Submitted To The

# STATE OF FLORIDA

FOR THE

### YEAR ENDED DECEMBER 31, 2011

Form PSC/ECR 003-W (Rev. 12/99)

### GENERAL INSTRUCTIONS

- 1. Prepare this report in conformity with the 1996 National Association of Regulatory Utility Commissioners Uniform System of Accounts for Water and/or Wastewater Utilities (USOA).
- Interpret all accounting words and phrases in accordance with the USOA.
- 3. Complete each question fully and accurately, even if it has been answered in a previous annual report. Enter the word "None" where it truly and completely states the fact.
- 4. For any question, section, or page which is not applicable to the respondent, enter the words "Not Applicable." Do not omit any pages.
- 5. Where dates are called for, the month and day should be stated as well as the year.
- 6. All schedules requiring dollar entries should be rounded to the nearest dollar unless otherwise specifically indicated.
- 7. Complete this report by means which result in a permanent record, such as by computer or typewriter.
- 8. If there is not enough room on any schedule, an additional page or pages may be added, provided the format of the added schedule matches the format of the schedule with not enough room. Such a schedule should reference the appropriate schedules, state the name of the utility, and state the year of the report.
- 9. If it is necessary or desirable to insert additional statements for the purpose of further explanation of schedules, such statement should be made at the bottom of the page or an additional page inserted. Any additional pages should state the name of the utility, the year of the report, and reference the appropriate schedule.
- For water and wastewater utilities with more than one rate group and/or system, water and wastewater pages should be completed for each rate group and/or system group. These pages should be grouped together and tabbed by rate group and/or system.
- 11. All other water and wastewater operations not regulated by the Commission and other regulated industries should be reported as "Other than Reporting Systems."
- 12. Financial information for multiple systems charging rates which are covered under the same tariff should be reported as one system. However, the engineering data must be reported by individual system.
- 13. For water and wastewater utilities with more than one system, one (1) copy of workpapers showing the consolidation of systems for the operating sections, should be filed with the annual report.
- 14. The report should be filled out in quadruplicate and the original and two copies returned by March 31, of the year following the date of the report. The report should be returned to:

Florida Public Service Commission Division of Economic Regulation 2540 Shumard Oak Boulevard Tallahassee, Florida 32399-0850

The fourth copy should be retained by the utility.

- C. Major goals and objectives.
- D. Major operating divisions and functions.
- E. Current and projected growth patterns.
- F. Major transactions having a material effect on operations.

St. George Island Utility Company, Ltd. was certificated on March 31, 1978 to provide water service to St. George Island, which is a barrier island located in the Gulf of Mexico in Franklin County, Florida. The Company has 4 wells on the mainland, and water is piped to the island through a 12" supply main attached to the bride to the island. The Company has a treatment system, a ground storage tank and an elevated storage tank on the island. Although the Company is not required to provide fire protection, the Company does provide limited fire protection through 140 hydrants on the island.

The island population fluctuates widely because it a vacation/resort area. Accordingly, there are peak demands during summer and other holiday periods, with lower demand the remainder of the year. The utility has sufficient capacity to meet all current demands. Construction of the system commenced in 1974, and many components of the system are near the end of their useful lives. Accordingly, the Company has designed and is planning to construct substantial improvements to the plant to prevent a deterioration of its reliability. These include a new 600,000 gallon ground storage tank, new pumping and control facilities, new electrical facilities, new chlorination facilities, a partial new supply main and a new fifth well. These improvements are being made so that the utility can meet its primary goal and objective, which is to provide safe and reliable water service to its customers on St. George Island.

The utility has an administration and accounting office in Tallahassee, Florida, as well as an opeations office on St. George Island. The Tallahassee office has four full-time employees who handle all administrative, legal and accounting functions. The St. George Island office also has four full time employees, including two certified operators and two field technicians, who are responsible for the day to day operations of the utility.

The utility has been losing substantial sums of money during the past several years due to a general downturn in the economy and a proliferation of shallow wells on St. George Island, and has experienced an increase in operating costs. To overcome this problem, the utility filed an application with the Florida Public Service Commission on November 7, 2011 (Docket No. 110200-WU), which has an official filing date of February 17, 2012. That case is proceeding under the Commission's PAA process.

#### **RECONCILIATION OF REPORTED NET INCOME WITH TAXABLE INCOME FOR FEDERAL INCOME TAXES (UTILITY OPERATIONS)**

- The reconciliation should include the same detail as furnished on Schedule M-1 of the federal tax return for the year. The reconciliation shall be submitted even though there is no taxable income for the year. Descriptions should clearly indicate the nature of each reconciling amount and show the computations of all tax accruals.
- 2. If the utility is a member of a group which files a consolidated federal tax return, reconcile reported net income with taxable net income as if a separate return were to be filed, indicating intercompany amounts to be eliminated in such consolidated return. State names of group members, tax assigned to each group member, and basis of allocation, assignments or sharing of the consolidated tax among the group members.

#### WATER LISTING OF SYSTEM GROUPS

List below the name of each reporting system and its certificate number. Those systems which have been consolidated under the same tariff should be assigned a group number. Each individual system which has not been consolidated should be assigned its own group number.

The water financial schedules (W-2 through W-10) should be filed for the group in total.

The water engineering schedules (W-11 through W-14) must be filed for each system in the group. All of the following water pages (W-2 through W-14) should be completed for each group and arranged by group number.

#### CALCULATION OF THE WATER SYSTEM EQUIVALENT RESIDENTIAL CONNECTIONS

Provide a calculation used to determine the value of one water equivalent residential connection (ERC). Use one of the following methods:

- (a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365 days.
- (b) If no historical flow data are available, use:
  - ERC = (Total SFR gallons sold (Omit 000) / 365 days / 350 gallons per day )

#### ERC Calculation:

159,770,000 total gallons/365/350 GPD/ERC =

1251 ERCs
