Good Morning, Christopher Walcutt

We will be placing your comments below in consumer correspondence in Docket No. 20200000-OT and forwarding your comments to the Office of Consumer Assistance and Outreach.

Sincerely,

Brian Schultz
Commission Deputy Clerk II
Florida Public Service Commission

Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

Let me start by saying I have worked in the energy sector for almost 20 years and have seen what utilities have done to prevent consumers in this state and others (Arizona, New Mexico, Texas) from having equitable access to solar power for their homes and businesses. In the industry, it's known as "DERS" or Distributed Energy Resources (insiders refer to it as Disruptive Energy Resources because it takes money from the utilities).

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,

Christopher Walcutt
