Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Florida PSC Clerk,

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Now is not the time to change our solar policies that are helping to make our state a leader in clean solar power. Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Thank you.

Sincerely,
Bonnie Daniels
