Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase before even being relevant to meet our state's energy needs. I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than what we actually need. They are already raising our bills higher than I've seen in my time as a Florida resident. Stand with us: reject FPL's proposed site plan and urge them to invest in efficiency programs that save money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,

Mrs. Andrea Rymer

Subject: Ten Year Site Plan comments to be filed in Docket No. 20220000

Dear Commissioners:

We can't take any more higher bills here in North FL. Under FPL we already are in the top three of highest rates in the state among all investor owned and public utilities.

I ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up.

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. That motivates FPL to build more than is needed. They are already raising our bills higher than I've seen in my time as a Florida resident. We need you to require FPL to invest in efficiency programs that save us money, save energy, and help us meet our needs when the weather is most unbearable.

Sincerely,

Christian Wagley

Dear Gabriella Passidomo,

I am writing to ask you to find Florida Power and Light's (FPL) preferred 10-year site plan to be unsuitable. The winter weather forecast is extremely unlikely to occur, and there is no sound evidence to back it up. FPL's projections are going to make my bills increase even more. I cannot afford my bills now! I want to see more programs that help customers with the real weather risks we are facing, like extreme heat during the summer months. Do away with the over 1000 kWh structure and the accelerated meters that are inaccurate and charging more. Save our households!!!

I know that FPL can pass the full cost of their projects, plus more profit for new infrastructure, onto customers. However, we are already struggling customers. They are already raising our bills higher than I've ever seen as a Florida resident. I have never had to sacrifice like this for electricity. In the time that I have lived in Pensacola, I have never used as many kWh per day or have had to go without heat or lights. I've never had to worry and check my account several times a day. You need to get FP&L out of the lowest paying area in Florida. Stand with us: reject FPL's proposed site plan and urge them to stop hurting NWFL and help us meet our needs when the weather is most unbearable.

Sincerely,

Sincerely,
Ms. Kim Johnson

Subject: Ten Year Site Plan Comments to be Filed in Docket No. 20220000

Dear Gabriella Passidomo,

I am writing to object to FPL's proposed / 10-year site plan and to request that you reject it as unsatisfactory too.

I am not surprised that a company beholden to investors would try to maximize its profits. However, I am surprised that time and time again the PSC continues to approve utility projections that are not in the best interest of the public that the PSC is supposed to serve.

Many people now understand that FPL can build its corporate wealth by increasing the amount of infrastructure that is installed and operated, even if that infrastructure is not needed, as in this case. There is no robust analysis or evidence to back up the notion of the extreme winter weather forecast upon which some of these new infrastructure need projections are based.

What is probable and real, however, is that Florida will continue to experience and have an increasing need for cooling during hot days. Yet the PSC continues to not require our largest utility to engage in meaningful energy efficiency programs that could significantly benefit residents and help them LOWER bills and save energy. Why is that?

The PSC just approved FPL to increase rates in its state territory, with a very large jump I believe of almost 20 percent! On top of that, the PSC also recently approved FPL's request for a minimum monthly account fee charge. How is it that the PSC keeps approving all of these new fees and fee increases? The governor recently rejected FPL's proposal to do away with net metering, citing inflation, so I think the same rationale can be applied here, in addition to the fact that the infrastructure is not needed.

The word "PUBLIC" is in the title of the agency you represent, the Florida Public Service Commission.

I do agree, sometimes the public is best served by approving proposals from utilities if they are comprehensively well-analyzed, rational, and vetted by experts who are advocating on behalf for the Florida Public.

But that is not the case here, the public is not benefitting. Please serve YOUR PUBLIC and reject FPL's site plan. I would also urge you to have the courage to begin the necessary steps to re-establish energy efficiency programs to benefit the Florida PUBLIC.

Sincerely,
Mr. J Rici
