**Subject:** Energy efficiency

Dear Ashley,

I don't know what FP & L's current goals are for improving energy efficiency but you might be interested in this report

Several studies show that improving energy efficiency is a key tool for decarbonization. The International Energy Agency's [global roadmap](#) to reach net-zero emissions by 2050, for instance, calls for efficiency improvements averaging 4% per year through 2030, about 3 times the average over the last 2 decades.

**To:** Office of Commissioner Fay  
**Subject:** We Can't Afford Higher Rates from FPL

Commissioner Andrew Fay,

I am a Florida resident and customer of Florida Power & Light (FPL) and I am sick and tired of the outrageous, unjust rate increases. I received notification that FPL intends to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to find work.

I urge you to reconsider this rate increase.

**Subject:** We Can't Afford Higher Rates from FPL

Commissioner Andrew Fay,

I am writing as a concerned Florida resident and customer of Florida Power & Light (FPL). I received notification that FPL intends to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

The use of our land for solar panels is not helping our atmosphere. The bounce off of the panels causes 85% of the energy to be rereleased into our atmosphere and warming the atmosphere unnecessarily. While a noble idea it is destroying land and air. Perhaps there is a better and cheaper idea.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to find work.

I urge you to reconsider this rate increase.
