Comments:

When FP and L took over providing electricity in NW Florida, they knew about the base charge to customers including those with solar power. After taking over supplying power to customers, they have added an extra base charge now to raise their price to customers who have purchased solar panels. We bought our solar panels to save money on price increases and to help the strain on the power grid. FP and Light knew what they were going into, they should not be allowed to charge solar panel installed customers more money by making up their own reasons for not covering their

own expenses. Please at least grant “grandfathered” status to those with solar panels or in process of installation of solar panels before the date that FP and L took over the electrical distribution. Thank you in advance for your consideration.
