Re: Docket No. 20200209-EI

Dear Mr. Teitzman:

On October 30, 2020, Staff requested additional information from Florida Power & Light Company ("FPL") regarding the SolarNow program. FPL's answers are provided herein. In addition, FPL is providing a revised tariff sheet that the Company would propose to submit to Staff for administrative approval at the end of 2021, to be effective January 1, 2022.

Please contact me if there are any questions regarding this transmittal.

Sincerely,

s/ Maria Jose Moncada

1. Based on the program's economic model, the present value of the estimated system benefits associated with the SolarNow assets between 2026 and 2045 is \$1.75 million.
2. In the event that revenue requirements exceed SolarNow participant contributions during the period 2021-2025, FPL will record the difference to below-the-line expense in order to not impact the general body of customers. However, as reflected on Attachment No. 1 in FPL's response to Staff's First Data Request No. 3, the general body of customers have received the benefit of excess SolarNow participant contributions totaling an expected \$2.4 million for the period 2015 through 2020. FPL proposes to reduce any excess revenue requirements for the period of 2021 through 2025 by the \$2.4 million before recording any expense below-the-line. See illustrative example below using actual and forecasted information provided in FPL's response to Staff's First Data Request No. 3.

Illustrative Example

	Participant Contribution	Revenue Requirement	System Savings	Net Impact to All Customers Benefit/(Cost)	Balance of Excess Participant Contributions	Amount to Record Below the Line ⁽³⁾

(1) As reflected on Attachment No. 1 to FPL's response to Staff's 1st Data Request No. 3.

(2) As reflected on Attachment No. 2 to FPL's response to Staff's 1st Data Request No. 3.

(3) FPL proposes to reduce any excess revenue requirements for the period of 2021 through 2025 by the excess participant contributions before recording any expense below-the-line.
