Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Mike La Rosa,

I urge you to do the right thing and protect Florida residents. I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Mr Jeff Kamp

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. I have lived at my current residence for 4 years. Our thermostat stays at a consistent setting during the summer (77 degrees) and the winter (66 degrees). We also have blackout curtains in every room. During that time, our energy usage habits has stayed consistent, as evidenced by doing a comparison of our billing statements from year to year. Since FPL has replaced Gulf Power, our bill has steadily risen.

Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Mrs. Kate Traylor

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Mike La Rosa,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months, resiliency during storms, strong net metering policies allowing residents of all incomes have rooftop solar and true community solar where individuals own and reap the financial benefits of those projects like many other states do, like for example Minnesota and not only utility scale solar.

The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. I can't even take my newborn on a walk without an umbrella and a fan, because it's already so warm. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. They have also increased the minimum bill. Where does the greed end? Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable. People are already struggling to pay bills with the inflation and the pandemic, energy bills have already increase in fuel price and the minimum bill was increased by 300% How much is enough to pay on our electric bills?

Sincerely,

Sincerely,

Ms. Laura Tellez

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear commissioner Mike La Rosa,

THE GOALS OF THE PSC AND CUSTOMERS SHOULD ALWAYS BE ALIGNED WITH THE HIGHEST PRIORITY FOR THE GRID TO DELIVER ALL ELECTRICITY NEEDED IN THE MOST EFFICIENT AND LEAST EXPENSIVE FINAL COST TO THE CONSUMER.

PEOPLE WHO HAVE ROOFTOP SOLAR OR ARE PLANNING THAT INVESTMENT SHOULD ALWAYS BE VIEWED BY THE PSC AS ALLIES NOT ENEMIES TO THE UTILITY COMPANIES. EARLY ADOPTERS OF RENEWABLE ENERGY HAVE AIDED UTILITY COMPANIES BY PROVIDING ELECTRICITY TO THE GRID AT PEAK TIMES WHICH REDUCES THE NUMBER OF PEAK HOUR LOADS AND THEREBY DECREASES ALL CUSTOMER BILLS.

FPL'S 10 YEAR SITE PLAN FAILS TO MEET THESE GOALS. RENEWABLE ENERGY IS REDUCING AND WILL REPLACE FOSSIL FUEL GENERATION OF ELECTRICITY. THE PSC SHOULD ALWAYS BE MOVING TOWARD THIS FUTURE RATHER THAN BEING ENTRENCHED IN THE PAST WAYS OF OPERATION.

YOU MUST REJECT FPL'S PROPOSED 10 YEAR SITE PLAN BECAUSE IT IS NOT ORIENTED TOWARDS THIS INEVITABLE FUTURE.

Sincerely,

Mr. Jeffrey L. Hill

From the PSC past history with issues like their ill conceived response to rooftop solar, the commission has the optics of being, and should be called, the CSC or Corporate Service Commission. Anyone who looks at our current power management system should realize that distributing generation rather than centralizing it requires less high loss transmission systems, increases resilience against disasters, decreases critical maintenance issues, and lowers the cost of building generation capabilities by taking advantage of investment by individual system owners. Looking at all the intense development of new storage prospects should lead one to realize that future distributed systems will provide instant peaking capacity without utilizing gas generating facilities. While this will not happen overnight, it is where the world is heading and Florida should as well.

Sincerely,
RJH
