Subject: Protect our solar rights! Docket: 2020-0000

Dear Florida Public Service Commission,

I installed a rooftop solar system on my house in the summer of 2019 after I rebuilt the roof from Hurricane Michael destruction.

I witnessed Florida workers installing it. Every month I see my electric bill benefit from the net metering credit.

I counted on net metering to justify the upfront expense of installation.

Rooftop solar is reducing the peak demand on the hottest but also sunniest days. Reducing the grid's peak coverage is actually one of the best ways to reduce costs. Perhaps Gulf Power and the PSC should be compensating me at the kWh cost of covering those spikes or peak demands on hot sunny days in July and August.

Y'all should not definitely not pull the rug out on me by reducing net metering and delaying the return on investment for my rooftop solar.

Thank you for your consideration.

Sincerely,
Alvin Peters
