Dear Commissioner Art Graham,

Rate increases will only further the negative impact on the economy. Therefore Walmart won't be able to sell its crap because no one can afford to buy anything. They can repay themselves through savings, just like regular folk. Enough with the corporate welfare mentality.

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Sincerely,

Jane Davis

Dear Commissioner Art Graham,

P.S. Please Duke Energy, find a better way to save money that doesn't include making customers pay for your costs (or is damaging to the environment for that matter).

I'm a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Vulnerable communities already have a difficult enough time paying their current utility bills without an additional rate increase that will subsidize big corporations instead of providing all ratepayers the benefits of clean energy.

Please deny Duke Energy's request to approve their Clean Energy Connection program. If all customers, like me, are paying for solar then we deserve to also enjoy all the cost savings of that solar, and not just big corporations.

Dear Commissioner Art Graham,

Please do not allow Duke to raise customers rates as a result of large institutional customers electing to install localized solar options on their facilities. Reducing demand on the grid is a positive thing, resulting in reduced capacity needs across the full grid, saving ratepayers additional expense. There is no need, nor is it appropriate, to raise rates for all ratepayers as a direct result of loss energy use by these larger customers. We should be incentivizing solar installations at the utility and distributed levels, resulting in long term cost reductions to society, not protecting an artificial profit level for investor owned utilities. Approving the FPL program was wrong. Approving the Duke program is also the incorrect action if you are looking out for the state of Florida and it's citizen's economic interests.

I?m a Duke Energy customer and a member of the Sierra Club.

I support solar, however, I do not support it being used as a ruse to require all customers to pay big corporations, like Walmart, millions of dollars when those corporations are perfectly capable of paying for those costs themselves. Dear Commissioner Art Graham,

At the moment times are tight for everyone, and I don't want my bills to increase as a benefit to Duke Energy or any large corporations. Please do not approve this plan.

Thank you,
Sandi Engiles
