Dear Commissioner Gary F. Clark,

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,  
D H  
Fort Pierce, FL 34945

**Sent:** Wednesday, September 23, 2020 12:55 PM  
**To:** Office of Chairman Clark  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Gary F. Clark,

I would like to voice my opposition to any changes to the current net metering policy in place in Florida. I have invested in a rooftop solar array to power my home under the premise that I will be reimbursed for the electricity I send back to the grid at a set rate. As you are likely aware, this initial investment is expensive and any change to the net metering policy that eliminates or reduces the return on that investment would be financially devastating. I urge you to consider this issue with fairness in mind. Please do not allow the utility companies to pull the rug out from under us.

Thank you for your thoughtful consideration.

Sincerely,  
STEVEN GREEN

As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

My husband and I attended a meeting about a solar cooperative in our county. The only reason I wasn't interested in joining is that I learned that, if we had solar panels, we could not use that power our panels generated and a storage battery to maintain electricity during an outage.

But I believe strongly in solar -- in getting off of nonrenewable forms of energy.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Dear Commissioner Gary F. Clark,

Dear Commissioners.

I have supported renewable energy since I was 16 years old and now I am 46, that is, for 40 years. About 3 years ago we put up panels at home, to our surprise not only did the cost of electricity increase, but we also increased property taxes. If that is an incentive? We are doomed. The program in my opinion is a scam and I would not recommend it to anyone. I call the company and they tell me it is the fault of FPL I call FPL and they tell me it is the fault of the company. It's a mafia

As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

What I do want to see is better regulations as I was taken by the Solar Seller and now can not get service on a product that I purchased on a 20 year loan on. These solar programs are great and all but please regulate this industry so people like me do not get cheated. I was lied to about the type of inverters they were installing and about the size of the system and the only option I have which is tough to do in this Covid situation is to sue the company.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

**Subject:** I support Solar Choice in the Sunshine State - Docket: 2020-0000

Dear Commissioner Gary Clark,

As we struggle with a global pandemic, an economic crisis, and an active hurricane season, it is not the time to create more uncertainty by signaling a change in solar policies that are helping to make our state a leader in clean solar power and providing good paying local jobs.

At the start of 2020, Florida was ranked 4th in the nation for solar energy production, employing thousands of people and powering the Sunshine State with clean, affordable, homegrown energy. The economic downturn has already put many of these jobs and future solar development at risk - we don't need sudden regulatory changes in solar policies to create even more uncertainty here in Florida.

Our current net metering rule allows a number of Floridians to grow a segment of the solar market by choosing to power their homes and businesses with Florida's number one natural resource, sunshine. Florida citizens and customers overwhelmingly support the current successful net metering policy allowing compensation for the solar energy they generate and provide to the electricity grid.

Please protect the opportunity for business and homeowners to generate clean solar power and support local jobs by preserving our successful net metering rules here in Florida.

Sincerely,  
Shawn Shimko  
Saint Petersburg, FL 33707

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,  
Agnes Johnson  
5012 17th Ave S Gulfport, FL 33707-4330

Dear Commissioner Gary F. Clark,

Amid a public health and economic crisis, it's clear that Florida's electric utilities should be doing a whole lot more to promote rooftop solar - a known job creator that keeps money in families' pockets.

Before COVID-19, "solar installer" was the fastest growing job in the country, and the solar industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. In the Sunshine state, before this crisis began, the solar industry employed over 12,000 Floridians. Now, over 1 million Floridians are unemployed, and Florida has already lost 22% of its workforce.

People and businesses across the state rely on common sense solar policies to take control of their own energy, save money, and choose how they power their lives.

Not only does solar create jobs and save us money, but when paired with batteries, solar panels can contribute to the resilience of the electric grid and provide back-up power in emergencies. As we face another intense hurricane season, Floridians need more tools – not fewer – in order to weather all the storms that are coming our way.

Thank you for defending solar workers, business owners, and residents by protecting our bedrock solar policies here in Florida.

Sincerely,

**From:** koenig.matt@everyactioncustom.com on behalf of Matt Koenig  
<koenig.matt@everyactioncustom.com>  
**Sent:** Wednesday, September 23, 2020 11:00 AM  
**To:** Office of Chairman Clark  
**Subject:** Protect our solar rights! Docket: 2020-0000

Dear Commissioner Gary F. Clark,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools – not less – in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,  
Matt Koenig  
1106 87th St NW Bradenton, FL 34209-9647
