Subject: Re:Docket#20200226-SU

Dear Commissioner:

We would like to strongly oppose EUs application to install sewer system on Palm Island. We are not aware of any need for such service and feel the applicant ill equipped for this project. Our system is one year old and working fine as others that we know. We are participants in a share the barge program that allows easy pump out when necessary. There is no indication of water quality issues in our waters.

We appreciate your diligence and consideration in this matter and happily acknowledge your staffs recommendation to deny.

Sincerely, Wayne and Cassie Ator
390 North Gulf Blvd.

As owners of a home at 380 Kettle Harbor Drive on Palm Island we were pleased but not surprised to see that the PSC staff has recommended that the Commission deny the application for a wastewater certificate in the subject docket. The Commission should be commended for the thorough investigating process which has clearly shown that there is no public need nor demand for a mandatory sewer system on the island and given that the Commissions primary responsibility is to represent the public interest this application should clearly be denied.
