I'm a resident of sarasota zip code 34233.

FPL has failed it's promise for clean affordable energy. Their ads have been lying to floridians for too long. We the people have made our voice clear that we want clean affordable energy. FPL wants to continue to destroy our planet by building more dirty plants. Even worst. They want hard working families to pay for it.

I am a born and raised Floridian and I want to protect our already damaged planet. That's why FPL should not get approval to build these dirty plants at the expense of our planet and our families.
