Assuming no changes to any other costs in FPUC's request or in the inappropriate application of a WAAC, removal of the new plant results in a revenue requirement for 2020 of \$9,391,377, as shown on Exhibit No. HWS-4. The \$2,493,271 reduction in annual revenue requirements due to the difference between including the new plant based on WACC and the calculated return using WACC excluding the new plant is significant when compared to the Company's requested \$11,884,648 annual requirement. Again, it should be noted here that my calculation is in no way suggesting that all the costs requested or the use of WACC is reasonable and/or appropriate.

A.

A.

9 Q. WHAT IS YOUR RECOMMENDATION AS TO HOW THE COST OF FPUC'S 10 STORM RESTORATION EFFORTS SHOULD BE RECOVERED?

The Company's storm cost recovery should be limited to the costs of restoration efforts deemed to be reasonable and prudent. This is consistent with past storm recovery requests approved by the Commission. The recovery of the cost of new plant and recovery of the cost of removal/retired plant regulatory assets should be excluded from this request and deferred to FPUC's next base rate proceeding. Any concern with double recovery will be eliminated because FPUC's base rate filing will reflect plant accounting consistent with traditional ratemaking accounting. Therefore, I am recommending a reduction to rate base of \$18,798,487 for new plant and a reduction to rate base of \$7,838,898 for the Regulatory Asset Unrecovered Accumulated Depreciation. This adjustment will reduce depreciation expense in the amount of \$696,680 and amortization expense in the amount of \$825,147.

V. LOST CUSTOMERS

1

2

16

Q. IS THE REQUEST FOR RECOVERY OF REVENUE ASSOCIATED WITH

3 LOSING CUSTOMERS APPROPRIATE?

No. Rule 25-6.0143(1) (f) (9), F.A.C., specifically excludes the recovery of lost 4 A. 5 revenues from services not provided. The fact that customer's homes and businesses 6 were destroyed making service impossible is irrelevant. In addition, asking for this type of recovery amounts to retroactive ratemaking which is more fully discussed later. 7 Initially, the Company estimated the lost revenue to be \$605,068. That estimate 8 assumed losing 779 customers.⁵ The revised filing also includes a reduction of lost 9 customers. Revised Exhibit E shows the initial 762 lost customers (as of November 10 2018) decreasing to 556 lost customers (as of November 2019). FPUC's claim for 11 estimated lost revenue is now at \$448,113. While the reduction in total number of lost 12 customers is indicative that this number is temporary and ever changing, this 13 nevertheless, is not an appropriate expense which is authorized for recovery under Rule 14 15 25-6.0143, F.A.C.

Q. HOW DID THE COMPANY IDENTIFY THE CUSTOMERS LOST?

17 A. When the Company was asked for a log identifying its customers allegedly lost,
18 FPUC's response stated that no log existed. The Company's response continued that
19 the adjustment was based on the customers it identified as not connected after the storm.
20 Yet, FPUC stated that it has not yet determined "whether, or how many, customers may
21 have already returned," and would revise its request accordingly. This resulted in a
22 reduction to the request. This decrease indicates the number of lost customers could

⁶ Company response to Citizens Interrogatory No. 2-44.

⁵ Attachment E to the initial petition filed August 7, 2019, in Docket No. 20190156-EI.

1		continue to decrease; however, it doesn't change the fact that this is not a recoverable
2		expense under Rule 25-6.0143, F.A.C.
3	Q.	ARE YOU AWARE OF ANY OTHER REASON THAT THE REQUEST FOR
4		LOST REVENUE SHOULD NOT BE ALLOWED?
5	A.	Yes. There are accounting requirements for recording a regulatory asset for recovery
6		in the future. The following is an excerpt of the requirements from the Financial
7		Accounting Standards Codification for this to occur:
8 9 10 11 12		980 Regulated Operations 340 Other Assets and Deferred Costs 25 Recognition Recognition of Regulatory Assets
13 14 15 16 17		25-1 Rate actions of a regulator can provide reasonable assurance of the existence of an asset. An entity shall capitalize all or part of an incurred cost that would otherwise be charged to expense if both of the following criteria are met:
18 19 20 21 22 23 24 25		 a. It is probable (as defined in Topic 450) that future revenue in an amount at least equal to the capitalized cost will result from inclusion of that cost in allowable costs for rate-making purposes. b. Based on available evidence, the future revenue will be provided to permit recovery of the previously incurred cost rather than to provide for expected levels of similar future costs. If the revenue will be provided through an automatic rate-
26 27 28		adjustment clause, this criterion requires that the regulator's intent clearly be to permit recovery of the previously <u>incurred</u> <u>cost</u> .
29 30 31 32		A cost that does not meet these asset recognition criteria at the date the cost is incurred shall be recognized as a regulatory asset when it does meet those criteria at a later date. (Emphasis bold-only in original and bold-underline added)
33 34		As set forth in accounting standards, an incurred cost is a cost arising from cash paid
35		out to obligations to pay for an acquired asset or service. As indicated by these

standards, FPUC's claim for lost revenue is not an incurred cost; therefore, a regulatory
asset is not allowed to be established for this phantom cost.

3 Q. ARE THERE ADDITONAL REASONS THAT THIS REQUEST IS 4 INAPPROPRIATE?

A.

Yes, if FPUC is allowed to establish a regulatory asset for lost revenue due to a loss of customers, a precedent would be established that is totally contrary to ratemaking standards. The traditional ratemaking paradigm allows a utility the opportunity to earn a reasonable return, but does not guarantee a return. Thus, when FPUC's base rates were last reset, it received no guarantee from the Commission that it would earn a certain amount of return. Moreover, retroactive ratemaking is a long established principle that a utility cannot seek to make up lost revenues if it is earning below its authorized range; conversely, customers cannot seek a refund of revenues for prior periods if a utility earns above its authorized range. In this docket, FPUC is asking for revenues to make up for earning less than its authorized range for the prior period of October 2018 through December 2019. If approved, this will essentially turn long-standing ratemaking standards on its head by guaranteeing to shareholders that every time revenues were not sufficient to cover expenses to achieve that allowed return,

⁷ Federal Power Commission v. Hope Natural Gas Co., (Hope), 320 U.S. 591 (1944), and Bluefield Water Works and Improvement Co. v. Public Service Commission of West Virginia, (Bluefield), 262 U.S. 679 (1923).

⁸ See City of Miami v. Florida Public Service Com., 208 So. 2d 249, 260 (Fla. 1968); Order No. PSC-98-1243-FOF-WS, issued September 21, 1998, in Docket No, 971596-WS, In re: Petition for limited proceeding regarding other postretirement employee benefits and petition for variance from or waiver of Rule 25-14.012, F.A.C., by United Water Florida, Inc.

companies could request a regulatory asset for the shortfall. FPUC has an available option if it is earning below its authorized earnings range just like all other utilities; and that is to file for base rate relief.

4 Q. WHAT ARE YOU RECOMMENDING WITH RESPECT TO THE COST 5 RELATED TO "LOST REVENUE" BEING REQUESTED?

A. The revised regulatory asset amount of \$454,003 included in the Company's request should be denied because it is not allowed by Rule 25.6.0143 (1)(f)(9), F.A.C., and would burden customers with added costs previously determined to be inappropriate for recovery per Commission rule. Exclusion of the \$454,003 from the rate base and the request would reduce amortization expense in the amount of \$100,884.

VI. EXPENSES NOT RECOVERED

A.

12 Q. IS THE REQUEST FOR RECOVERY OF A REGULATORY ASSET FOR 13 EXPENSES NOT RECOVERED APPROPRIATE?

No. Rule 25-6.0143(1)(f)(9), F.A.C., specifically excludes recovery for lost revenues from services not provided. FPUC is attempting to include an amount for recovery as a regulatory asset by simply reclassifying it as "expenses not recovered." The Company claims that, since it did not receive "sufficient" revenues in October 2018 and November 2018 because it did not sell electricity, the expenses it incurred in those months were not recovered (i.e. unrecovered expenses). Notwithstanding FPUC's attempt at reclassification, these unrecovered expenses are, in fact, revenues lost from services not provided in October 2018 and November 2018. Simply put, the amount requested for October and November 2018 expenses represents electric services not

- billed. In fact, the Company's Revised Attachment F identifies the dollars as

 "Expenses Related to October Revenues Lost" and "Expenses Related to November

 Lighting Revenue." Clearly, this is a request by FPUC for recovery of lost revenues

 which is prohibited by Rule 25-6.0143(1)(f)(9), F.A.C.
- 5 Q. IS THERE ANY EVIDENCE THAT FPUC DID NOT RECOVER ITS
 6 EXPENSES?
- A. No. Based on the earnings surveillance report for December 2018, FPUC covered its expenses for the year ended December 31, 2018. The December 31, 2018 return on equity ("ROE") was 7.48% and the ROR for December 2018 was 4.27%. While FPUC did not achieve earnings within its authorized range, it nevertheless realized a profit and its expenses incurred during the year 2018 were recovered. This is evident by the fact that FPUC's ROR was not negative; in other words, above zero indicating a profit was earned.
- 14 Q. DOES THE ACCOUNTING REQUIREMENT FOR ESTABLISHING A
 15 REGULATORY ASSET APPLY TO THE REVENUE RELATED TO FPUC'S
 16 REQUEST FOR UNRECOVERED EXPENSES?
- 17 A. Yes, it does. As I stated above, the Company classified this as a request for unrecovered
 18 expenses although in actuality, it is a request for lost revenue. Despite FPUC's
 19 attempted nomenclature sleight of hand to reclassify this lost revenue as unrecovered
 20 expenses, this is not an expense that it incurred. This is a claim to recover revenue that
 21 was not billed because electricity was not provided to any customers; as such, it is not
 22 an incurred expense. If FPUC's reclassification of lost revenue to "unrecovered
 23 expenses" were to be accepted, and FPUC allowed to establish a regulatory asset, the

Commission would be establishing a precedent that is totally contrary to basic ratemaking standards. It is understood as a basic principle that the Commission sets rates that allow a utility the opportunity to earn a fair and reasonable return. This does not guarantee a return for the utility, but gives the utility an opportunity to earn that return. Moreover, retroactive ratemaking is a long established principle that a utility cannot seek to make up lost revenues if it earns below its authorized range; conversely customers cannot seek a refund of revenues for prior periods if a utility as earning above its authorized range.⁹

In this docket, FPUC is asking to recover revenues because it earned below its authorized range for the prior periods of October 2018 and November 2018. If approved, this would essentially turn long-standing ratemaking standards on its head by guaranteeing to shareholders that, every time a utility earned below its authorize range, the utility could request the Commission establish a regulatory asset for the shortfall.

Q. WHAT ARE YOU RECOMMENDING WITH RESPECT TO THE COST FOR EXPENSES NOT RECOVERED BEING REQUESTED BY FPUC?

17 A. The regulatory asset amount of \$885,855 included in the Company's request should be
18 denied, similar to the lost revenues being requested, because it is not allowed under
19 Rule 25-6.0143(1)(f)(9), F.A.C., and would burden customers with additional costs

⁹ See City of Miami v. Florida Public Service Com., 208 So. 2d 249, 260 (Fla. 1968); Order No. PSC-98-1243-FOF-WS, issued September 21, 1998, in Docket No, 971596-WS, In re: Petition for limited proceeding regarding other postretirement employee benefits and petition for variance from or waiver of Rule 25-14.012, F.A.C., by United Water Florida, Inc.

previously determined to be inappropriate for recovery. Similar to the lost revenue recommendation, the Commission should reduce amortization expense by \$196,857.

Moreover, FPUC's request violates long-standing principles against retroactive ratemaking. For these reasons, FPUC's requests for lost revenue and recovery of expenses that were not recovered through base rates are inappropriate and should be denied.

VII. STORM RESTORATION COSTS

- 8 Q. HOW HAVE YOU PRESENTED YOUR ANALYSIS OF STORM
- 9 **RESTORATION COSTS?**

7

- 10 A. My analysis of storm costs is presented in a format similar to the Company's summary
 11 provided on Revised Exhibit MDN-4 which separates the costs by type of cost. My
 12 analysis also includes separate schedules analyzing the various cost categories.
- Q. PLEASE BRIEFLY DESCRIBE THE RESTORATION COST ISSUES YOU
 WILL BE ADDRESSING IN THIS PROCEEDING.
- I am addressing the appropriateness of FPUC's proposed recovery of costs related to payroll, overhead, benefits, contractors, line clearing, materials and supplies, logistics and other items as reflected in its petition. As part of my analysis, I relied on my experience in analyzing storm costs in other jurisdictions, past review of storm costs in Florida, and Rule 25-6.0143, F.A.C., which addresses what costs should be included and excluded from a utility's request for recovery of storm related costs.
- Q. WHERE THERE ANY PARTICULAR CONCERNS THAT NEGATIVELY

 IMPACTED YOUR REVIEW OF THE STORM COSTS?

A. Yes, there were. One concern was the method of invoice delivery by some vendors and another concern was the method of billing by some vendors. I observed that some vendors were allowed to bill a bulk rate for equipment and employees instead of having these billed per piece of equipment and per employee with corresponding time sheets for verification. How can FPUC ensure that these vendors are billing correctly and how can they verify the hours and expenses submitted for payment by these vendors?

This is a matter of transparency and accountability on behalf of customers.

8 Q. PLEASE SUMMARIZE YOUR RECOMMENDED ADJUSTMENTS TO 9 STORM RESTORATION COSTS?

A.

I am recommending a reduction of \$120,800 to FPUC's request for payroll expense associated with prohibited bonus payments pursuant to Rule 25-6.0143, F.A.C. I recommend a reduction of \$24,703 related to benefits and overhead costs that also are prohibited bonus payments pursuant to Rule 25-6.0143, F.A.C. I recommend a reduction of \$4,788,243 related to contractor costs to adjust for excessive rates and \$273,768 for an excessive amount of mobilization/demobilization payments. I recommend a reduction of \$116,469 related to other contractor costs where no support was located. Finally, I am recommending an adjustment to logistics of \$316,884 for lack of support. In total, I recommend a reduction of \$5,690,868 to FPUC's overall storm restoration request. My Exhibit HWS-2 contains these adjustments.

20 Q. WHAT IS YOUR OVERALL RECOMMENDATION FOR RECOVERY OF 21 STORM RESTORATION COSTS?

As indicated earlier, FPUC's request for recovery based on a single-issue rate case approach is not appropriate, and recovery of costs associated with Hurricane Michael

and Hurricane Dorian should be based on a reasonable amount of restoration costs prudently incurred. As will be discussed, I have calculated the appropriate recovery for storm restoration costs to be \$34,055,610 with estimated interest of \$1,363,432, for a total to be recovered of \$35,419,042. I am recommending amortization over five years, resulting in an annual recovery of \$7,083,808. The calculation of this is shown on Exhibit HWS-2, Schedule C.

a. Payroll

8 Q. WHAT HAS THE COMPANY REQUESTED FOR RECOVERY OF PAYROLL

9 COSTS?

1

2

3

4

5

6

7

17

18

19

20

21

22

23

A.

10 A. FPUC's request includes \$609,196 of regular payroll costs and \$490,433 of overtime 11 payroll costs. Excluded from FPUC's request is \$125,143 of payroll that was deemed 12 non-incremental (\$113,316 regular and \$11,827 overtime); therefore, the net total 13 payroll being requested is \$974,486 prior to capitalization of storm costs. Additionally, 14 this request includes \$371,902 for Payroll Overhead Allocations reduced by \$60,039 15 for non-incremental costs. That leaves \$311,863 for Payroll Overhead Allocations in 16 the Company's total request for payroll costs prior to capitalization.

Q. WHAT ARE THE PAYROLL AND OVERHEAD AMOUNTS THAT WERE

CAPITALIZED?

In its initial response to Citizens' Interrogatory No. 1-2, FPUC provided a summary that identified the capitalized amount and the cost of removal that totaled to the initial \$28,218,969 identified as capitalized costs on Company Exhibit MDN-4. When the Company revised its filing on March 11, 2020, the capitalized amount was revised to \$27,398,298. I could not locate an updated response that summarized the distribution

- of costs by category. The Company's initial response to Citizens' Interrogatory No. 1-
- 2 24 provided a breakdown of the \$345,471 of payroll overhead costs separated between
- 3 capital, storm, and non-incremental. After FPUC filed its revision, the total overhead
- 4 costs were \$371,902. Again, I was unable to locate an update to the Company's initial
- 5 response providing the necessary separation of costs.

6 Q. ARE THERE CONCERNS WITH WHAT THE COMPANY IS REQUESTING

7 FOR PAYROLL?

- 8 A. Yes, there is. The Company's request includes payroll dollars that, under Rule 25-
- 9 6.0143, F.A.C., are prohibited from being charged to the storm reserve. More
- specifically, Rule 25-6.0143(1)(f)1. and 2., F.A.C., prohibit "[b]ase rate recoverable
- regular payroll and regular payroll-related costs for utility managerial and non-
- managerial personnel" from being charged to the reserve and it prohibits recovery of
- "[b]onuses or any other special compensation for utility personnel not eligible for
- 14 overtime."

15 Q. WHAT IS YOUR CONCERN WITH INCLUDING STORM BONUSES AS

16 PART OF THE COMPANY'S REQUEST FOR RECOVERY?

- 17 A. Rule 25-6.0143(1)(f)2., F.A.C., specifically states "[b]onuses or any other special
- 18 compensation for utility personnel not eligible for overtime pay" and are prohibited
- from being charged to the reserve. (Emphasis added) FPUC should not be allowed to
- 20 recover any of these costs in its request for storm recovery charges.

21 Q. WHY HAVE YOU EMPHASIZED "ANY OTHER SPECIAL

22 **COMPENSATION**"?

A. Citizens' Interrogatory No. 1-28, asked whether any amount of payroll cost was included in the Company's request that was not base payroll or overtime. The Company's response stated that MDN-4 included \$120,800 of inclement weather pay that was allowed by the Commission in Docket No. 20180061-EI and that the plant additions included \$24,703 of IPP bonus. Inclement weather pay is a form of special compensation and the IPP bonus is a bonus. The inclusion of special compensation is not allowed under Rule 25-6.0143(1)(f)2., F.A.C.. Similarly, the capitalizing of the IPP bonus is also not allowed under Rule 25-6.0143(1)(f)2., F.A.C., and thus is not appropriate either.

Q.

A.

SINCE THE ADDED COMPENSATION WAS ALLOWED BY THE COMMISSION IN DOCKET NO. 20180061-EI, WHY ARE YOU STILL RECOMMENDING THIS COST BE EXCLUDED FROM THIS REQUEST?

In my opinion, the Commission erred in reaching its conclusion that these costs are allowable and it should not hesitate to correct the error in this case. A simple change in the description to "inclement weather pay" does not change the fact that these payments constitute an added form of employee compensation for salaried utility personnel not eligible for overtime pay or, at the very least, other special compensation that is prohibited from recovery by the Rule. With respect to the capitalized amount, IPP bonus clearly is a bonus and again is prohibited by the Rule. Allowing the recovery of costs prohibited by the Commission's rule simply because the Company changed its description of these costs would set a bad precedent for other rules where costs are not recoverable by allowing utilities to simply change the name of a cost, not the

characteristic of that cost, to provide an avenue to recovery that would normally not be 2 allowed.

1

3

4

5

6

7

8

9

10

11

12

13

21

22

23

A.

Moreover, Rule 25-6.0143, F.A.C., is not limited in its application only to the "incremental" costs chargeable to Account No. 228.1. Merely changing the means of recovery for storm costs should not be used to thwart the application of Rule 25-6.0143, F.A.C. The Rule establishes the Commission's policy for the types of storm costs that are recoverable from customers: "[i]n determining the costs to be charged to cover storm-related damages, the utility shall use an Incremental Cost and Capitalization Approach methodology (ICCA)." Therefore, irrespective of how the Company chooses to seek recovery of storm-related costs from its customers (i.e. surcharge or regulatory asset), the principles of the ICCA methodology apply. Under the application of the ICCA methodology, bonus and special compensation for employees not eligible for overtime, which in most cases is salaried employees, is prohibited.

WHAT ADJUSTMENT ARE YOU PROPOSING TO THE COMPANY'S 14 Q. REQUEST FOR PAYROLL COSTS? 15

16 A. As shown on Exhibit No. HWS-2, Schedule D, I am recommending the total payroll be 17 reduced by \$120,800. This adjustment reduces the regular payroll requested by FPUC 18 from \$303,946 to \$183,146.

19 Q. DID YOU IDENTIFY ANY OTHER CONCERNS WHEN EVALUATING 20 PAYROLL COSTS?

Yes, I did. However, the concern is not necessarily with what FPUC did but with how FPUC's approach is different from what is traditionally done by utilities in capitalizing costs. Citizens Interrogatory No. 1-31 asked FPUC whether it had utilized a formula for determining the capitalized costs for poles, and, if so, to provide a breakdown of the cost components. A similar request was made for the capitalization of wires ¹⁰. The Company's response indicated a work order was established and that materials and employee payroll were charged directly and an estimate was made for contractor costs. This response did not provide any detail as to how the contractor cost was determined other than stating the costs were allocated based on the "bird dog crew's" time allocation as this was considered the best way to estimate contractors costs. FPUC's employees that were in charge of contractor crews were called "bird dogs." This raises a concern about other utilities' claims over the many years I have reviewed storm costs that tracking capital time is not feasible since everything is being performed in a "get it done" manner and tracking is not something that can be done. I note that in the previous storm cost recovery case, FPUC utilized a formula. I discuss the issue of capitalization later as part of my discussion of contractor costs and in my testimony on capitalization.

Q. WHY DO YOU CONSIDER THE TRACKING OF CAPITAL COSTS TO BE A CONCERN?

As I indicated above, utilities have claimed in past dockets that they cannot do any real-time tracking of labor to determine what labor costs should be capitalized. In my opinion, the use of a formula to determine capitalizable costs does not accurately reflect the actual capital costs of plant restoration. FPUC's real-time approach suggests that the use of a formulistic approach utilized by utilities in the past to capitalize their labor costs was not justified and their arguments that tracking labor was not an option may

22.

¹⁰ Citizens Interrogatory No. 1-36.

have been disingenuous. Nevertheless, while FPUC's real-time approach appears reasonable, it has not been tested for accuracy. This should be done by reviewing the actual time sheets of the bird dog crews and then verifying the calculations of the respective percentages applied to contractor costs. Because of time constraints, I was unable to do this as part of my review.

6 Q. ARE YOU RECOMMENDING AN ADJUSTMENT TO THE REQUESTED

7 **OVERHEAD COSTS?**

- 8 A. Yes, I am. As indicated earlier, the capitalized costs for overhead benefits included
- 9 \$24,703 of IPP bonus pay. This is a cost prohibited under Rule 25-6.0143(1)(f)2.,
- F.A.C. and, therefore, the capitalized adjustment to overheads costs needs to be
- adjusted to remove this prohibited costs in the same amount. I am recommending the
- overhead costs be reduced by \$24,703. The adjustment is shown on Exhibit No.
- 13 HWS-2, Schedule D. This adjustment reduces recoverable burden costs from
- 14 \$103,670 to \$78,967.

15 **b. Contractor Costs**

16 Q. WHAT IS INCLUDED IN THE CONTRACTOR COSTS IN THE COMPANY'S

17 **PETITION?**

18 A. The Petition included \$57,147,169 of costs labeled as contractor costs. In its revised
19 response to Citizens' Interrogatory No. 1-2, the Company provided a complete listing
20 of each invoice included in the filed amount. That consisted of \$52,723,318 of line
21 contractor invoices, \$4,051,976 vegetation contractors, and \$371,875 of other
22 contractor costs.

Q. WHAT IS THE AMOUNT OF STORM RESTORATION COSTS IDENTIFIED

2 AS BEING RESTORATION COSTS FOR LINE CONTRACTORS AND WHAT

AMOUNT OF LINE CONTRACTOR COSTS WERE CAPITALIZED?

A.

A. In its revised response to Citizens' Interrogatory No. 1-2, the Company identified \$57,147,169 in contractor costs associated with Hurricanes Michael and Dorian. I sorted the costs by type, as identified by FPUC, into line contractors, line clearing and consultants. Line contractor costs were \$52,723,318, line clearing contractors were

\$4,051,976, and consultants were \$371,875.

The Company's revised response provided a separation of these costs into plant, cost of removal and storm. The amount identified as being capitalized for line contractors, which consists of plant and cost of removal, totaled \$23,163,090. The capitalized amounts were \$21,242,556 for line contractors, \$1,913,108 for line clearing contractors and \$7,425 for consultants. The result is storm recovery costs (total less capitalized) are \$31,480,762 for line contractors, \$2,138,867 for line clearing contractors and \$364,450 for consultants.

16 Q. WHY DID YOU USE THE TERM "IDENTIFIED" INSTEAD OF JUST 17 SAYING THE AMOUNT CAPITALIZED?

On Company Exhibit Revised MDN-4, FPUC lists a total capitalized amount of \$27,398,298. That amount includes \$20,003,326 identified as plant and \$7,394,972 identified as removal. The Company's classification on its exhibit as capitalization costs is somewhat misleading. The \$20,003,326 is the amount actually capitalized and being depreciated over various periods of time, from 20 to 42 years, depending on account classification. The \$7,394,972 identified as removal has been reflected as a

1	regulatory asset along with \$856,500 for the net book value of retired plant, discussed
2	earlier, for a total of \$8,251,471. FPUC is requesting this amount be amortized and
3	recovered over 10 years.

18

19

20

21

22

23

A.

- WITH THE ADJUSTMENTS MADE, ARE YOU SATISFIED WITH THE 5 Q. 6 REQUESTED STORM RECOVERY OF \$31,480,762 FOR OUTSIDE LINE 7 **CONTRACTOR COSTS?**
- 8 No, I am not. There are two concerns with the amount requested. First, there is a A. 9 concern with the hours charged and the rates charged. Second, there is a concern with whether costs are adequately supported.

WHAT ARE THE CONCERNS WITH THE HOURS AND RATES CHARGED 11 O. IN FPUC'S STORM COST RECOVERY FILING? 12

Based on my past experience in reviewing storm costs, generally there are issues with excessive hourly standby time. and excessive respect to rates, mobilization/demobilization charges, and whether these rates were reasonable under the circumstances. For example, in FPUC's filing in Docket No. 20180061-EI, the Company paid PAR Electric an extremely excessive rate. I note that PAR was not one of the contractors utilized in this filing. However, there is another service provider whose rates I believe were excessive which I discuss below.

In addition, based on my prior experience in reviewing storm recovery costs, I have found that utilities generally allow for travel time that exceeds normal travel based on a Google Maps or MapQuest estimate of travel time required. I also generally find that there is a concern with excessive standby time where contractors are on standby time prior to the storm, until after the storm passes, yet the utilities either determined the crews were not needed or an assignment of work is not made until a day or more after impact. In this case, I have only identified issues with travel time for mobilization and demobilization. However, since no standby time was charged, there were no adjustments to make in this case, although I do have concerns which I address later in this testimony.

7 Q. IS THERE A CONCERN WITH THE HOURLY RATES CHARGED TO FPUC

DURING THE RESTORATION PROCESS?

Α.

Yes, there is one concern identified. In reviewing hourly rates, it is generally assumed that the average rate charged will be higher for external contractors when compared to other electric utilities providing restoration assistance. This is because utilities generally limit their charges to actual costs whereas contractors are recovering cost plus a profit margin. It is my understanding, this is a requirement by South East Exchange (SEE) and this is typically what I have seen in reviewing storm costs recovery filings for other utilities. In its response to Citizens' Interrogatory No. 1-12, FPUC identified FPL FPUC as having an overall cost per hour of next highest charge being ARC American, Inc., at an average hourly with the exception of one other contractor, the average hourly rate ranged from \$122 to \$146. This range of costs for the other contractors is considered reasonable. However, in reviewing the detail provided the average hourly rate for FPL FPUC was understated. In its response to Citizens' Production of Documents No. 4, FPUC's documents indicated a different billing amount for labor, benefits, vehicle costs and overheads that increases the hourly rate charged by FPL FPUC significantly.

The total bill was ... After eliminating ... for administrative and general cost, which includes subsistence, the cost is ... which calculates to an average hourly rate of ... Review of the detail provided by FPUC suggests that FPUC FPL's loaded pay rate and added costs are much higher when compared to the rate charged by external contractors (general highest rates) and the IOU rates (using SEE requirements to implement cost-only billing amongst utilities) and calls into question the reasonableness of FPUC FPL's rates charged in this docket.

Α.

9 Q. DID YOU INQUIRE AS TO WHY FPUC FPL'S COSTS WERE SO HIGH?

10 A. Yes. Based on the comparison of rates, a follow up request was made. FPUC's response to Citizens' Interrogatory No. 52 stated that FPUC FPL's per hour cost is higher because FPUC FPL provided restoration support that was fully self-contained including its own support staff, lodging, facilities and meals.

Q. DOES THE EXPLANATION PROVIDE JUSTIFICATION FOR THE HIGHER CHARGES FROM FPUC FPL?

No, it does not. On the surface, it may seem to be a logical explanation. However, when you factor in all the other costs associated with the contractor costs summarized in FPUC's response to Citizens' Interrogatory No. 1-12, FPUC FPL's average hourly rate is still extremely high in comparison. I made a calculation on Exhibit HWS-5 that begins with the total cost and hours provided by the Company in the response and then deducted the FPUC FPL cost and hours charged by FPUC FPL. The net result was an average cost of per hour for other contractors. I then added the extra costs associated with housing, meals, fuel, equipment rental and other costs incurred. After

1		adding \$4,103,592 of costs, the average hourly rate for the external contractors is
2		When you compare this to FPUC FPL's billing of for hours (which
3		results in an average cost of per hour), this shows an hourly rate being charged
4		that is much higher than that charged by external contractors. For comparison
5		purposes, the overall cost billed by Tampa Electric Company ("TECO") was
6		for hours of labor. That results in an average hourly rate of
7		FPL's rate appears excessive and not justified under the circumstances.
8	Q.	ARE YOU MAKING ANY RECOMMENDATION WITH RESPECT TO THE
9		COST CHARGED BY FPUC FPL?
10	A.	Yes. As shown on Exhibit HWS-5, there is a calculated excess billing by FPUC FPL
11		of Absent any justification for the significant billing difference, I am
12		recommending that or 50% of the excess be excluded from FPUC's request.
13		An argument presented by FPUC in Docket No. 20180061-EI when it paid PAR
14		Electric an excessive rate was that external contractors have to be paid whatever they
15		charge due to the circumstances. This argument does not apply to a neighboring
16		electric utility that is subject to the SEE cost recovery protocol.
17	Q.	ARE THERE ANY CONCERNS WITH THE CAPITALIZATION OF
18		CONTRACTOR COSTS?
19	A.	No. Based on the Company's response to Citizens' Interrogatory No. 1-16, the major
20		costs capitalized were for pole replacement, conductor and services. Since there were
21		concerns with the capitalization process in Docket No. 20180061-EI, FPUC was
22		requested to explain whether a formula was utilized to determine the amount

capitalized and, if so, to provide an explanation of the process and a detailed calculation

of the capitalization for poles and wire. The Company's response to Citizens' Interrogatory No. 1-31 explained that FPUC set up work orders for the capitalization of poles and when materials were issued the costs were charged to the work order. The associated labor was based on employee labor that was directly charged to the capital work order. As stated earlier, FPUC's employees that were in charge of contractor crews were called bird dogs and charged their time to the work orders. The FPUC "bird dogs" employees had oversight and monitoring responsibilities over contractor crews. Using the FPUC bird dog employees' allocation of time, contractor costs were similarly allocated. In its response to Citizens' Interrogatory No. 3-50 asking how specific capital costs were determined, FPUC stated that costs were based on the tracking of time by the FPUC bird dogs and that costs were then allocated based on the tracked This method suggests that the calculation of capitalized costs should be uniformly determined with cost variances being based on who did the work (i.e. contractor rates vary). In its various responses to Citizens' Interrogatory No. 1-2, FPUC provided the cost for each invoice and an allocation of that cost to plant, cost of removal and storm restoration. In reviewing that detail, I was able to confirm that the vendor costs were uniformly assigned. The assignment was 31.97% to plant and 16.21% to cost of removal. In reviewing the Company's capitalized cost and, based on my experience in analyzing component costs, the capitalization process appears to be reasonable.

Q. WOULD YOU DISCUSS ANY CONCERNS YOU HAVE WITH THE

MOBILIZATION/DEMOBILIZATION COSTS INCLUDED AS PART OF

FPUC'S REQUESTED COST FOR LINE CONTRACTORS?

A. Yes. FPUC was asked to provide a summary of the mobilization/demobilization costs.

If not available the Company was asked to provide an explanation as to why the costs were not available and to explain how the mobilization/demobilization costs were verified by the Company. The response to Citizens' Interrogatory No. 1-8 was as follows:

The Company has not prepared separate summaries for mobilization/demobilization costs. The costs are included in contractor costs in the filing. Contractors were asked to increase the size of the crews over a few days period. Each crew is summarized in the supporting invoices, both for contractor and line clearing. The contractor summaries performed are included in OPC POD 1 numbers 4 and 6.

The referenced Production of Documents ("PODs") did contain contractor summaries along with invoices and, on some occasions, travel maps. However, I note that the summaries, at least in part, included information prepared in response to discovery and not as part of FPUC's routine storm cost invoice review process. One example is attached as Exhibit HWS-6. This is identified as OPC POD 1 number 4a and includes 23 pages. The first 3 pages are a summary of bills "Over \$25,000" which is the threshold set for invoices to be provided; thus this summary is in response to discovery and was not part of the invoice review process. Page 4 is a vendor summary, prepared by FPUC, with dates and locations of the vendor. Looking at one example, a review of the summary for ARC American Inc. indicates the travel date is prior to the date that ARC American Inc. was secured by FPUC and, even though the starting location is Wakarusa, Indiana and the ending destination is Marianna, Florida, there are no miles entered in "Miles" line on the form. Absent the travel details and miles, the Commission should question how an appropriate review of the invoices can be done. The next 5 pages (pages 5-9), along with pages 12-15, of the attachment are line by line

summaries of costs. The only indication of mobilization is an entry for fuel costs, and there are no labor hours indicated for mobilization/demobilization. Page 10 contains contractor information and page 11 shows the hourly rates charged. Pages 16-23 are various invoices, none of which reference any mobilization time being billed. Specifically, the invoices on pages 16-18, are for dates that, according to the vendor summary, included dates when travel was to occur; yet, there is no indication of travel time on those invoices.

8 Q. IS EXHIBIT HWS-6 REPRENTATIVE OF WHAT WAS INCLUDED IN 9 FPUC's RESPONSE TO "OPC POD 1 NUMBERS 4 AND 6?

A.

Yes, it is. Another example is the folder labeled "OPC POD 1 number 4 p" for Chain Electric Company ("Chain") where the information is similar to that of Exhibit HWS-6. There is one difference here, as well as with other attachments, where this folder included a time sheet. Notably, the time sheet was for a period of time (October 26-31, 2018), where the vendor summary indicates this vendor would be released and demobilizing. The time sheet does not include any time for demobilization. I also note that the vendor summary does not identify a "Starting Travel Location," no "Ending Destination" for demobilizing and no "Miles." Once again, this raises the question as to how these costs could have been verified by FPUC. There is no documentation indicating that Company checked the contractor's travel time and/or verified the billed charges as part of FPUC's review process in approving the contractor's invoice for payment.

As shown on Exhibit HWS-2, Schedule E, I reviewed a significant number of the invoices and found the information uncharacteristically different from other storm

reviews that I have performed. Typically, the invoices and/or time sheets will identify mobilization/demobilization date and time; however, in this case the invoices and time sheets were very limited and in many cases mobilization/demobilization did not appear to be labeled as such. In some cases, invoices had some form of log sheets included along with the time sheets that indicated travel on specific dates but they did not specifically identify the hours of mobilization/demobilization travel time. This again is something of an anomaly.

Q. DID YOU INQUIRE AS TO HOW FPUC VERIFIED THE REASONABLENESS OF MOBILIZATION/DEMOBILIZATION COSTS FOR CONTRACTORS?

1

2

23

24

25

26

27

28

29

30

10 A. Yes. The Company's response to Citizens' Interrogatory No. 1-7 states as follows:

The Company applied the same policy that it has applied in prior storm events with regard to mobilization/demobilization. This policy includes notification of third party companies of an existing need with an estimated start time based on the most current track of the storm event, in this case Hurricane Michael. At the conclusion of the restoration effort, the Company notifies the third party companies of an anticipated release date. FPUC consistently reviews the policies in place and has found the mobilization/demobilization policy effective. So no formal study was completed by either the Company, nor outside consultants. While the Company has not completed a study, nor had one completed for it, it does continue to evaluate the mobilization/demobilization activity with the same fervor as it has in previous storm events. For Hurricane Michael, these steps included review of vendor's invoice for Each vendor's invoice were mobilization/demobilization costs. summarized to include the distance travelled via google maps (start and stop location), the start and finish date, and any additional expenses for reasonableness. The comparisons that were documented are included in the response to OPC's POD 4 and 6. None of the invoices seemed unreasonable for days in travel or travel expenses charged.

1 Q. DID YOU FIND INVOICE SUMMARIES THAT INCLUDED DISTANCE

2 TRAVELED, THE START DATE, THE FINISH DATE AND COMPARISONS

MADE?

A.

A. No, I did not. As I indicated earlier there was "a" vendor summary but the dates and miles were missing on some. As for an analysis of "each vendor invoice," that documentation was not provided. In addition, the comparisons referred to by FPUC in its discovery response could not be located. This could be because FPUC's response refers to "... the comparisons that were documented..."; however, if the comparisons were not documented, then that would explain why it was not something that was commonly found, if at all.

11 Q. ARE YOU AWARE OF ANY DOCUMENTED REVIEW OF CONTRACTOR

COSTS PERFORMED BY FPUC?

Yes. In its response to Citizens' Interrogatory No. 6-114, FPUC provided various reviews that summarized all the costs, hours and other detail associated with respective contractors. Additionally, other reviews were provided in response to Citizens' POD No. 4-24. The review included a document entitled "Contractor Summary" that was similar to the vendor summary provided with documents in response to Citizens' POD No. 1-4 and 1-6, discussed above. In most cases, this document was more complete than the vendor summary. For example, Exhibit HWS-6 is for ARC American, Inc. ("ARC") and the review provided in the attachment labeled "OPC ROG 6 Number 114b ARC American" included a Contractor Summary that I am attaching as Exhibit HWS-7. Unlike the vendor summary, the miles are included and there are dates for mobilization and for demobilization. According to this summary, ARC employees

were allowed 2 days of required travel (October 11, 2018 to October 12, 2018) when traveling to Florida and were able to return back to Indiana in 1 day (November 5, 2018). The trip is listed as 663 miles. According to the labor hours summary, the hours billed for October 11, 2018 and October 12, 2018 totaled 1,338 hours, with some employees billing for 25 hours and others billing for 16 hours. This presents an issue with travel time. According to MapQuest, traveling from Wakarusa, Indiana to Marianna Florida is 853 miles and takes 13 hours and 38 minutes. That is an average of approximately 61 miles per hour. Thus, I cannot explain where the 663 miles in the contractor summary came from.

Evaluating the travel time, using the 853 miles, and assuming an average speed of 53 miles per hour, the travel time would be approximately 16 hours. Therefore, except for the employees who billed for 25 hours, the employees with 16 hours of travel seem reasonable. The return trip on November 5, 2018 reflected 1,392 hours for 87 employees. Again the 16 hours is reasonable using the 853 miles that I identified in place of the 663 listed by FPUC. I also note that the review document did not have totals for the hours or employees for a number of the days included in this worksheet. This incompleteness of information was not uncommon in the documentation provided by FPUC in this docket. For example, there was no time labeled as mobilization/demobilization, despite the fact the review document has a column specifically labeled "MOB/DEMOB" where hours should have been listed. Thus, the documentation is insufficient to support the Company's claim that the travel hours were verified for its contractors. None of the review documents utilized this column for any of the contractors.

1 Q. WHY DID YOU USE A DIFFERENT AVERAGE MILES PER HOUR THAN 2 THE CALCULATED AVERAGE BASED ON YOUR MAPQUEST SEARCH?

In a proceeding in Massachusetts, I requested any study the utility had that would support the use of a multiplier applied to the hours that are determined using a mapping program. Two studies were provided which concluded that, on average, larger trucks traveled slower than cars. One study set the rate of speed to be 6.7 miles per hour slower and the other set it at 7.8 miles per hour slower. Therefore, I reduced the 61 miles per hour to 53 miles per hour using the 7.8 miles rounded up to 8.

A.

A.

Q. DID YOU IDENTIFY CONCERNS WITH OTHER CONTRACTORS' TIME?

Yes. In the Contractor Summary for Chain Electric Company, attached as Exhibit HWS-8 and included in the FPUC review document OPC ROG 6 Number 114f, identifying two vendors traveling from two different locations in Mississippi. The miles traveled were either 279 miles or 381 miles on October 11, 2018. The review document did not utilize the "MOB/DEMOB" column for travel and had the weekly hours as opposed to the daily hours. As a result, in analyzing the travel for Chain Electric, I relied on FPUC's response to Citizens' POD No. 1-4, attachment OPC POD 1 number 4q. According to one of the time sheets supporting invoice 123791, 11 4 employees charged 17 hours each on October 11, 2018 12. The time sheet itself did not identify this as travel time; however, the "Storm Crew Log for Chain Electric Company" identified it as a day of travel. The starting location was identified as Hattiesburg, Mississippi and indicated 279 miles. MapQuest calculated a distance of

¹¹ Bates FPUC-HM-01357.

¹² Bates FPUC-HM-01358.

¹³ Bates FPUC-HM-01360.

275 miles requiring 4 hours and 21 minutes of travel time. Assuming a travel time of 4 hours and 30 minutes that equates to 61.1 miles per hour. Once again, I assumed a rate of 53 mile per hour which results in a reasonable travel time of approximately 5.5 hours. This indicates that FPUC paid Chain Electric for 46 hours of excessive travel time $(17-5.5=11.5 \times 4)$.

Another example from Chain Electric is invoice 125530J¹⁴ that billed for the week ending November 4, 2018, and included the demobilizing date of October 31, 2018 for a Clinton, Mississippi crew. The time sheet shows 5 employees billing 16 hours each on October 31, 2018 and in this case the time sheet did indicate that it was for demobilization¹⁵. Exhibit HWS-8 indicates the travel distance to be 381 miles and MapQuest indicates a distance of 374 miles with a travel time of 6 hours. The 374 miles in 6 hours equates to approximately 62 miles per hour. Using the 53 miles per hour rate this trip should have been completed in 7 hours. Thus Chain Electric was paid for an extra 45 hours (16-7=9x5). In my review, I found this to be a pattern.

O. DID YOU IDENTIFY ANY ISSUES WITH STANDBY TIME IN THIS FILING?

No. In its response to Citizens' Interrogatory No. 1-9, FPUC stated it did not incur any standby time for its contractors for any of the storms. In my review of the time sheets for contractors, I did not identify any reference to standby. Based on all the storm cases I have reviewed, this appears to be an anomaly. However, I note that while the storm impacted FPUC's system on October 10, a number of contractors were mobilized or commenced work on October 11 or later. I commend the Company in this regard

A.

¹⁴ Bates FPUC-HM-01361.

¹⁵Bates FPUC-HM-01362.

- because it shows that, despite accounts of other utilities claiming contractors have to
 be acquired well in advance of a storm event, FPUC did not do this and was able to get
- a devastated system up and running in a reasonable time frame.

4 Q. ARE YOU MAKING ANY RECOMMENDATION WITH RESPECT TO

5 CONTRACTOR TIME FOR MOBILIZATION/DEMOBILIZATION AND

6 STANDBY TIME?

- 7 A. Yes, I am. I am recommending FPUC be required to separately identify the number of
- 8 hours and costs that are associated with mobilization/demobilization and standby time.
- 9 This is essential information that is beneficial not only to the Company, but also to the
- 10 Commission. This information provides critical insight into how FPUC is planning
- and controlling costs before, during, and after storm restoration activities. The review
- documents are already set up to accommodate the tracking of this information and
- should be utilized to properly verify the contractor costs and support the requested
- recovery of prudent and reasonable storm restoration costs.

15 Q. ARE YOU RECOMMENDING A DISALLOWANCE OF COSTS FOR THE

16 EXCESSIVE MOBILIZATION/DEMOBILIZATION?

- 17 A. I am recommending the line contractor costs be reduced by \$273,678 for the excessive
- travel time charged and unsupported mobilization/demobilization time.

19 Q. HOW DID YOU DETERMINE YOUR ADJUSTMENT?

- 20 A. My analysis of line contractor cost is shown on Exhibit No. HWS-2, Schedule E, Page
- 21 2 of 4. Using the time reports or the review documents, I estimated the
- 22 mobilization/demobilization dollars by multiplying the hours times the average hourly

rate for labor. In many cases, but not all, this approach was conservative since FPUC's documentation may have indicated travel on certain dates, yet when the travel exceeded one day, I prorated the hours on the second day of travel because I did not believe the travel could be as high as the documents suggested. As I discussed above, each of the three examples had excessive travel time. Based on that analysis, the excess appears to be in the 40-50% range. While I am confident that excessive time was allowed for travel, the ability to calculate an exact amount is not possible since the information for mobilization/demobilization was not sufficiently tracked. My recommended reduction of 25% instead of 40%-50% allows for stopping for fuel and resting. Thus, my estimate for the reduction of 25% is a conservative recommended mobilization/demobilization costs that should be disallowed.

12 Q. WHAT ARE YOU RECOMMENDING FOR AN OVERALL ADJUSTMENT

13 TO THE LINE CONTRACTOR COSTS INCLUDING

14 MOBILIZATON/DEMOBILIZATION?

1

2

3

4

5

6

7

8

9

10

11

20

As shown on Exhibit No. HWS-2, Schedule E, Page 1 of 4, I am recommending the line contractor costs charged to restoration be reduced by \$5,062,011 (from \$31,480,762 to \$26,418,750). This includes an adjustment of excessive costs related to the FPUC FPL charges and \$273,768 for excessive charges for mobilization/demobilization.

ii. Line Clearing Costs

21 Q. WHAT IS FPUC REQUESTING FOR LINE CLEARING?

- 22 A. FPUC reported \$4,051,976 of line clearing costs in its response to Citizens'
- 23 Interrogatory No. 1-2. FPUC allocated \$1,269,449 to plant and \$643,659 to cost of

removal leaving \$2,138,867 for storm restoration cost recovery. Costs were allocated using the same allocation methodology that was applied to line contractor costs.

Q. DO YOU HAVE ANY CONCERNS WITH RESPECT TO FPUC'S

PROCESSING OF LINE CLEARING INVOICES?

A. Yes, I do. Similar to Docket No. 20180061-EI, my review of these costs was limited because a large number of invoices from the line clearing contractors appear to be daily billings which fell below the selection threshold of \$25,000. In jurisdictions where a dollar threshold is applied to invoices for review purposes, the setting of a dollar threshold comes at the behest of the utility. Should there be another review of storm cost in the future. I recommend the Commission utilize a threshold of \$10,000 for FPUC to avoid the scope limitation imposed when invoices are for less than a week's work. Of the \$4,051,976 reported costs, I was only able to review \$1,302,708 of costs based on invoices that were over \$25,000.

14 Q. ARE YOU RECOMMENDING ANY ADJUSTMENTS TO LINE CLEARING

15 COSTS?

A.

I am not recommending a specific adjustment amount, even though one should be made. I have not been able to quantify even an estimated amount for mobilization/demobilization costs for line clearing contractors that should be disallowed due to the limited detail provided. However, the same issue I identified for mobilization and demobilization with line contractors also exists for line clearing contractors. Therefore, a similar disallowance of 25% could be made for the reasons discussed in my line contractor testimony.

1 <u>iii. Other Contractor Costs</u>

- 2 Q. WHAT IS FPUC REQUESTING FOR OTHER CONTRACTOR COSTS?
- 3 A. FPUC is requesting \$371,875 for other contractor costs based on its response to
- 4 Citizens' Interrogatory No. 1-2. FPUC allocated \$5,122 to plant and \$2,303 to cost of
- 5 removal, leaving \$364,450 for storm restoration recovery. The costs listed as other are
- 6 various consulting costs.

7 Q. ARE YOU RECOMMENDING ANY ADJUSTMENTS TO THE OTHER

8 CONTRACTOR COSTS?

- 9 A. Yes. These costs include a "projected" amount of \$166,469 for Gunster Yoakley &
- Steward, P.A. No adequate documentation was provided to support this invoice as
- related to storm recovery efforts; therefore, absent support, this cost estimate should
- be disallowed. The adjustment is reflected on Exhibit HWS-2, Schedule E, page 4.
- c. Logistics

14 Q. WHAT AMOUNT OF LOGISTIC COSTS HAS FPUC INCLUDED IN ITS

- 15 **REQUEST?**
- 16 A. FPUC includes logistic costs for Hurricane Michael and Hurricane Dorian in the
- amount of \$1,754,780. There are no logistics costs that were allocated to plant or cost
- of removal. Logistic costs are costs related to the establishment and operation of storm
- restoration sites, and to support employees and contractors who are working on storm
- restoration (i.e., lodging, meals, transportation, etc.). The amount requested was
- 21 increased by \$316,884 in FPUC's revised filing; however, the Company failed to
- 22 provide any added supporting detail in its updates.

1 Q. ARE THERE ANY CONCERNS WITH THE LOGISTIC COSTS

2 **REQUESTED?**

3 A. Yes, there are. There are at least two invoices for generators that should be considered 4 capital costs; however FPUC did not capitalize any logistics costs. Additionally, the 5 Company's updated filing added \$316,484 of costs and no additional documentation 6 was provided to substantiate the increase in costs. It is the Company's burden to prove 7 up its requested storm cost recovery. When FPUC updated its filing, it was incumbent 8 upon the Company to provide comparable supporting detail to that originally requested. 9 The Company has the information and is cognizant of changes it makes to its filing and 10 it should be compelled to automatically provide detail and support for any additional 11 costs being requested. If such costs are approved without any such requirement to 12 provide supporting detail, the Company would be granted cart blanche approval to add 13 whatever new costs it desires whether justified or not.

14 Q. ARE YOU PROPOSING AN ADJUSTMENT TO THE COMPANY'S 15 LOGISTIC EXPENSE FOR THE DIFFERENCE?

16 A. Yes, I am. As I stated, there was no supporting detail for the \$316,484 increase
17 included in FPUC's updated filing. Unless and until the Company provides supporting
18 documentation of what the costs are and that these costs are appropriately recoverable
19 as storm recovery costs, these costs should be denied. This adjustment is reflected on
20 Exhibit HWS-2, Schedule F.

d. Vehicle & Fuel Costs

21

22 Q. WHAT IS FPUC REQUESTING FOR VEHICLE AND FUEL COSTS?

1	A.	FPUC's is requesting \$1,475,235 for fuel costs. None of these costs were charged to
2		plant or removal.
3	Q.	DO YOU HAVE ANY CONCERNS WITH THE LEVEL OF VEHICLE AND
4		FUEL COSTS BEING REQUESTED?
5	A.	No, I do not. After a review of these costs and the supporting detail provided, I have
6		not identified any issues that would require an adjustment to the Company's request
7		concerning vehicle and fuel costs.
8		e. Materials & Supplies
9	Q.	WHAT DID YOU DETERMINE FROM YOUR REVIEW OF THE COSTS FOR
10		MATERIALS AND SUPPLIES THAT WERE INCLUDED IN THE
11		COMPANY'S REQUEST FOR RECOVERY?
12	A.	FPUC's is requesting \$1,221,060 for materials and supplies, after capitalizing
13		\$3,592,133.
14	Q.	ARE THERE ANY CONCERNS WITH THE LEVEL OF MATERIALS AND
15		SUPPLIES BEING CHARGED TO FPUC'S REQUEST?
16	A.	I am not recommending any adjustment to FPUC's requested costs for materials and
17		supplies.
18		f. Capitalizable Costs
19	Q.	ARE YOU MAKING ANY RECOMMENDATIONS TO IMPROVE THE
20		METHOD OF ACCOUNTING FOR AND RECOVERING STORM COSTS?
21	A.	Yes, I am. FPUC does not appear to have a set policy or methodology for capitalization
72		of storm costs. In its response to Citizens' POD No. 1-1 in Docket No. 20180061-EL

FPUC stated no capitalization policy existed. Apparently, the Company still does not have a policy to properly capitalize costs for replacement of poles and wires. While I am <u>not</u> taking an issue with the capitalized costs in this docket, FPUC should memorialize the methodology it utilized so a consistent approach can be followed from one storm to the next. It should be noted that I am not necessarily agreeing with how FPUC determined its capitalization in this docket because the Company provided only a brief explanation as to the method it utilized. My acceptance is based on the averages that were reflected for replacement property. Absent some formalized process that can be tested, the results in a future storm event may not produce the same results.

VIII. RECOMMENDATIONS

A.

Q. ARE YOU MAKING ANY RECOMMENDATIONS TO IMPROVE THE PROCEDURE FOR SEEKING RECOVERY OF STORM COSTS?

Yes, I am. In addition to my previous recommendations regarding record keeping associated with mobilization/demobilization and standby time, I recommend the Commission mandate additional filing requirements when FPUC seeks to recover future storm restoration costs. FPUC incurred a significant amount of costs during the process of restoring service to customers after Hurricane Michael. When seeking cost recovery for storm restoration costs, the supporting cost documentation and testimony should be provided simultaneously with the petition seeking such recovery. This will significantly reduce the need for additional discovery by Commission staff and intervening parties, and will provide the requisite support for the recovery that is being requested from ratepayers. For example, in Massachusetts when a company seeks recovery for storm costs, it is required to include all supporting documentation at the

time the petition for cost recovery is filed. I believe this is a better model for Florida
to implement and will improve the overall process. Another important element for the
Commission to consider is to require a utility to submit documentation demonstrating
it has reviewed all contractor costs. While there were a number of issues with missing
or omitted information in this proceeding, documenting that the utility has reviewed its
contractor costs will provide, a higher level of assurance with respect to the reliability
of the costs and amounts being requested.

8 Q. BASED ON YOUR TESTIMONY, PLEASE SUMMARIZE YOUR 9 RECOMMENDED ADJUSTMENTS?

- 10 A. My recommended adjustments are as follows:
- A reduction of \$120,800 to FPUC's request for payroll cost recovery for prohibited bonus payments;
- A reduction of \$24,703 to FPUC's request for benefit/overhead cost recovery that included prohibited bonus payments;
- A reduction to contractor costs of for excessive hourly charge by <u>FPL</u>

 16 FPUC;
- A reduction of \$273,768 to FPUC's request related to excessive mobilization/demobilization costs associated with line contractor costs;
- A reduction of \$166,469 to FPUC's request for unsupported other contractor costs;
- A reduction of \$316,884 to FPUC's request for unsupported logistic costs;
- A reduction of \$885,855 to rate base and reduction of \$196,857 of associated amortization expense for the unsupported and prohibited recovery of lost revenues from expenses not recovered which is in fact a request for lost revenues;

- A reduction of \$454,000 to rate base and a reduction of \$100,890 of associated
 amortization expenses for unsupported and prohibited recovery of lost revenues due to
 lost customers;
- A reduction of \$18,798,487 to rate base for new plant and a reduction of \$696,680 of
 associated depreciation expenses because this is a storm cost recovery proceeding and
 not a base rate case proceeding; and
- A reduction of \$7,838,897 to rate base for retired plant/cost of removal and a reduction
 of \$825,147 of associated amortization expenses because this is a storm cost recovery
 proceeding and not a rate case.
- For the quantified amounts identified above, I recommend a total elimination of any rate base recovery as part of a single-issue rate case request and a total reduction of \$5,690,868 to FPUC's overall storm restoration costs. Further, I recommend that FPUC's request for application of WACC be denied and that the short-term cost of debt be applied to any storm costs determined to be reasonable and prudent.

15 Q. DOES THAT CONCLUDE YOUR TESTIMONY?

16 A. Yes, it does.

Contractor Summary

Test Plan: (A) Using the drop down list, select the vendor. (B) Ensure address agrees to invoice(s). (C) Enter the distance between vendor address to Plant City, FL. (D) Determine if vendor is part of the SEE (see tab A.1 for listing). (E) Determine if other agreements exist. (F) Using the drop down list, select the Incident Base that the vendor was initially assigned. (G) If the contractor includes multiple crews with different timelines, utilize the '+' symbol at the top of columns 'H' and 'K' (if necessary) to unhide the vendor summary. (H) Click the button to populate the second (and third, If necessary) set of tabs for documentation of those expenses. (I) Complete steps (A) through (F).
