COMMISSION  
CLERK

**RE: Docket No. 20240032-SU Application of cert wastewater by Environmental Utilities LLC**

Clerk,

As a long time property owner on Little Gasparilla Island and current user of a great septic system, I completely OPPOSED this application by Environmental Utilities to force the use of a sewer system on LGI. We do not want it and we do not want the Commission to award a certificate that will force us to use this system.

**PARTICULAR GROUNDS FOR OBJECTION:**

1. The earth impact from a large scale treatment facility is far greater and has more operational risks than small home septic systems
2. The sandy soil on LGI is great filtration system for drain fields
3. The closest aquifer to LGI is in Tampa, 100 miles north
4. There have been NO water quality issues in the back bay system other than redtide.  
Check your own quality monitoring reports.  
No water quality warnings have ever been issued for the areas surrounding LGI.

We ask the Commission to DENY this request.

Please email me at [cvw@coredevelopmentsolutions.com](mailto:cvw@coredevelopmentsolutions.com) any updates to this application process.

Thanks So Much,

Carolyn
