To whom it may concern,

We are homeowners and full time residents of 8160 and 8162 Little Gasparilla Island.

We are in opposition of docket # 20240032-SU. A few of the concerns we have are as follows:

- There has been no study showing the need for a low pressure sewer system or evidence of environmental damage allegedly caused by the current septic tanks and/or leach beds.
- In the case of extended power outages, example being Hurricane Ian, we were without power for twelve days. How will the proposed system move waste without power?
- Forced hook up fees are estimated to start at \$12,000 with additional monthly surcharge fees (similar to our current water bills.) There is no maximum charge limitation.
- What will the impact be to the protected wildlife, vegetation and private properties by the equipment necessary to install said system? Will construction halt for the various nesting seasons of protected wildlife?
- We believe the sewer and water systems should be under Charlotte County Governmental service umbrella.

Please do the will of your constituents by denying this request made under docket #20240032-SU.

Sincerely,

Daveann Ceridon
Carol Rowe
