Subject: Protect net metering

Dear Commissioner Donald Polmann,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Regards,
Heaven Campbell

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Donald Polmann,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,

Launch of 2020 Analysis at Bloomberg Green Virtual Festival

Email not displaying correctly?
[View it in your browser.](#)

Dear Donald,

This Monday, September 14th, America's Pledge will launch its fourth analysis at the **Bloomberg Green Virtual Festival**.

This year's analysis reveals the impact of the COVID-19 pandemic on our climate outlook, and provides a retrospective on US non-federal climate progress towards the Paris Agreement.

America's Pledge 2020 Launch Event

Monday, September 14 at 8:00 AM EST

Speakers:

Matt Damon

Actor and environmental activist

Mike Bloomberg

Founder, Bloomberg LP & Bloomberg Philanthropies; co-chair of America's Pledge

Jerry Brown

Former Governor of California and co-chair of America's Pledge

Patricia Espinosa

Executive Secretary of UN Climate Change

Gina Raimondo

Governor of Rhode Island

Eric Garcetti

Mayor of Los Angeles

Vi Lyles

Mayor of Charlotte

Melvin Carter

Mayor of St. Paul

Fawn Sharp

President of the National Congress of American Indians

& More!

America's Pledge 2020 In-Depth

Friday, September 18 at 2:00 PM EST

Learn more about this year's analysis in a conversation with the report authors.

REGISTER TO ATTEND

The **Bloomberg Green Virtual Festival** goes from September 14-18, 2020, and attendance is free with **registration**.

See you there,

Carla Frisch

Principal, Rocky Mountain Institute

Co-lead, America's Pledge

About America's Pledge

In July 2017, former New York City Mayor Michael R. Bloomberg and former California Governor Edmund G. Brown launched America's Pledge, an initiative to aggregate and quantify the actions by US states, cities, businesses, and other non-federal actors to drive down their greenhouse gas emissions consistent with the goals of the Paris Agreement. Since its launch, America's Pledge has published annual assessments of non-federal action to reduce greenhouse gas emissions based on a unique methodological approach developed by climate researchers and policy experts. Rocky Mountain Institute, University of Maryland, and World Resources Institute co-lead the technical team behind the America's Pledge analyses. To learn more about America's Pledge and download reports, visit **www.americaspledge.com**
