Dear Florida PSC PSC,

We are in the middle of a pandemic with unemployment rampant in our state. Right now, Floridians need help making ends meet paying day-to-day expenses, including rising healthcare costs and prescription drug prices, as well as increasing rents and food costs.

What Floridians do not need now is to pay for services that benefits no more than 5 percent of ratepayers.

I am protesting the current proposed rate increase under Docket #20200092-E1. I am a Florida resident and customer of Florida Power and Light.

I am on a fixed income and it certainly doesn't increase enough each year to cover a higher bill, like the one proposed. Why is this being allowed? Only a few customers would benefit; however, the investors will be happy. I am not an investor because I cannot afford to purchase stocks, again, as I am on a fixed income.

Do NOT rubber stamp this plan. There is no strategy for decentralizing the electric system and no plans to provide more research into such sources as solar energy.

These proposals do not even comply with your own rules 25-6-030.
Another scam to make the rich richer, I guess. STOP IT!

Sincerely,

Ms. Marilyn Hollis
