Subject: I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Florida PSC Commissioners,

I'm planning on getting solar panels and net metering is one of the things that will help us pay for it. Why should we go through a complex, wasteful, outdated, and destructive process to get power when we can generate it ourselves and use excess to help others. My house was under the eye wall of Sally and has no power. I'm an adjuster and I'm currently working Laura in Lake Charles. I need to get home to patch my roof, as well as my neighbor's, but we have no power and I have to get these people who lost everything in Laura their estimates. Having solar would cure that problem and net metering would help pay for it. This is a national issue, as well as a state issue. We should be working to make sure every house in FL has solar. It's Florida. There's more sun than coal and gas.

Sincerely,  
Hunter Arden  
Pensacola, FL 32507
