**To:** Office of Commissioner Graham  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,  
Christine Gasco  
1615 Stonehaven Way

**Attachments:** NARUC Webinar Announcement - September 30, 2020 - zoomlink.pdf; ATT00001.txt

Dear Commissioners and staff of the Committees on Critical Infrastructure, Electricity, ERE and Gas:

Please find below and attached an invitation to participate in a webinar hosted by the North American Energy Standards Board (NAESB) on **Wednesday, Sept. 30<sup>th</sup>**. Please RSVP directly to NAESB.

Please note that this webinar is provided exclusively for NARUC and members of the NCEP, so please do not distribute the instructions for participation to those outside of these organizations.

Thank you,  
Jennifer

Jennifer M. Murphy  
Director of Energy Policy and Senior Counsel  
National Association of Regulatory Utility Commissioners  
1101 Vermont Avenue, NW, Suite 200, Washington, DC 20005

**NORTH AMERICAN ENERGY STANDARDS BOARD**

**NAESB 101: A PRIMER FOR THE NATIONAL ASSOCIATION OF REGULATORY UTILITY COMMISSIONERS**

NAESB is pleased to announce that it is hosting a webinar for interested Commissioners, commission staff, and members of the National Council on Electricity Policy (NCEP) to be held on Wednesday, September 30, 2020 from 2:00 pm to 3:00

pm Central. This webinar is designed to introduce attendees to NAESB and explain how our work supports the efforts of state regulatory commissions, the retail markets and the industry at large. Additionally, we will review the existing body of NAESB standards and review activities underway at NAESB that may be of interest to NARUC members.

As you may know, NAESB is an American National Standards Institute (ANSI) accredited, non-profit standards development organization formed with the support of the U.S. Department of Energy (DoE) for the purpose of developing voluntary standards and model business practices that promote more competitive and efficient natural gas and electric markets. NAESB and its predecessor organization, the Gas Industry Standards Board (GISB), have developed voluntary consensus based standards for over twenty-five years, and with few exceptions, all NAESB wholesale market standards have been adopted by the U.S. Federal Energy Regulatory Commission (FERC) and mandated as federal regulation for federally jurisdictional entities, and many of the NAESB retail market standards have served as a basis for regulation adopted by various U.S. state commissions. NAESB maintains a membership of roughly three hundred corporate members representing the wholesale gas, wholesale electric, retail gas and retail electric markets and has more than two-thousand participants that contribute to the standards development.

**FORMAT?**

The course is an interactive webcast presentation.

**WHEN?**

Wednesday, September 30, 2020 from 2:00 pm to 3:00 pm Central.

**WHO?**

This course is open to all Commissioners, state commission staff, and members of the NCEP. Those who are interested in learning about standards and how they support the market are urged to attend.

**HOW TO REGISTER?**

To register and receive instructions on how to participate in the webinar, please provide the information requested through the following hyperlink: [https://zoom.us/webinar/register/WN\\_EuBUJr4vTbS5rdMQ9Aducw](https://zoom.us/webinar/register/WN_EuBUJr4vTbS5rdMQ9Aducw)

For additional information or assistance in registering, please contact the NAESB office at (713) 356-0060 or [naesb@naesb.org](mailto:naesb@naesb.org).

Please note that this webinar is provided exclusively for NARUC and members of the NCEP, so please do not distribute the instructions for participation to those outside of your organization.

Dear Commissioner Art Graham,

Fossil fuel use is destroying the climate, which will eventually destroy civilization. That may sound like hyperbole, but it is not. We have the technology to get all of our power from other sources, but we keep using fossil fuels instead in spite of what we know and what we are experiencing. This is not theory, it is reality. We need to pursue renewable fuel sources now.

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. **Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,  
stephanie lewis

Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,  
A. Peterson

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Dear Commissioner Art Graham,

Florida's voters have always made their support for policies to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers. Crazy for the Sunshine State to not be a leader in getting clean energy from the sun. We should have solar panels on every building, especially starting with public ones and big box stores and malls.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools to keep their electricity with all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,
