**To:** Office of Commissioner Graham  
**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Joseph Cavaieri  
Loxahatchee, FL 33470

**Sent:** Thursday, September 17, 2020 5:20 PM  
**To:** Office of Commissioner Graham  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Chairman Art Graham,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
Erin Handy  
940 17th Ave N Jacksonville Beach, FL 32250-4833

Dear Chairman Art Graham,

As a practicing engineering consultant who is informed on climate and economically beneficial ENERGY options, I urge and plead you to stand up for consumers and this still growing Florida solar industry.

The solar energy systems and industry in Florida is:

- long-term cost effective and,
- in the short term, continues to PRODUCE JOBS
- in a New Economy field,
- yet with installation work IMMUNE TO FOREIGN competition.

Retail-rate Net Metering stimulates that economic growth and environmental benefits. The remaining potential to be unleashed dwarfs the amount so far put in place here in our Sunshine State.

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. **Subject:** Protect our solar rights! Docket: 2020-0000

Dear Chairman Art Graham,

Stabilizing the grid is important. What better way than to have many homes contributing to the grid vs. being a demand on the grid? Net metering and TOU are important pieces in having a grid that can handle the demands of the 2020's and beyond. Simply look at what Australia has done in conjunction with Tesla to see how they have greatly reduced cost, stabilized the energy demands on the grid, and are now able to provide a reliable, more affordable product to their customers.

OH, and get rid of that gross receipts tax on the bill. I am not allowed to pass this tax on to others, neither should the utilities.

**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Luis Celaya

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

Florida does not provide any of the financial rebates and incentives that other states do, yet CONSUMERS, yes CONSUMERS, have dipped into their own pockets and opted to install rooftop solar. With the effects of climate change becoming increasingly evident, the PSC should be implementing policies that incentivizes rooftop solar and battery systems like Powerwall that increase energy independence and make consumers more resilient from blackouts in the aftermath of a hurricane. IMPLEMENTING POLICIES THAT HINDER ROOFTOP SOLAR HARMS CONSUMERS AND WILL COST LIVES.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

I know this is a small job compared to what is going on in our part of the country, But really SINCE 2018, Everyone passes the buck,even the regulatory state commissioners,was told by them did not handle these types of complaints I was told to call FCC , It doesnt take a chinese rocket scientist to fix the problem that was caused by Hurricane Michael, Just get in the bucket truck and cut the line.

After hours of on hold with ATT,Comcast, WOW, Media Com, FCC, PSC, I am reaching out to each one of you to see if one of you can get the job DONE.

I guess this is our system, no one wants to close the deal.

Since Oct 2018 a wire in front of my business property. Have contacted ATT, Comcast, WOW(knology),Media Com, which is all the carriers here. None will take responsibility, in removing this dangerous wire hanging 2 feet off the ground in front of my property. I need some help in getting this danger removed. All the carriers say it is the other company.

**From:** Debbie Bonnet <Debbie.Bonnet.55432623@p2a.co>  
**Sent:** Thursday, September 17, 2020 7:06 PM  
**To:** Office of Commissioner Graham  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,

**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Edward Dieringer

**To:** Office of Chairman Clark; Office of Commissioner Graham; Office of Commissioner Polmann; Office of Commissioner Fay; Office of Commissioner Brown  
**Subject:** {BULK} Net-Metering Works for Floridians  
**Importance:** Low

Dear Commissioners,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,

David Norton

**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Chairman Art Graham,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

As a business owner who has created a new multi-million dollar business in Florida, any signalling of policy revisions like these creates uncertainty and a lack of confidence that Florida is a good place to do business.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

**From:** Jim Jackson <Jim.Jackson.75037134@p2a.co>  
**Sent:** Thursday, September 17, 2020 6:08 PM  
**To:** Office of Commissioner Graham  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Art Graham,

Time and time again, Florida's voters have made their support for policies meant to encourage the spread of rooftop solar clear. In 2016 voters rejected the utility-driven "Amendment 1", which would have prohibited the subsidization of solar energy, and approved 'Amendment 4', which provided tax exemptions for rooftop solar customers.

Florida is in the middle of a public health and economic crisis. Undermining the rights of solar customers to receive full compensation for the power they produce will hurt jobs and take money out of people's pockets. Now is not the time to create more uncertainty by changing the fundamental economic landscape of the solar industry.

Before COVID-19, the Sunshine state produced the fourth most electricity from solar panels in the country, led the country in new solar jobs, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could threaten up to 125,000 of these jobs across the United States. Florida is struggling with an above 10% unemployment rate since May and the economic hardship could get worse if you end retail-rate net metering.

People and businesses across the state rely on commonsense solar policies to take control of their own energy. Solar benefits Floridians' safety too. Solar panels and batteries contribute to the resilience of the electric grid. As we progress through hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, homeowners, and our environment from additional uncertainty by preserving retail compensation for net metering here in Florida.

Thank you,  
Jim Jackson
