Good Afternoon, Mr. Faust.

We will be placing your comments below in consumer correspondence in Docket No. 20200181, and forwarding them to the Office of Consumer Assistance and Outreach.

Thank you!

Toni Hover  
Commission Deputy Clerk I

Subject: Docket No. 20200181; Fix FEECA Now

Dear Clerk Florida PSC Clerk,

It's a pleasure to write today. I support energy efficiency and renewable energys. Underneath is a formatted message from the Southern Alliance for Clean Energy. I'm sure there are lots of emails like these, but I want you all to know there are people like me who truly want a better place for those around them. I want to see children grow up in a safe world, without the planet on the verge of collapse or wars on the brink.

You are in the position of power. Any one person has the power to change the world, in your seat or by protests or living their beliefs. It is not my goal to change your mind, I wish for a better future, I hope you do too. Remember this. We're all human, we only have one planet, it's all of our homes. Clean energy paves the way to protect out home. You are important and I wish to love folks the very same way our planet has loved us for countless years. Thank you. Here is the formatted letter. :]

Florida's largest utilities badly trail leading utilities in the Southeast and across the nation in delivering energy savings to customers. That's short-sighted because energy efficiency is the quickest, cheapest, and cleanest way to meet our energy needs and tackle climate change – but outdated practices in setting state energy efficiency goals are holding us back. Let's fix that through this rulemaking process.

As you consider changes to your goal setting rule, I ask that you reform the cost-effectiveness and screening practices that previously led many utilities to propose goals of zero to this Commission. I understand that Florida is the only state that relies primarily on these practices.

Energy efficiency programs have taken on new importance in light of the economic fallout from the COVID-19 crisis. Families should not have to make a choice between paying a power bill or buying essentials like food and medicine. Now is the time to remove the roadblocks to energy savings in order to provide more and better energy efficiency programs to customers.

It's time to use the new rulemaking to update your decades-old practices, and consider ways to get utilities to do more on efficiency, in particular for low-income customers. Please use this opportunity to get input from the public and experts in this field before rushing to revise the rule on conservation goal-setting.

Thank you for considering my comment. - 🙏

Sincerely,  
Arrow Faust
