- B. Public services rendered.
- C. Major goals and objectives.
- D. Major operating divisions and functions.
- E. Current and projected growth patterns.

A. Commercial Utilites was organized on April I, 1974 and received Public Service Commission Certificate 164-S on June 4, 1975. Prior to the existance of Commerical Utilites and PCS certificaion. water and wastewater treatment was available to land tenants of Grace & Company. Inc. from existing company owned water and wastewater treatment plants. Our utility growth has been detennined by normal growth and by a moratorium placed by the City of Jacksonville. FL on the construction of new wastewater treatment facilities. On Januray 18, 1991 Commercial Utilites began purchasing water from the City of Jacksonville, FL but continued to distribute the water through existing lines. On August 8, 1992 all the wastewater collecting lines were connected to the Atlee Street wastewater pump station belonging to the City of Jacksonville, FL; however responsibility of the lines and collection of wastewater remains with Commercial Utilites. By order No. PSC-97-94-.FOF-WU, the commission acknowledged to the exempt status of the water division and cancelled Certificate No. 219-W on Januay 27, 1997.

B. Wastewater

C. To provide quality wastewater service to the customers within our service area.

D. Commercial Utilites has two persons on premise to take care of line breaks. replaceng of valves. etc. Major work is contracted out. Billings and contract funtions are performed by two persons.

E. Currently our growth is somewhat static; however. future growth has been permitted. The City of Jacksonville has extended their lines into propety that we were let to believe was our certified territory.

F. Commercial Utilites proposes to reroute some collecion lines to accommodate some land use changes

G. Commercial Utilities is in the process of connecting sewer lines to 2 restaurants (Church's and Krystals). In 2016 Commercial Utilities is in the process of obtaining the estimated costs for the Contributions in Aid of Construction to be funded by the restaurants. Management does not know if Construction is expected to start.

CALCULATION OF THE WASTEWATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one wastewater equivalent residential connection (ERC).

Use one of the following methods:

(a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.

(b) If no historical flow data are available, use:

$$ERC = (\text{Total SFR gallons treated (Omit 000)} / 365 \text{ days} / 280 \text{ gallons per day})$$

For wastewater only utilities:

Subtract all general use and other non residential customer gallons from the total gallons treated.

Divide the remainder (SFR customers) by 365 days to reveal single family residence customer gallons per day.

NOTE: Total gallons treated includes both treated and purchased treatment.

ERC Calculation:

The total number of customers (42) or total volume of fluid passing through the wastewater collection system has not changed significantly from prior years' annual reports.
