Subject: {BULK} Net-Metering Works for Floridians
Importance: Low

Dear Commissioners,

The middle of a public health and economic crisis is not the time to create more uncertainty by making changes to solar rights that will hurt jobs and take money out of people's pockets.

Before COVID-19, the Sunshine state produced the 4th most electricity from solar panels in the country, and employed over 12,000 people. Before this crisis began, "solar installer" was the fastest growing job in the country, and our industry employed 250,000 people. The COVID-19 crisis could put half, 125,000, of these jobs at risk in communities across the United States. Florida has already lost 22% of its workforce due to economic uncertainty, and this could get worse.

People and businesses across the state rely on common sense solar policies to take control of their own energy, and choose how they power their lives.

Solar panels and batteries contribute to the resilience of the electric grid. As we enter hurricane season, Floridians need more tools "not less" in order to weather all the storms that are coming our way.

Please defend solar workers, business owners, and homeowners from additional uncertainty by preserving net metering here in Florida.

Sincerely,

Jason Dalton

Subject: Protect our solar rights! Docket: 2020-0000

Dear Commissioner Gary F. Clark,

11/5/20

IS THIS FAKE NEWS?

SunPower salesman has this on the end of his emails:

"SOLAR IS BEING THREATENED BY THE POWER COMPANIES. FOLLOW THE LINK BELOW TO SIGN A PETITION TO SAVE NET METERING & SOLAR IN FLORIDA

LINK TO PETITION <https://www.savesolar.org/fl-psc/>"

When I go there I get this message:

"Tell the Florida Public Service Commission to preserve solar net metering

A utility front group is trying to repeal our solar rights, putting jobs, energy security and our solar freedoms at risk."

Is any of this true? Is net metering under threat?

thanks, sam@isiusa.com
