PRICE LIST FORMAT

- A. Page Numbering** - Page numbers appear in the upper right corner of the page. Pages are numbered sequentially. However, new pages are occasionally added to the Price List. When a new page is added between pages already in effect, a decimal is added. For example, a new page added between Pages 14 and 15 would be 14.1.
- B. Page Revision Numbers** - Revision numbers also appear in the upper right corner of each page. These numbers are used to determine the most current page version on file with the FPSC. For example, the 4th Revised Page 14 cancels the 3rd Revised Page 14. Because of various suspension periods, deferrals, etc. that the FPSC follows in their Price List approval process, the most current page number on file with the Commission is not always the Price List page in effect. Consult the Check Sheet for the page currently in effect.
- C. Paragraph Numbering Sequence** - There are nine levels of paragraph coding. Each level of coding is subservient to its next higher level:
- 2.
 - 2.1.
 - 2.1.1.
 - 2.1.1.A.
 - 2.1.1.A.1.
 - 2.1.1.A.1.(a).
 - 2.1.1.A.1.(a).I.
 - 2.1.1.A.1.(a).I.(i).
 - 2.1.1.A.1.(a).I.(i).(1).
- D. Check Sheets** - When a Price List filing is made with the FPSC, an updated check sheet accompanies the Price List filing. The check sheet lists the pages contained in the Price List, with a cross reference to the current revision number. When new pages are added, the check sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (*). There will be no other symbols used on this page if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some pages). The Price List user should refer to the latest check page to find out if a particular page is the most current on file with the FPSC.

SECTION 2 – RULES AND REGULATIONS, (CONT'D)**2.10 Credit Requirement****2.10.1. Credit Requirement**

2.10.1.A. Sage may require an applicant for service to satisfactorily establish credit, but such establishment of credit shall not relieve the end-user from complying with Sage's policy regarding the prompt payment of bills.

2.10.1.B. For the purposes of this rule, "applicant" is to be defined as a person who applies for service for the first time or reapplies at a new or existing location after a previous discontinuance of service; "customer" is defined as someone who is currently receiving service.

2.10.2. Reestablishment of Credit

- 2.11.5 Sage shall provide payment of accrued interest for all end-users annually by negotiable instrument or by credit against current billing. The deposit shall cease to draw interest on the date it is returned or credited to the end-user's account.
- 2.11.6 The amount of the deposit, with accrued interest, shall be applied to any unpaid charges at the time of a discontinuance of services. The balance, if any, shall be returned to the end-user within thirty (30) days after settlement of the consumer's account, either in person or by mailing it to the end-user's last known address.

Such records shall be retained for two (2) years after deposit and/or interest is refunded or applied. The deposit made by the end-user with Sage at the time of application for telephone service shall not constitute an advance payment to cover service bills, but for all purposes it is to be considered as security for payment of monthly bills or other proper charges.

SECTION 3 – DESCRIPTION OF SERVICES, (CONT'D)

3.1. Telecommunications Services, (cont'd)

3.1.8. Custom Calling Features

3.1.8.A. Service Offerings available to Customer's and End Users of Sage's local exchange service on local access lines only, subject to availability from the central office serving the customer:

1. Repeat Dialing - Enables the customer to redial automatically the last outgoing telephone number. If the telephone number is busy, Call Again will keep trying to call the number for a maximum of thirty (30) minutes, beginning with the customer's activation of Call Again, in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. Call Again is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have Call Again taken off its lines.
2. Call Block - Enables the customer to block calls from pre-selected telephone numbers and/or the last incoming call (without knowing the number). To block specified telephone numbers, the customer builds a screening list of up to 31 telephone numbers. To block an unknown number after receiving a call, the customer enters a code to add the number to their screening list. If facilities are unavailable to provide incoming call screening via the customer's list, standard call completion will occur. Customers whose telephone numbers are blocked are directed to a recorded announcement.
3. Call Forwarding - Enables the customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network. The Call Forwarding customer is responsible for the payment of charges (e.g., toll charges) for each call between his Call Forwarding-equipped telephone and the telephone to which the call is being forwarded.

Includes Busy Line and Don't Answer features, as defined below. Customer may decline these additional features.

Call Forwarding - Busy Line allows incoming calls that encounter a busy condition to be forwarded to a pre-designated telephone number within the exchange or on the Long Distance Telecommunications Network.

Call Forwarding - Don't Answer allows incoming calls which are not answered after a pre-determined number of rings to be automatically forwarded to a pre-designated telephone number within the exchange or on the Long Distance Telecommunications Network.

3.1.8.A. Service Offerings (cont'd)

4. Call Return - Enables the customer to redial automatically the last incoming telephone number. If that telephone number is busy, Missed Call Dialing will keep trying to call the number for a maximum of thirty (30) minutes beginning with the customer's activation of Missed Call Dialing in an attempt to establish the call. The customer will be signaled with a distinctive ring when the call can be completed. This service will not function if the calling party's telephone number has been Call Forwarded. Also, this service will not function from a line that does not have an associated telephone number, e.g., multi-line hunting groups. Missed Call Dialing is available as a monthly plan or on a per use basis. Per use functionality is automatically provisioned on all lines. The customer may request to have the per use functionality taken off its lines.
5. Call Trace - Enables the customer to initiate a trace of the last completed incoming call by dialing an activation code before receiving another call. If a trace is successful, Call Trace will record the incoming call detail (not the conversation). A successful trace cannot be made if the incoming call originates in a central office not equipped for Call Trace service. The customer will not be provided the results of the trace (i.e., the telephone number traced). Such call detail may be provided only to law enforcement authorities upon proper request.

For further action to be taken, the customer is required to contact Sage Telecom via the telephone number provided in the Call Trace announcement.

At its opinion or upon receipt of proper request from a law enforcement agency, Sage will set up a temporary tracing arrangement using Call Trace or manual trap and trace where Call trace is not available at no charge to the customer when in the judgment of Sage or law enforcement agency, the unwanted call(s) present a serious threat of bodily harm or destruction of property.

7. Call Waiting Deluxe - When a person is already speaking on the telephone and receives another phone call, Call Waiting Deluxe service will allow for the display of the name and/or number of the new caller on the customer's CPE. This service allows the customer to decide if he wants to answer the new incoming call.

Call Waiting Deluxe is offered subject to the following limitations:

 - b. Customers are responsible for furnishing their own compatible CPE, which should include the Caller ID capability necessary to display the calling party's name and/or number.
 - c. Available only where central office facilities permit.
8. RingMaster Service - RingMaster Service permits a customer to establish up to three telephone numbers on the same access line and to distinguish calls to each number by distinctive incoming ring patterns. The billing telephone number is the "master" number and the other telephone numbers are "dependent" numbers. The standard ringing pattern is provided for the master number while distinctive ringing patterns are provided for a maximum of two dependent numbers.

When a RingMaster Service customer subscribes to any Call Forwarding feature, dependent numbers can either be forwarded to the same number as the master number or receive no forwarding treatment at all.

When a RingMaster Service customer subscribes to Call Waiting, incoming calls to the master number will activate the standard Call Waiting tone. Incoming calls to the dependent numbers will activate a distinctive Call Waiting tone per dependent number.

A directory listing is furnished per telephone number. When a customer requests the dependent numbers to be nonpublished or nonlisted, Sage Telecom will provide without charge. However, if the master number and all dependent numbers are nonpublished and/or nonlisted, the appropriate monthly rate is applicable to the master number.

Repeat Dialing, Call Block, Call Return, Call Trace, Call Selector, Preferred Call Forwarding and Caller ID are functional when both the call originating customer and the call terminating customer are served from central offices capable of sending and receiving the Calling Party Number (CPN) and are linked by appropriate facilities.

3.1.9.C. Anonymous Call Rejection - Allows customer to automatically reject all calls that have been marked anonymous by the calling party. 3.1.9.D. Calling Name and Number Blocking - Any Sage Telecom calling party may prevent the delivery of CPN and of Calling Party Name to the called party by dialing an access code (*67 on their touch-tone pad or 1167 from a rotary telephone) immediately prior to placing a call. The access code activated per call blocking is available at no charge. If a calling party activates blocking, the CPN and Calling Party Name will not be transmitted across the line. Instead, the Caller ID subscriber will receive an anonymous indicator. This anonymous indicator notifies the Caller ID subscriber that the calling party chose to block name and number delivery.

Per-line blocking will be offered at no charge to a requesting customer if Sage Telecom receives from the customer written certification that the customer has a compelling need for per-line blocking.

3.1.15. Dual Service

Dual Service, as part of an outside/physical move of telephone service, provides Sage business customers the ability to have service at both the old and the new location at the same time.

1. At the time a service order is placed to physically move telephone service, the customer may specify a period of time, not to exceed 30 days, that they want to receive Dual Service.
2. Dual Service can be provided as long as the customer's new location is served by the same Central Office, which is normally the case when the customer is able to keep their existing phone number(s).
3. Dual service begins on the Service Order Completion (SOC) date of the new service, and extends for the number of days specified by the customer at the time of the order.
4. The number of days specified by the customer at the time of the order CANNOT be changed.
