Commission Clerk

Dear sir:

I can not understand why the PSC would allow the utilities to make a 12 billion dollar profit on a 40 billion dollar investment in underground services that would benefit 4% of the Florida population. Raising our bill over 20 a month by 2029 seems realistic, but the profit to do upgrades just does not seem right. Also the plan should have newer technology embedded in the plan.

We are a Duke Power customer.

Best Regards,
Charles Gaskill
