As I wrote to Duke Energy, we are tired of constant increases. As retirees ages 75 & 80 we don't have the option of overtime or new jobs. We have, in the past, cut back on our electric consumption especially air conditioning and the clothes dryer. Drying racks have taken over our second bedroom. Perhaps executives should contact their own parents and grandparents to learn how the increases have affected their way of life. It may be an eye-opener.

What is the justification for this increase ? Duke is not moving fast enough into renewable energy. Why so slow ? Close the staton coal plant in Orlando and covert to nat gas. Provide incentives for solar and wind.
