Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Florida PSC Commissioners,

I strongly, very very strongly, support solar energy initiatives in Florida. Rolling back net metering measures is wrong and NOT what we voted for several years ago on Amendment 1.

Let's figure a way to offer some supports to electric companies, if that is necessary, and then let's be a national leader in solar installations. We are the sunshine state.

Therese Hildebrand  
Interlachen Florida

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Therese Hildebrand
