Chairman Gary Clark,

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to rethink this decision and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these outrageous rate increases at this time.

Chairman Gary Clark,

The message below is one from Opportunity for all Floridians and I agree with it. I would encourage you to a) remove the \$30 minimum from our bills, allow the Utilities to label a fee for Grid Support/Connection that applies to all, not just the people with low bills. c) I would suggest you think about how the profits of the Utility companies has changed in the past few years and to think about windfalls they've been allowed to benefit from.

Chairman Gary Clark,

Docket No. 20220001-EI

I am an electricity customer in Florida. I received notification that you will soon be considering proposals from FPL, Duke and Tampa Electric to increase my electricity rates next year.

This is outrageous. These companies have made windfall profits over the last few years, and yet each time they go crying to you, you have approved their rate increases. No amount is too high, apparently. When will you stand up for your own mission of setting fair rates for consumers in Florida?

Another electricity rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything.

I urge you to reject these rate increases.

Docket No. 20220001-EI

I am writing as a concerned Florida resident and a electricity customer. I received notification that FPL, Duke and Tampa Electric intend to increase rates for customers like me. I am urging you to reject these proposals and not increase our bills.

This past year has been extremely challenging financially for many people in the state of Florida. A rate increase is the last thing we need, especially for vulnerable folks who may be on a fixed income or struggling to recover financially from the pandemic. We are all inundated with price increases on everything. This price rate could have been avoided by improving energy efficiency for customers and investing more in renewable energy. Had this been done, several energy plants that were built would not have been necessary, and we would not have such a high reliance on the volatile prices of fossil fuels. Our utilities ignored the pleas of customers and experts and double downed on methane and other fossil fuels as sources of energy. It is not fair that their gamble that polluted our air and waterways should be paid for by ratepayers who are already paying for these terrible decisions with their health. They should not have to pay even more with their monthly bills skyrocketing again.

I urge you to reject these rate increases at this time.

How many rate increases are you going to approve? When is enough enough? When will you stand up for your own mission of setting fair rates?
