Subject: FPL Double Billing for Base Charge

How has your service to the consumer better serve the consumer when you have allowed Florida Power & Light to "double bill" the "base" charge when a consumer has used less electricity to save? This would normally be a "fraudulent" practice if it was not ok'd by your department. You have already placed the burden of corporate profits for the benefit of shareholders instead of consumers with the over one thousand kilowatt surcharge to fund their (FPL) pursuit of electric vehicles and solar panels on the consumer instead of the shareholders. How does the PSC justify its mission statement with these outrageous practices that clearly benefit FPL over the customer? This board should resign and a new one that is responsive to the citizenry should be elected/appointed. If you honestly believe in the mission, review/ reverse your previous actions and become pro consumer again instead of beholden to the "Corporations".

Not respectfully,

Mr Jordi

A Consumer of Florida Electricity
Panama City, Fl 32401
