GENERAL EXCHANGE TARIFF FOR THE STATE OF FLORIDA

This tariff contains regulations and rates applicable for the furnishing of Basic Local Exchange Service and other general customer services, equipment, and facilities associated with the above services offered by Quincy Telephone Company d/b/a TDS TELECOM hereinafter referred to as the Telephone Company, and/or Company within the State. This tariff is on file with the Florida Public Service Commission. (T) (T) (N)

Interstate communication services are furnished through facilities provided by the Company for the transmission of intelligence by electrical impulse, principally by means of wire, radio, or a combination of both.

Explanation of Symbols

When changes are made in any tariff sheet, a revised sheet will be issued cancelling the tariff sheet affected; such changes will be identified through the use of the following symbols:

(C) - To signify changed regulation or tariff.

(D) - To signify discontinued rate, regulation, or text.

(I) - To signify increase.

(M) - To signify a move from one sheet to another with no change to text, regulation, or tariff.

(N) - To signify new rate, regulation, or text.

(O) - To signify obsoleted rate, regulation, or text, and a move to the obsolete service offerings section.

(R) - To signify reduction.

(S) - To signify reissued matter.

(T) - To signify change in text, but no change in rate or regulation. (The specific words, phrases, or sentences changed within the indicated text are italicized.)

Effective: February 8, 1983

GENERAL EXCHANGE TARIFF
FOR THE
STATE OF FLORIDA

Explanation of Symbols (Cont'd)

- (V) - To signify new vintage rates applicable only to new installations and additions to existing installations.
- + - To signify that the marginal notation directly above it is continued down vertically to the next appearance of the same marginal notation. (This continuation could also be identified by a vertical line connecting the two identical marginal notations.)

The above symbols will apply except where additional symbols are identified at bottom of individual sheets.

EXPLANATION OF TERMS

ACCESS LINES

A circuit between the station protector on the customer's telephone service or PBX to, and including, the serving central office main frame.

ACCESSORIES

Devices which are mechanically attached to, or used with, the facilities furnished by the Company and which are independent of, and not electrically, acoustically or inductively connected to the communications path of the telecommunications systems.

ACCOUNT RETENTION

Allows a customer to retain their current phone number and associated services when they temporarily disconnect service. When the customer reconnects service they will receive the same phone number and associated services as when they previously held service.

ACOUSTIC CONNECTION

A connection made by sound.

AIRLINE MEASUREMENT

See MILEAGE AND ZONE CHARGES

ALTERNATING CURRENT SUPPLY

Electrical energy which is used for power purposes, for protection of equipment in humid areas, and for the operation of bells and signal devices.

APPOINTMENT CALL

See LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE.

AUTHORIZED PROTECTIVE CONNECTING MODULE

A protective unit which is designed and manufactured in compliance with standards as set forth by Part 68 of the FCC Rules and Regulations.

AUTHORIZED USER

A person, firm, or corporation, other than the subscriber, who has been authorized by the Company to communicate over a private line or channel according to the terms of the tariff and (1) on whose premises a station of the private line service is located or (2) who receives from or sends to the subscriber over such private line or channel communications relating solely to the business of the subscriber.

d/b/a TDS Telecom/Quincy Telephone

SECTION A1
FIRST REVISED SHEET NO. 2
CANCELS ORIGINAL SHEET NO. 2

Issued: December 1, 1993

Effective: SEP 09 1994

EXPLANATION OF TERMS

AUXILIARY LINE

An individual circuit connecting an additional main station with a central office for one-way (inward to the subscriber) service in order to relieve the load on the first individual line.

AUXILIARY STATION

A telephone station connected to the central office by means of an auxiliary line.

(D)
+
|
(D)

BATTERY POWER

See PRIVATE BRANCH EXCHANGE

BILL TO THIRD PARTY

A billing arrangement by which a call can be charged to an authorized station as determined by the Company other than the station originating the call or the station where the call is terminated.

BUILDING (SAME)

The term "Same Building" is to be interpreted as a structure under one roof, or two or more structures under separate roofs but connected by covered passageways not crossing public thoroughfares, in which the wires or cable of the Company can be safely run provided the plant facility requirements are not appreciably greater than would be required normally if all structures were under one roof. In those cases where there are several structures under separate roofs, but connected by covered passageways and the plant facility requirements for furnishing telephone service are appreciably greater than would be required normally if all the structures were under one roof, the term "same building" applies individually to each of the separate structures. Pipes and conduit are not considered covered passageways.

Quincy Telephone Company

d/b/a TDS Telecom/Quincy Telephone

SECTION A1
Original Sheet 2.1

Issued: June 19, 1985

Effective: **AUG 19 1985**

EXPLANATION OF TERMS

Bypass

The cessation of using one facility(ies) for carrying traffic in favor of using another facility for carrying traffic. The facility may be provided by a local telephone company having authority to provide local exchange telephone service granted by the Florida Public Service Commission or by another carrier granted authority to provide some form of telecommunications service.

(N)

Bypass Message Rate Service

A service offered in which the subscriber has any device capable of generating usage on any kind of exchange line between any kind of intraLATA or interLATA private line(s) or special access line(s). The service is business class only. Each call completed is counted as one message unit.

Bypass Metered Rate Service

A service offered in which the subscriber has any device capable of generating usage on any kind of exchange line between any kind of intraLATA or interLATA private line(s) or special access line(s). The service is business class only. Each call completed is timed for duration in minutes and each minute for fractional minute is counted as one minute of use and is one metered unit.

SECTION A1
Original Sheet 3

Effective: February 8, 1983

EXPLANATION OF TERMS

CALL

An attempted or completed communication.

CALLING AREA

See LOCAL SERVICE AREA.

CANCELLATION CHARGE

A charge applicable under certain conditions when an application for service and/or facilities is cancelled in whole or in part prior to the completion of the work involved.

CAPTION LISTING

See DIRECTORY LISTING.

CENTRAL OFFICE

A local operating unit by means of which telephonic intercommunication is provided for subscribers within a specified area under contracts for exchange service. An essential characteristic of a central office is switching equipment to which telephone stations are connected by means of circuits known as "Central Office Lines." This switching equipment also provides for connection with the toll network, and, in multioffice exchange areas, with other central offices.

CENTRAL OFFICE CONNECTING FACILITY

A facility furnished to an Other Common Carrier by the Company (in accordance with the Company's Facilities for Other Common Carrier's Tariffs) between the terminal location of the Other Common Carrier and a point of connection on the Company premises.

CENTRAL OFFICE DESIGNATION

See TELEPHONE NUMBER.

CENTRAL OFFICE DISTRICT OR AREA

The specific section or area served by a single central office and serving all subscribers' lines which have a common central office designation.

d/b/a TDS Telecom/Quincy Telephone

SECTION A1
First Revised Sheet 4
Cancels Original Sheet 4

Issued: June 19, 1985

Effective:

AUG 19 1985

EXPLANATION OF TERMS

CENTRAL OFFICE LINE

See EXCHANGE LINE.

CENTREX SERVICE

A service arrangement of dial switching equipment and facilities which permits intercommunication among the stations associated with the system as well as direct inward dialing and identified outward dialing of local and long distance calls without intermediate handling by the attendant. Centrex rates are structured on a "per station" basis. Switching equipment, central office lines, and other facilities sufficient to provide an adequate grade-of-service are furnished by the Company.

CERTIFICATION

The formal notice in writing to the telephone company that an exchange line is not carrying traffic either originated by or terminated from a private line(s) or special access line(s).

(N)
|
(N)

CHANNEL

An electrical path suitable for the transmission of communications.

CLASS OF SERVICE

A description of telephone service furnished a customer in terms such as:

a. For Exchange Service:

- (1) Grade of Line: Individual line, Two-Party line, Four-Party line, etc. (See also "Primary Class of Service").

SECTION A1
Original Sheet 5

Effective: February 8, 1983

EXPLANATION OF TERMS

CODE RINGING

See RINGING.

COIN BOX TELEPHONE

A telephone station equipped with a device for collecting money in payment of telephone messages and used in connection with either public or semipublic telephone service.

COINLESS PUBLIC TELEPHONE

See PUBLIC TELEPHONE.

COLLECT CALL

A billing arrangement by which the charge for a call may be reversed (charged to the called station) provided the charge is accepted at the called station. A collect call may be billed to a Credit Card or third party number. In the case of a call to a public or semipublic coin telephone, the charges must be billed to a Credit Card or third party number, or the call may be reoriginated from the called station.

COMMISSION

Florida Public Service Commission.

COMMON BATTERY SERVICE

The type of telephone service in connection with which electrical energy for talking and signaling is supplied from a central point.

COMMUNICATING DEVICE

A device consisting of a transmitter, receiver, network control signaling unit, and associated apparatus and so connected as to permit the sending and receiving of telecommunication messages.

COMMUNICATING SYSTEMS

Channels and other facilities which are capable, when not connected to telecommunications services, of communications between customer-provided terminal equipment or Company stations.

Cancels First Revised Sheet 6

EXPLANATION OF TERMS

COMPANY

Wherever used in this tariff, "Company" refers to Quincy Telephone Company d/b/a TDS TELECOM/Quincy Telephone unless the context clearly indicates otherwise.

(C)
(C)

COMPANY ATTENDED PUBLIC TELEPHONES

See PUBLIC TELEPHONE.

COMPANY STATION

See STATION.

COMPLEX SERVICE

The term complex service as specified herein is defined as service terminating in a communications system such as Key or PBX. Complex service applies to private line or special access service when the line does not terminate in a single line jack or phone. The term Complex Service may apply as well to special services specifically noted as complex services in other sections of this Tariff.

COMPLEX STATION WIRING

Customer premises wiring used between the jacks, terminal blocks, the main distributing frame or other suitable device of the common equipment and the jacks or terminal blocks located at the station or instrument.

COMPLEX WIRE

Customer premises wire used between the network interface and the jacks for complex business and residence service.

SECTION A1
Original Sheet 6.1

Issued: December 31, 1985

Effective: **SEP 25 1986**

EXPLANATION OF TERMS

CONFORMANCE NUMBER

(M)*

An identifying number assigned by the FCC to a particular model of conforming answering device incorporating an authorized protective connecting module when that model or device is in conformance with the provisions set forth by the FCC in its technical reference for conforming answering devices.

CONFORMING ANSWERING DEVICE

A customer-provided device which automatically answers incoming calls; transmits a prerecorded voice message or appropriate audible signal to the calling party; records a voice message from the calling party if so designed and arranged; and automatically disconnects from the line in a prearranged manner on completion of the last of the functions for which it was designed and arranged as described in this paragraph. The conforming answering device may include remote interrogation and/or device function control. A conforming answering device must incorporate an authorized protective connecting module and must bear a valid conformance number.

CONNECTING ARRANGEMENT

The protective equipment to accomplish the direct electrical connection of customer-provided facilities with the facilities of the Company with other facilities of the Company when such customer-provided equipment does not conform with the FCC Rules and Regulations on terminal equipment.

Quincy Telephone Company

d/b/a TDS Telecom/Quincy Telephone

By: G.R. Barnes, President

SECTION A1
Original Sheet 7

Effective: February 8, 1983

EXPLANATION OF TERMS

CONNECTING COMPANY

A corporation, association, firm, or individual owning and operating a toll line and/or one or more central offices providing local exchange telephone service to the public and with whom the Company interchanges traffic.

CONNECTING STATION

An exchange or toll station of a connecting company.

CONSTRUCTION CHARGE

A separate initial charge authorized in the tariff for construction of pole lines, circuits, facilities, etc. in excess of that contemplated under the rates quoted in the exchange tariffs.

CONTINUOUS PROPERTY

A continuous plot of ground, including any building thereon, which is used exclusively by the customer (or by an authorized user of the customer's service) and which is not separated by property occupied by others.

CONTRACT PERIOD

The length of time for which a subscriber is responsible for the charges associated with service, facilities and equipment.

COST

Wherever the word "cost" is used in this tariff, it is intended to cover the cost of labor, material and incidentals, plus a charge for supervision.

CREDIT CARD

A billing arrangement by which a call may be charged to an authorized telephone company credit card number.

CUSTOMER

Any person, firm, partnership, corporation, municipality, cooperative organization, or government agency furnished communication service or equipment by the Company under the provisions and regulations of its tariff.

Effective:

SEP 25 1986

EXPLANATION OF TERMS

CUSTOMER PREMISES

The discrete real property owned, leased, or controlled by a customer for the customer's own business or residential purposes.

CUSTOMER PREMISES EQUIPMENT (CPE)

Terminal equipment located on the customer's premises and in inventory, such as telephone sets, teletypewriters, data terminal equipment, mobile telephone terminal equipment, private branch exchange equipment, key system equipment, dialers, and other supplemental equipment. CPE does not include paystations, terminal equipment used for official telephone company business, subscriber multiplexing terminal equipment, subscriber pair gain equipment, transmit earth stations, or telecommunications devices for the deaf (TDD). (T)

CUSTOMER PREMISES INSIDE WIRE

The wiring located on the customer premises between the telephone company network interface and the jacks or service point located on the customer premises. The wiring may be for simple business or residence or for complex business or residence service. Customer premise inside wire includes connecting blocks, terminal strips, wire, jacks and any other equipment necessary to make the connections between the telephone company network interface and the jack or equivalent serving the telephone device used by the customer. SECTION A1
First Revised Sheet 8
Cancelling Original Sheet 8

By: G.R. Barnes, President

Effective: [REDACTED]

MAY 07 1983

EXPLANATION OF TERMS

CUSTOMER-PROVIDED TERMINAL EQUIPMENT

Devices or apparatus and their associated wiring, provided by a customer, which do not constitute a communications system and which, when connected to the communications path of the telecommunications system, are so connected either electrically, acoustically, or inductively.

DATA ACCESS ARRANGEMENT

A protective connecting arrangement for use with the network control signaling unit, or, in lieu of the connecting arrangement, an arrangement to identify a central office line and protective facilities and procedures to determine compliance with criteria set forth in this tariff.

DATA SET

A device designed to accept from and/or impart to data transmitting and/or receiving terminal equipment material in the form produced and/or accepted by the terminal equipment into a form acceptable for transmission over network facilities.

DEMARCATATION POINT

The point of physical interconnection (connecting block, terminal strip, jack, protector, or remote isolation device) between the telephone network and the customer's premises wiring. This point is part of the telephone network provided and maintained by the Telephone Company under tariff. The location of this point is:

- a. Single-line/single-customer building - either at the point of physical entry to the building, or at a junction point as close as practicable to the point of entry.
- b. Single-line/multi-customer building - within the customer's premises at a point easily accessed by the customer.
- c. Multi-line systems - at a point within the same room and within 25 feet of the FCC registered terminal equipment.

See SPECIAL REVERSE CHARGE TOLL SERVICE.

GENERAL EXCHANGE TARIFF

QUINCY TELEPHONE
COMPANY

SECTION A1
Original Sheet 9.1

I Quincy Telephone Company
d/b/a TDS Telecom/Quincy Telephone

Effective [REDACTED]

MAY 07 1983

EXPLANATION OF TERMS

EXCHANGE

An area served by a central office or group of central offices, together with the subscriber's stations and lines connected thereto, forming a local system which furnishes means of telephonic intercommunication without toll charges between subscribers within a specified area, usually a single city, town, or village; a toll rate center.

By: G.R. Barnes, President

By: G.R. Barnes, President

Effective: February 8, 1983

EXPLANATION OF TERMS

EXCHANGE (Cont'd)

When an exchange includes only one central office, it is termed a single office exchange, but when it includes more than one central office, the exchange is termed a multioffice exchange.

EXCHANGE LINE

Any line (circuit) directly or indirectly connecting an exchange station with a central office. Exchange lines are subdivided as follows:

- a. Central Office Line: A circuit extending from a central office to the location of an individual line or party line main station service or a PBX or key telephone system.
- b. Main Station Line: The circuit portion of a main station; the main station line extends from the main service location to the central office.
- c. Extension Station Line: The circuit portion of an extension station; the extension station line extends from the extension service location to the main service location or a central connecting point of the main service.
- d. Extension Line: A circuit with characteristics similar to an extension station line.
- e. PBX Station Line: The circuit portion of a PBX station; the PBX station line extends from the PBX station service location to the PBX switchboard or dial switching equipment.
- f. Tie Line: A circuit connecting PBX systems.

EXCHANGE SERVICE AREA

The territory, including the base rate area and rural areas served by an exchange, within which local telephone service is furnished at the exchange rates applicable within that area.

d/b/a TDS Telecom/Quincy Telephone

SECTION A1

First Revised Sheet 11

Cancels Original Sheet 11

Issued: June 19, 1985

Effective: **AUG 19 1985**

EXPLANATION OF TERMS

EXCHANGE SERVICE

The general telephone service rendered in accordance with tariff provisions. Exchange service is a general term describing as a whole the facilities provided for local intercommunication, together with the right to originate and receive a specified or an unlimited number of local messages at charges in accordance with the provisions of this tariff.

a. Flat-, and Message-, and Measured-Rate

- (1) Flat-Rate Service: A classification of exchange service for which a stipulated charge is made, regardless of the amount of use.
- (2) Message-Rate Service: A classification of noncoin box exchange service which is charged for on the basis of amount of use.
- (3) Local Measured Service: A classification of exchange service which may be charged on the basis of local usage, as determined by the number of calls, the duration of the calls, the distance of the calls and the time of day the calls are placed.
- (4) Bypass Message or Metered Service: A classification of exchange service which is charged on the basis of message units or metered units. A connection between a private line(s) or special access line(s) and the exchange line(s) exist through any device capable of connecting the line(s). (N)
|
(N)

b. Individual Line

Individual Line Service: A classification of exchange service which provides that only one mainstation shall be served by the line connecting such station with the central office or other switching unit.

By: G.R. Barnes, President

EXPLANATION OF TERMS

EXCHANGE SERVICE (Cont'd)

- e. Foreign Exchange Service: A classification of exchange service furnished to a customer from an exchange other than the one from which he would normally be served.
- f. U-Touch Calling Service: A classification of exchange service furnished from certain specified central offices whereby calls are originated through the use of pushbuttons in lieu of a rotary dial.
- g. Bypass Message or Metered Service: A classification of exchange service where usage from private line(s) or special access line(s) is being carried by exchange line(s) through a connecting device. (N)

EXCHANGE STATION

See STATION.

EXTENDED AREA SERVICE

A type of telephone service furnished under tariff provisions whereby subscribers of a given exchange may complete calls to and, where provided by the tariff, receive calls from one or more exchanges without the application of long distance message telecommunications charges. Local service rates applicable in areas with EAS are generally greater than those in areas where local service is restricted to one exchange area.

EXTENSION LINE MILEAGE

See MILEAGE AND ZONE CHARGE.

EXTENSION RINGER

An additional ringer on the same premises and on the same circuit and generally operated in connection with the ringer at the station location. Extension ringers are of two types:

INMATE CALLING SERVICE

A coin telephone service provided by the Company for the exclusive use of inmates served within the confines of a penal, correctional, or mental institution.

(N)
+

(N)

INSIDE WIRE

All wire or cable located on the customer's side of the demarcation point that connects customer premises equipment to the telephone network.

(M)*
+

(M)

INSTALLATION CHARGE

A nonrecurring charge applying to the provision of certain services or facilities as distinguished from the service connection charge applicable to establishment of basic telephone service. The installation charge is normally associated with optional service features and may sometimes be called an "initial" charge.

(C)

INTERCEPT SERVICE

A service arrangement whereby calls placed to an unequipped nonworking, a disconnected or discontinued telephone number are intercepted by operator, recording or audio response computer, and the calling party is informed that the called telephone number is not in service, has been disconnected, discontinued, or changed to another number, or that calls are received by another telephone. This service is also provided in certain central offices or switching centers to inform the calling party of system blockages, inability of the system to complete a call as dialed, no such office code, all circuits busy, etc.

INTERCOMMUNICATING SYSTEM

See KEY TELEPHONE SYSTEM.

INTERFACE

That point on the premises of the customer at which provision is made for connection of other than telephone company provided facilities to exchange facilities provided by the telephone company.

By: G.R. Barnes, President

Effective: February 8, 1983

EXPLANATION OF TERMS

LOCAL EXCHANGE SERVICE

The general telephone service, provided under a specified schedule of rates, which allows a subscriber to originate and receive calls from his/her telephone station through facilities provided for local intercommunication to other telephone stations within a specified area without payment of toll charges. Local exchange service rates may or may not be based on usage, and generally include provisions for the local exchange access line, terminal equipment, and extended area calling privileges to one or more exchange areas where applicable.

LOCAL MEASURED SERVICE

See EXCHANGE SERVICE.

LOCAL MESSAGE

See MESSAGE.

LOCAL SERVICE AREA

The area within which telephone service is furnished subscribers under a specific schedule of exchange rates and without long distance charges. A local service area may include one or more exchange service areas under extended area service arrangements.

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE

The furnishing of facilities for customers' telephone communications on an individual message basis between rate centers or, in connection with toll stations, within the same rate center.

- a. Appointment Call: An arrangement made in advance with a particular party for the establishment of a person-to-person long distance message telephone connection at a specified time.
- b. Messenger Service: An arrangement whereby the Company, when possible and at the request of the calling party, will arrange to notify the called party of a long distance call. The Company shall be reimbursed by the calling party for the amount expended for such messenger service, such charges being subject to prior authorization by the calling party to the extent that they can be determined in advance. Such charges for messenger service are in addition to the tariff charges for the message.

Quincy Telephone Company

d/b/a TDS Telecom/Quincy Telephone

By: G.R. Barnes, President

SECTION A1
Original Sheet 18

Effective: February 8, 1983

EXPLANATION OF TERMS

LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE (Cont'd)

- c. Person-to-Person Call: A service whereby the person originating the call specifies to the telephone company operator a particular person to be reached, a particular mobile station to be reached through a Miscellaneous Common Carrier attendant, or a particular station, department, or office to be reached through a PBX attendant.
- d. Station-to-Station Call: A service whereby the person originating the call either dials the telephone number desired or gives to the telephone company operator the telephone number of the desired telephone, Miscellaneous Common Carrier connecting circuit, PBX or PBX station which is reached directly rather than through a PBX attendant, or gives only the name and address under which such number is listed and does not specify a particular person to be reached, nor a particular mobile station to be reached through a Miscellaneous Common Carrier attendant, nor a particular station, department, or office to be reached through a PBX attendant.

LONG DISTANCE TERMINAL

See STATION: TOLL TERMINAL.

MAGNETO SERVICE

The type of service which requires the use of a hand generator at the station in order to signal the operator at the central office. Talking current is provided by local batteries.

MAIN STATION

See STATION.

MAIN STATION LINE

See EXCHANGE LINE.

MAINTENANCE CHARGE

The charge made for keeping telephone equipment or facilities in working condition.

By: G.R. Barnes, President

SECTION A1

First Revised Sheet 23

Cancelling Original Sheet 23

Effective:

MAY 07 1983

EXPLANATION OF TERMSPREMISES (SAME)

The term "Same Premises" (except in connection with RELOCATES) shall be interpreted to mean: (a) the building or buildings, together with the surrounding land occupied or used in the conduct of one establishment or business, or as a residence, and not intersected by a public thoroughfare or by property occupied by others; or (b) the portion of the building occupied by the customer, either in the conduct of his business or as a residence, and not intersected by a public corridor or by space occupied by others; or (c) the building or portion of a building occupied by the customer in the conduct of his business and as a residence provided both the business and residence bear the same street address; or (d) the continuous property operated as a single farm not intersected by a public thoroughfare.

In connection with RELOCATES, the term "Same Premises" is to be interpreted to mean the building or portion of a building occupied as a unit by the customer in the conduct of his business or residence, or a combination thereof, and not intersected by a public thoroughfare, a corridor or space occupied by others.

PRIMARY CLASS OF SERVICE

Any of those classes of service which the Company undertakes to furnish at any point within the base rate area of a specific exchange at a rate common to all applicants for the same class located in the same area. Primary classes of service may be furnished at points outside a base rate area at applicable rates plus extra exchange line mileage or zone charges.

PRIMARY INSTRUMENT

Both wall-mounted and desk set types of rotary dial and U-Touch telephone instruments (i.e. simple instruments), or such other instrument approved under tariff by the Commission, and purchased by the Company on or after January 1, 1983.

PRIMARY LOCATION

The continuous property designated by the customer as the primary location and at which the attendant's position is located.

EXPLANATION OF TERMS-

PRIVATE BRANCH ~~EXCHANGE~~ SERVICE (PBX OR PABX SERVICE)

- a. A type of service providing an arrangement of switching equipment and stations for intercommunicating among the stations and for connections through the local and long distance message telephone network to other customers.

Quincy Telephone Company

d/b/a TDS Telecom/Quincy Telephone

SECTION A1
Original Sheet 24

By: G.R. Barnes, President

Effective: February 8, 1983

EXPLANATION OF TERMS

PRIVATE BRANCH EXCHANGE SERVICE (PBX OR PABX SERVICE)
(Cont'd)

b. Lines (circuits), equipment and facilities ordinarily furnished in connection with PBX service include the following:

- (1) PBX Station: A station connected with a PBX switchboard or dial PBX switching equipment.
- (2) PBX Extension Station: A telephone set which is bridged to the same line as the PBX station.
- (3) PBX Interior Station. A PBX station that cannot originate or receive local or long distance calls either directly or through the PBX attendant.
- (4) PBX Trunk: A central office line (circuit) connecting a PBX system with a central office.
- (5) Tie Line: See EXCHANGE LINE.
- (6) Battery Power: Power furnished by means of a circuit from a central office or other source of supply to a common battery private branch exchange system for talking and operating lamp or visual signals and relays. Where power equipment is located on the customer's premises, the customer shall furnish suitable outlets convenient to the Company's equipment.
- (7) Common Equipment: Machine switching mechanisms and circuits common to all private branch exchange stations associated with a particular private branch exchange system.
- (8) Ringing Circuit: A circuit or other source of supply, supplying current to enable the private branch exchange operator to signal the private branch exchange systems or connecting private branch exchange systems, without the use of a hand generator.

PRIVATE LINE

A circuit provided to furnish communication only between two or more terminals directly connected to it and not having connection with either central office or private branch exchange switching apparatus.

By: G.R. Barnes, President

Effective: February 8, 1983

EXPLANATION OF TERMS

PUBLIC TELEPHONE

An exchange main station installed on the Company's initiative, or at the Company's option, at a location chosen or accepted as suitable and necessary for furnishing service to the general public.

- a. Coinbox Public Telephone: A public telephone equipped with a coin collecting device into which all payments for the use of the telephone may be deposited prior to (prepayment) or at (postpayment) the time the desired connection is established.
- b. Company Attended Public Telephone: A public telephone operated by a Company employee as attendant.
- c. Coinless Public Telephone: A public telephone connected directly to the long distance switchboard for the placing of collect, credit card and third-number billed long distance calls only.

PROTECTIVE CONNECTING ARRANGEMENT

Equipment provided for electrical protection when facilities provided by other than the Company are connected with facilities provided by the Company.

RATE CENTER

A specified geographical location within an exchange area from which mileage measurements are determined for the application of rates between exchange areas.

REFERENCE LISTING

See DIRECTORY LISTING.

REGISTERED PROTECTIVE CIRCUITRY

Separate, identifiable, and discrete electrical circuitry designed to protect the telephone network from harm, and registered in accordance with Part 68 of the FCC Rules and Regulations.

Quincy Telephone Company

Issued: June 19, 1985

Effective: AUG 19 1985

EXPLANATION OF TERMS

REGISTERED TERMINAL EQUIPMENT

Terminal equipment which is registered in accordance with Part 68 of the FCC Rules and Regulations.

RESTORATION CHARGE

A charge made for restoring service after service has been suspended (temporarily interrupted) at the request of the subscriber or by the Company for violation of tariff regulations by the subscriber.

RINGING

There are three methods of signaling stations on party or multiparty line circuits.

- a. Code Ringing: The method of signaling stations on a party or multiparty line circuit whereby the bells of all the stations on the circuit are rung whenever one station is signaled; signals of the respective stations are distinguished by a code made up of various combinations of short and long rings.
- b. Selective Ringing: The method of signaling stations on a party line circuit which permits a particular station to be signaled without ringing the bells of the other stations on the circuit.
- c. Semiselective Ringing: The method of signaling stations on a party or multiparty line circuit whereby the bells of only a portion of the stations on a circuit are rung when one of the stations is signaled; signals of the respective stations are distinguished by a code made up of various combinations of short and long rings.

By: G.R. Barnes, President

By: G.R. Barnes, President

Effective: February 8, 1983

EXPLANATION OF TERMS

ROUTE MEASUREMENT

See MILEAGE AND ZONE CHARGE.

RURAL AREA

The sparsely populated area outside of the base rate area.

SECRETARIAL LINES

Extension station or main station lines of patrons of a telephone answering bureau which terminate in telephone answering facilities on the premises of the bureau so as to permit the bureau attendant to answer incoming calls on such lines.

SELECTIVE RINGING

See RINGING.

SEMISELECTIVE RINGING

See RINGING.

SEMIPUBLIC TELEPHONE

An exchange main station generally including a coin box, furnished at locations reasonably accessible to the public but not suitable for the installation of public telephones.

SERVICE CONNECTION CHARGE

A nonrecurring charge applying to the establishment of basic telephone service for a subscriber and certain subsequent additions to that service.

SERVICE LINES

A two-way business individual line, a dial PBX main station, or an extension of any of the before mentioned, which is required for testing of certain services provided by the Company and which is to be billed at the existing tariff rate.

EXPLANATION OF TERMS

SERVICE POINT

When used in connection with customer-provided communication channels, the term "Service Point" denotes the point on the customer's premises where such channels or facilities are terminated in switching equipment used for communications with stations or customer-provided terminal equipment on the premises.

SIMPLE BUSINESS

The term simple business is defined as business individual or party line basic exchange service which does not terminate in a communications system. The term business non-key is synonymous with the term simple business.

(N)

SIMPLE RESIDENCE

The term simple residence is defined as non-complex, residence individual or party line basic exchange service which does not terminate in a communications system.

SIMPLE SERVICE

The term simple service is defined as simple business and simple residence service.

SIMPLE WIRING

Customer premises wiring between the network interface and the jacks for simple business and simple residence.

EXPLANATION OF TERMS

SINGLE-ENDED TERMINAL DEVICE

(M)*

A terminal device which terminates only one line or channel at a given time (example: headsets).

SPECIAL ACCESS

A transmission path to directly connect an interexchange carrier (IC) terminal location in a LATA to the end user's premises, two IC terminal locations, or an IC terminal location and a central office wire center point being used as a converging point for wiring (HUB); or a HUB and an end user's premises. Special access includes all facilities dedicated to the subscriber. This kind of service is used for the provision of private line service.

SPECIAL REVERSE CHARGE TOLL SERVICE (SPECIAL COLLECT LONG DISTANCE SERVICE)

A service plan by which a subscriber can offer his customers in selected areas the privilege of calling him without payment of toll charges and without having to request that charges be reversed.

STANDARD JACKS

Company-provided data or voice jacks required by part 68 of the FCC Rules and Regulations for all connections of registered terminal equipment to the telephone network.

(M)

STATION

A unit of service, complete with all instrumentalities (e.g. telephone set, connecting block, inside wiring, protection apparatus, drop or block wiring) and lines (circuits), so arranged as to permit sending and receiving messages.

SECTION A1
Original Sheet 29

By: G.R. Barnes, President

Effective: February 8, 1983

EXPLANATION OF TERMS

STATION (Cont'd)

- c. Toll Station: A Company station installed for the convenience of the public or of a subscriber in a locality where the Company does not generally furnish exchange service and from which established long distance message rates are charged for all messages sent over the Company's lines.
- d. Toll Terminal: A Company station to which long distance service only is furnished; a toll terminal is furnished only where the subscriber retains one or more exchange stations.
- e. Main Station: The primary station, directly connected by means of an individual line or party line with a central office.
- f. Extension Station: An additional station connected on the same circuit as the main station and subsidiary thereto.

STATION JACKS

The jacks on a private branch exchange switchboard for the connection of station circuits.

STATION LINE

See EXCHANGE LINE.

STATION TERMINATION

The connection of the main station to the exchange access line through a standard plug, jack, or equivalent.

STATION-TO-STATION CALL

See LONG DISTANCE MESSAGE TELECOMMUNICATIONS SERVICE.

SUBSCRIBER

A person contracting for any form of exchange service furnished by the Company. A subscriber may also be the agent for multisubscribers when the exchange service is for residential individual line service and the service will be used by multiowners of the individual residential apartment, the individual residential condominium unit apartment, or the single-occupancy residential house.

EXPLANATION OF TERMS

SUPPLEMENTAL CONTRACT

A contract for service, equipment, or facilities in addition to that provided for under the original contract.

TELECOMMUNICATIONS SERVICE

The services offered by the Company accessing the exchange switching network, including, but not limited to those services covered by the General Exchange, Local Exchange, Message Toll, Wide Area Telephone Service, and Mobile Telephone Service Tariffs.

TELEPHONE ANSWERING SWITCHBOARD

An arrangement of jacks for terminating subscriber lines, either as a primary line or an extension of a primary line, for answering purposes only. Answering is accomplished by use of cord circuits equipped with cords, plugs, and keys.

TELEPHONE OR TELECOMMUNICATIONS NETWORK

The local telephone exchange and long distance message telecommunications facilities or network, both interstate and intrastate.

TELEPHONE NUMBER

A designation assigned to a main station, central office line, or private branch exchange station for convenience in placing calls and for identification in the assessment of message charges, etc. Such designation usually consists of a seven-digit number comprised of a three-digit central office code (name or numeral) followed by a four-digit station number.

GENERAL REGULATIONS

1. ESTABLISHMENT OF SERVICE

A. General

The general terms and conditions of this Tariff apply to local voice services and facilities furnished by Quincy Telephone Company, hereinafter referred to as the Telephone Company or Company, or in part by other companies. Failure to observe these terms and conditions could result in discontinuance of service.

B. Applications

- 1) Requests for telephone service and facilities made verbally, in writing, or electronically will become contracts upon the establishment of the service or facilities.
- 2) An application shall be deemed to be a notice to the Company that the applicant desires service and an expression of a willingness to conform to the terms and conditions set forth in this Tariff.
- 3) The Company reserves the right to refuse service to an applicant or customer who has not paid for prior telephone service rendered by a telephone company in the same or different location, and furnished to the same person, member of the same household, or legal entity until satisfactory arrangements have been made for payment of the indebtedness.
- 4) The Company reserves the right to refuse to furnish or continue to furnish service when service is applied for in the name of another person or legal entity, or a fictitious name of other member of the same household, for the purpose of avoiding payment of or for illegal purposes.
- 5) The Company does not take deposits or advanced payments unless stated elsewhere in this tariff.
- 6) Any change in the service terms, conditions, offerings, and/or rates modifies the terms of contracts to the extent of such change.
- 7) Although, in general, business rates apply at business locations and residence rates apply at residence locations, the determination as to whether customer service should be classified as business or residence is based on the character of use to be made of the service.
- 8) Where special conditions or special requirements of the customer involve unusual construction or installation costs, the customer may be required to pay a reasonable portion of such costs as stated elsewhere in this Tariff. See Charges Applicable under Special Conditions/Construction Charges.

QUINCY TELEPHONE COMPANY
d/b/a TDS TELECOM
Florida

Section A2
Second Revised Sheet 1.1
Cancels First Revised Sheet 1.1

GENERAL REGULATIONS

1. ESTABLISHMENT OF SERVICE (cont'd)

C. Business Use

- 1) Business rates apply whenever the use of service is primarily or substantially for any business, trade or professional use including, but not limited to, clubs or lodges, public or parochial schools and colleges, hospitals, libraries, churches, municipal emergency fire and police, government building and other similar institutions.
- 2) Where the place of business and residence of a customer are in the same premises and no telephone is installed in the place of business or the extension is located in a shop, office, or other place of business, the business rate shall be charged for telephone installed in the residence.
- 3) Business rates apply for service in churches when:
 - a) The telephone is located in the church and used in the administration of the church and its activities.
 - b) A telephone is located in an outer office of the study for the use of a secretary or others.
 - c) The telephone in the church includes a type of telephone intercommunicating system or a signaling system, (excluding hold only feature).
 - d) Service is furnished in a residence of a clergyman and one or more extension telephones connected to the service are located in the church where business rates would normally apply.

D. Residence Use

- 1) Residence rates apply when the use of service will be primarily for personal, social and domestic purposes and only incidental for business purposes. Residence rates apply to an individual or family, (such as single residence), or a private dwelling, apartment, rooming or boarding or sorority house, college dorm rooms, or a trailer, where service will be used by the customer or members of the customer's family.
- 2) Residence telephone numbers must not be advertised or listed in connection with any business.
- 3) Residence rates apply to churches when:
 - a) A telephone is located in the clergyman's residence.
 - b) The telephone is located in the church hall or kitchen and its use is for social or domestic purposes.
 - c) The telephone is located in the clergyman's residence and an extension is located in the church where residence rates would apply.

Section A2
First Revised Sheet 2
Cancels Original Sheet 2

GENERAL REGULATIONS

1. ESTABLISHMENT OF SERVICE (Cont'd)

D. Residence Use (cont'd)

- 4) When conditions in 1, 2, or 3 preceding are met, the residence telephone may be listed in the alphabetical section of the directory in the name of the church or Pastor. An additional alphabetical listing which lists either the name of the Pastor or the church may be provided at the rates shown under Directory Listings in this Tariff. Residence rate treatment does not entitle the Church to a listing in the classified section of the telephone directory without additional charges.
- 5) When it is determined that a customer of residence service is using the service in such a manner that it should be classified and charged for as a business service under the above provisions, the Company will either revised the applicable rates charged to the customer or discontinue the service.

E. Minimum Contract Period

- 1) Unless otherwise specified elsewhere in the Company's tariffs, the minimum contract period for voice service offerings is one month from the date service is established at the same location.
- 2) The Company may require a contract period longer than one (1) month at the same location in connection with special facilities, or for unusual construction necessary to meet special demands, and involving extra costs.
- 3) Customer termination of service prior to the expiration of the minimum contract period of service may result in payment for work already began to provide service and/or termination charges.

F. Provisioning of Telecommunication Service

- 1) The Telephone Company's obligation to furnish service is dependent upon its ability to secure and retain, without unreasonable expense, suitable facilities and rights for the construction and maintenance of the necessary company facilities such as pole lines, buried lines, circuits and other equipment.
- 2) The Company will determine the type of outside plant facilities to be provided for the furnishing of service.
- 3) The Company will provide and install a connecting device as part of telephone service at no additional charge that will be installed on the customer's premises in a location determined by the Company that is accessible to the customer and the Company as a part of telecommunications service and at no charge, unless specified elsewhere in this tariff.
- 4) The rates and charges listed in this Tariff provide for the furnishing of service and facilities where suitable facilities are available or when the construction of the necessary facilities does not involve excessive costs.

GENERAL REGULATIONS

1. ESTABLISHMENT OF SERVICE (Cont'd)

F. Provisioning of Telecommunication Service (cont'd)

- 5) When excessive costs are involved for the construction of facilities, charges for such construction will be determined in accordance with the regulations as set forth in Section A5, "Charges Applicable Under Special Conditions".
- 6) The customer may be required to provide suitable housing or other protective measures where equipment is to be installed in locations exposed to weather or other hazards.
- 7) The Company shall make the following services available to all its customers where technically feasible:
 - a) Voice grade access to the public switched network including unlimited minutes for local service at no charge
 - b) Access to 911 emergency service and 9-1-1 operating ability where requested by local authorities.
 - c) Connectivity with all public toll, local wireline and wireless networks, and with various internet service providers.
 - d) Free access to toll restriction for qualifying lifeline customers.

G. Installation in Hazardous Locations

If the installation and maintenance of service are requested at locations which are or may be hazardous or dangerous to the Telephone Company's employees or to the public or to property, the Company may refuse to install and maintain such service and, if such service is furnished, may require the customer to indemnify and hold the Company harmless from any claims, loss or damage by reason of the installations and maintenance of such service.

H. Directories

- 1) The Company will provide access to directory information to its customers. The directory information will include listings of names, addresses and telephone numbers of customers.
- 2) The Company, except as provided herein, assumes no liability for damages claimed on account of errors or omission from the directories and, in accepting listings as prescribed by applicants or customers, will not assume responsibility for the result of the publication in the directory.

GENERAL REGULATIONS

2. USE AND CARE OF COMPANY FACILITIES

A. General

- 1) The Company shall be responsible for the installation, operations, and maintenance of any company facilities.
- 2) The Company will be responsible for testing the circuit from the main frame to the connecting device on the customer premises.
- 3) The Company does not undertake to transmit messages but offers the use of its facilities when available for communications between its customers.
- 4) Customers who furnish telephone service to guests or patients may recover billed charges of the guests or patients. Hotel customers who charge a surcharge on guests' telephone usage must post such rates and surcharge by each telephone.

B. Ownership of Facilities

All facilities up to and including the point of termination on the customer's premises will be owned by the Company, except where such facilities are situated, in the judgement of the Company, in hazardous or inaccessible locations.

C. Access to Customer Premises

Company employees and agents shall be allowed access to company facilities located on customer premises at any reasonable hour for the purpose of installing, inspecting, testing, maintaining, repairing, or upgrading the lines and facilities.

Customers may be required to furnish, at no charge, equipment space and electrical power for Company facilities located inside the customer's building in order to provide services.

D. Installation, Maintenance, and Repairs

- 1) All work associated with installation, relocation, changing, repairing, and maintenance of Company provided equipment and facilities on the Customer's premises is performed by the Company or an authorized agent unless agreed upon by the Company.
- 2) The Company will maintain and repair the equipment and facilities which it furnishes to customers, for as long a period as replacement components are available from the manufacturer or from stock. When the manufacturer will no longer provide the required components, and none are available from stock, components required will be provided at charges based on cost when the Company is able, by special manufacture or procurement from outside sources, to procure the required components.
- 3) The Company will be reimbursed for any loss or damage to its facilities on the customer's premise resulting from intentional destruction or negligence of the customer.

2. USE AND CARE OF COMPANY FACILITIES (Cont'd)

E. Service Interruptions

- 1) The Company cannot guarantee the uninterrupted working of its services and facilities. The Company will make reasonable effort to notify customers of any known service interruptions.
- 2) The Company will make reasonable effort to re-establish service within the shortest possible time when service interruptions occur. In the event of national emergency or local disaster resulting in disruption of service, the Company will give priority based on instructions or requests from duly authorized emergency agencies.
- 3) When there is a general interruption of service, which is not due to the negligence or willful act of the customer or force majeure; a credit may be provided to the Customer for services rendered inoperative.

F. Telephone Numbers

- 1) The customer has no property right in telephone numbers or any right to the establishment of continuous service through any particular central office.
- 2) The Company reserves the right to, and may at its sole discretion; change either the customer's telephone number, the central office associated with such number, or both, as may be required for the proper conduct of its business in compliance with state and/or federal requirements, and not as an accommodation to another customers..

3. USE OF SERVICE

A. General

- 1) Service is furnished for use by the customer as long as the following conditions do not exist:
 - a). When there is danger to company facilities, company employees, or to other customers; service;
 - b). When service is used for any unlawful purpose presented by:
 - (1) A government law enforcement agency, acting within its jurisdiction, advises the Company that such service is being used or will be used unlawfully or for an unlawful purpose, or
 - (2) A court order; or
 - (3) A regulatory authority order; or
 - (4) The Company having other information, which reasonably causes it to believe that such service is being used or will be used unlawfully or for an unlawful purpose.
 - c). When a customer uses equipment in a manner that adversely affects the company's equipment, or interferes with another customer's service, or prevents another person from using the service, or otherwise impairs the quality of service to other customers.
 - d). When a customer tampers with company facilities.
 - e). When service is not obtained fraudulently or without authorization or is used in a fraudulent manner or with malicious intent.
 - f). When a customer does not comply with the terms and conditions of the Company or with contractual obligations.
 - g). When a customer does not allow the Company reasonable access to its equipment and property for the purpose of installation, maintenance, repair, and upgrades.
- 2) If any of the above conditions exist, the Company may refuse to furnish service to an applicant or may disconnect the service of a customer.
- 3) The Company reserves the right to limit the length of communication when necessary because of a shortage of facilities caused by emergency conditions.

B. Resale

The resale of any local service provided by the Company is not permitted except as provided elsewhere in this tariff or as specifically authorized by the Company.

3. USE OF SERVICE (cont'd)

C. Customer Responsibility

- 1) The customer subscribing to telephone service is responsible for its use and for the payment of all charges in connection therewith, and shall exercise such control as may be necessary to insure that it is not improperly used.
- 2) The customer or authorized user may not rearrange, disconnect, remove or attempt to repair any company provided facilities except upon the written consent of the Company. The customer agrees to notify the Company at least 90 days in advance to request rearrangement of Company's facilities located on the customer's premises. The customer may be charged for such changes.
- 3) The customer shall be responsible for damages to facilities of the Company caused by the negligence or willful act of the customer or authorized user.
- 4) The customer will be solely responsible for any loss or damage, or for any impairment or failure of the service, arising from or in connection with the use of customer-premise equipment or facilities.
- 5) The Company does not monitor recordings of telephone conversations between its subscribers and other end-users or the use of automatic recording devices. Any customer recording telephone conversations or using automatic recording devices is responsible for the proper use and for adhering to the regulations governing such use.

D. Customer Provided Equipment and Inside Wire

- 1) The customer shall be responsible for the installation, operation, or maintenance of any customer-provided equipment and inside wire. The customer-premises equipment and inside wire would be connected to the general exchange network facilities of the Company by means of suitable connecting arrangements.
- 2) Any customer-premises equipment connected to the Company's facilities shall not interfere with any of the services offered by the Company.
- 3) The use of customer-premises equipment shall not
 - a) endanger the safety of the Company employees or the public
 - b) damage, require changes, or alter the equipment or facilities of the Company
 - c) interfere with the proper functioning of such equipment or facilities
 - d) impair the operation of the telecommunications system
 - e) injure the public in its use of the Company's services

Section A2
Third Revised Sheet 7
Cancels Second Revised Sheet 7

GENERAL REGULATIONS

3. USE OF SERVICE (cont'd)

D. Customer Provided Equipment and Inside Wire (cont'd)

- 4) Upon notice from the Company that the customer-premises equipment is causing or is likely to cause hazard or interference, the customer shall make the necessary change(s) to remove or prevent such hazard or interference or be subject to temporary discontinuance of service as long as the condition exists.
- 5) Except as otherwise provided in this tariff, nothing herein shall be construed to permit the use of a device to interconnect any line or channel of the Company with any other communication line or channel of the Company or of any other person.
- 6) Customer Premises Equipment is not to be used for performing any part of the work of transmitting, delivering or collecting any messages where any toll or consideration has been or is to be paid any party other than the Telephone Company, without the written consent of the Telephone Company. Customers, who furnish telephone service to guests or patients, may recover billed charges of the Telephone Company for local and toll messages placed by guests or patients.

E. Change in Responsibility or Occupancy

- 1) At least 3 working days advance notice must be provided to the Company to discontinue service or to change occupancy or to change account responsibility.
- 2) The customer whose service is being rendered shall be responsible for all Company services provided and/or consumed up to the scheduled date of service discontinuance.
- 3) Existing service may be transferred for a new subscriber only if the former subscriber consents and an agreement acceptable to the Company is made to pay all outstanding charges against the service.
- 4) Change of responsibility on an account shall occur only in those cases where both parties previously shared service or when it is mutually agreed upon and acceptable to the Company.

F. Customer Complaints

- 1) When there is a customer complaint, the Company will do the following:
 - a) Promptly investigate each customer complaint it receives;
 - b) Report the findings of the investigation to the customer within a reasonable time;
 - c) Make a good faith effort to resolve the complaint within a reasonable time dependent on the urgency of the complaint; and
 - d) Retain a record of the complaint for 3 year.
 - e) The Company will inform the customer of the right to appeal the results of the investigation with the appropriate regulatory authority.

GENERAL REGULATIONS

3. USE OF SERVICE (cont'd)

G. Company Liability

- 1) The Company is not responsible for the actions of one end-user customer upon another end-user customer. Such actions will be left for the legal authorities to handle.
- 2) The Company shall be indemnified and saved harmless by the customer or customers against claims for libel, slander, or the infringement of copyright arising directly or indirectly from the material transmitted over the facilities or the use thereof; against claims for infringement of patents arising from combining with, or using in connection with, facilities furnished by the Company, apparatus and systems of the customer; and against all other claims arising out of any act of omission of the customer in connection with the facilities provided by the Company.
- 3) The Company is not liable for damages for any accident, injury, or death from its facilities and apparatus when such accident, injury, or death is not due to the negligence of the Company.
- 4) When suitable arrangements can be made, the Company will connect with other companies to provide service outside the local exchange area. The Company is not liable, for the operations of other companies with which its facilities are connected in order to provide service to the customer.
- 5) The Company's liability, if any, with respect to any other claims or suits by a Customer or by any others for damages associated with the installation, provision, termination, maintenance, repair, or restoration of service, shall not exceed an amount equal to the proportionate part of the monthly recurring charge for the service for the period during which the service was affected. This liability shall be in addition to any amounts that may other-wise be due the Customer under this Tariff as an allowance for interruptions.
- 6) The Company is not liable for any defacement or damage to the customer's premises or claims for infringement of patents arising or resulting from the furnishing of service or the attachment of its equipment and associated wiring furnished by the Company on such premises.
- 7) The Company shall not be responsible to the customer or otherwise if changes in the criteria or in any of the facilities, operations or procedures of the Company render any customer provided facilities obsolete or require modification or alteration of such facilities or otherwise affect its use or performance.

GENERAL REGULATIONS

3. USE OF SERVICE (cont'd)

G. Company Liability (cont'd)

- 8) The customer indemnifies and saves the Company harmless against any accident, injury or death caused through the use of telephone apparatus which fail to meet the dielectric requirements as established by the Company when such apparatus is provided by the customer. The Company has the right of refusing to, or ceasing to, render telephone service to a customer if at any time any of the telephones, appliances, lines or apparatus on the customer's premises shall be considered unsafe by Company personnel, or if the use of the service shall be prohibited by or forbidden under any law, ordinance or regulation.
- 9) The customer also agrees to release, indemnify and hold harmless the Company for any infringement or invasion of the right of privacy of any person or persons, caused or claimed to have been caused, directly or indirectly, by the installation, operation, failure to operate, maintenance, removal, presence, condition, occasion to use of E911 service features and the equipment associated therewith, or by any services furnished by the Company in connection therewith, including but not limited to, the identification of the telephone number, address or name associated with the telephone used by persons accessing 911 service thereunder, and which arises out of the negligence or other wrongful act of the customer, its user, agencies or municipalities, or the employees or agents of any one of them.
- 10) Under no circumstances shall the Company or its officers, directors, employees or agents have any liability to the county, a person placing an emergency call on the system or to any other person or entity for any loss, damage, injury or liability which they may suffer, sustain, incur or become subject to, arising out of, based upon or resulting from any negligence on the part of the telco or its officers, directors, employees or agents in preparing or furnishing, or any delay in preparing or furnishing any E911 listings and/or updates to the county and/or in responding to an emergency call, including but not limited to any death or bodily injury or any direct, indirect, incidental, special, consequential or other damages.
- 11) The liability of the Company for damages arising out of mistakes, omissions, interruptions, delays, errors or defects in transmission occurring in the course of furnishing service and not caused by negligence of the customer, shall in no event exceed an amount equivalent to the proportionate charge to the customer for the period of service during which such mistakes, omissions, interruptions, delays or errors or defects in transmission occur.
- 12) The Company shall not be liable for damages or statutory penalties in any cases where a claim is not presented in writing within thirty days after the alleged delinquency occurs.

Florida

Section A2
Second Revised Sheet 10
Cancels First Revised Sheet 10

GENERAL REGULATIONS

4. CUSTOMER BILLING AND PAYMENTS

A. General

- 1) Charges for service commence when the service is installed and connection is made, whether used or not.
- 2) The Company will collect from the customer the prevailing amount of taxes, surcharges, and other imposed fees upon them by local, state, or federal governments and regulatory authorities.
- 3) All service connection charges, recurring monthly charges, taxes, surcharges, fees, etc. will be billed in one month in advance. All long distance per message and per minute charges (if applicable) will be billed in arrears.
- 4) Charges for a fractional part of a month are prorated and computed on the basis of a 30-day month.
- 5) Bills to customers will be rendered monthly and will contain a clear listing of charges.
- 6) The customer is responsible for all charges in conjunction with the services furnished including originating toll calls and accepted collect calls at the customer's access line. Failure to receive bills or notices which have been properly sent shall not prevent such bills from becoming delinquent nor relieve the customer of the obligations therein.
- 7) Customers will not be held responsible for the nonpayment of another customer's bill unless the customer superseded the service or was a co-applicant or guarantor for the service of the nonpaid account.
- 8) Bills are due when rendered unless otherwise specified and are payable to the Company or to any agency duly authorized to receive such payments.
- 9) The Company will not bill the customer for delinquency in payments by a previous occupant of the premises other than a member of the same household residing at the same premises.

B. Overtime Work or Work Performed Outside Regular Working Hours

Unless specified elsewhere in this tariff, the rates and charges contemplate that all work for installations, moves or changes of service, equipment, facilities, or instrumentalities is performed during regular business hours. If the customer requests the work to be performed during non-business hours or the time allowed is insufficient to permit completion during regular business hours or the customer interrupts work once it's begun, the customer may be required to bear any additional costs incurred.

Section A2
First Revised Sheet 10.1
Cancels Original Sheet 10.1

GENERAL REGULATIONS

4. CUSTOMER BILLING AND PAYMENTS (Cont'd)

C. Promotions

From time-to-time, the Company, may offer temporary price reductions on monthly charges or waive non-recurring charges to promote certain services.
The description of each promotion will be listed in Section A9.

D. Notice of Service Changes and Rate Increases

The Company will follow the applicable rules for notifying customers of service changes and rate increases.

E. Electronic Billing

Customers may elect to view and pay their monthly telephone bill electronically via the Internet. The bill will include a summary of the current charges as well as totals by section/service. Customers who choose this option will stop receiving paper bills after two months. They may choose to resume receiving paper bills at any time without incurring a service charge.

F. Billing Errors and Adjustments

- 1) If the Company determines that the character of use of a service is not in accordance with the class of service contracted for, the Company may require the customer to contract for the proper class of service and retroactively bill for the appropriate class of service.
- 2) When billing errors are brought to the attention of the Company, the Company will provide retroactive billing adjustments to customers as follows:
 - a) *Over billed*: The Company will provide either a credit applied to the next available bill or a reimbursement for charges that were over billed to the customer, including any applicable taxes, surcharges, etc. from the preceding 2 months that the billing error had occurred.
 - b) *Under billed*: The Company will add the additional charges that were under billed or missing, including any applicable taxes, surcharges, etc. from the preceding 2 months that the billing error had occurred to the customer's next available bill. The Company may provide an option to pay the additional charges in equal monthly installments not to exceed 2 months.

Florida

Section A2
First Revised Sheet 11
Cancels Original Sheet 11

GENERAL REGULATIONS

4. CUSTOMER BILLING AND PAYMENTS (Cont'd)

G. Billing Disputes

- 1) Unless the Company receives a dispute within 60 days of the bill date, the items and charges appearing on the bill shall be deemed to be correct and binding upon the customer.
- 2) When a customer disputes a charge or charges on the bill, in no way does this relieve the customer from obligation of paying the undisputed charges.
- 3) The Company will do the following:
 - a) Promptly investigate each customer complaint it receives;
 - b) Report the findings of the investigation to the customer within a reasonable time;
 - c) Make a good faith effort to resolve the complaint within a reasonable time dependent on the urgency of the complaint; and
 - d) Retain a record of the complaint for 1 year.
 - e) The Company will inform the customer of the right to appeal the results of the investigation with the appropriate regulatory authority.
- 4) If the results of the Company investigation indicate the customer is obligated to pay, the customer shall submit payment within five (5) working days to the Company or its duly authorized agents for the disputed amounts. Failure to make full payment shall be grounds for termination of service.
- 5) If the results of the Company investigation indicate the Company is obligated to credit the customer for any portion of the disputed bill, the Company will apply the appropriate adjustment on next available bill.

H. Late Payment Charge

- 1) A Late Payment charge of 1.5% per month applies to all past due balances. Late Payment charges will not apply to previous Late Payment charges or other unpaid penalty charges.
- 2) Customers with a past due balance that sign up for electronic payments will receive a one-time waiver of the late payment charge.
- 3) Final collection procedures and temporary disconnection of service are unaffected by the application of a late charge. The late payment charge does not extend the time for payment or otherwise enlarge or change the rights of the customer. Notice of intention to pay late will not avoid this charge.

I. Non-Sufficient Funds (NSF) Charge

A charge of \$20.00 per incident will be assessed when a customer's payment for service becomes dishonored, is not valid, or is rejected.

4. CUSTOMER BILLING AND PAYMENTS (Cont'd)

J. Service Restoration

The Company will restore service that has been temporarily disconnected for non-payment upon payment of all applicable charges including a Reconnect for Non-Payment Charge. Service that has been fully disconnected will be restored upon payment of applicable charges and on the basis of a new application.

K. Deferred Payment Arrangements

- 1) A Deferred Payment Agreement may be available to residential customers unable to pay an outstanding bill in full. The terms include a reasonable initial payment and installment payments to be paid over a specified number of months not to exceed 6 months.
- 2) No finance charges apply.
- 3) Any payment made by a customer in compliance with a Deferred Payment Agreement will be applied to payment of the previous outstanding bill with any remainder credited to the current bill.
- 4) If a customer fails to fulfill the terms of a Deferred Payment Agreement, the Company shall have the right to disconnect service upon at least five (5) calendar days written notice and under such circumstances the Company shall not be required to offer subsequent negotiation of a Deferred Payment Agreement prior to disconnection.

L. Contractual Service Arrangements

- 1) The Company may offer unique Contract Service Arrangements for services not available through this tariff or for deviations to the rates or conditions for services contained in this tariff.
- 2) Unless specified differently in the contract, the regulations listed in this tariff will apply.
- 3) Specific rates, charges, and terms may be provided at a Company standard or developed on a non-discriminatory individual case basis.

GENERAL REGULATIONS

5. TERMINATION OF SERVICE

A. Termination By the Customer

A customer terminating service must notify the Company prior to the termination date, and is responsible for the payment of all charges incurred up to the termination date.

B. Termination By the Company For Cause

- 1) Except in case of danger to life or property, no disconnection shall be accomplished on a day the Company is closed or on a day preceding a day the Company is closed, on Saturdays, Sundays, legal holidays, or on any other day in which the Company cannot reestablish service on the same or following day.
- 2) The Company may terminate service to a customer *without* providing a written notice in the following instances:
 - a) When there is existence of immediate danger or a condition that is hazardous to life, physical safety, or property.
 - b) When a customer uses equipment in such manner as to adversely affect the company's equipment or the company's service to others.
 - c) When a customer tampers with company facilities.
 - d) Obtains service fraudulently or without authorization or uses services and/or facilities for fraudulent purposes such as, but not limited to, avoiding payment.
 - e) Engages in unauthorized resale of equipment or service
- 3) The Company may either temporarily deny service or terminate service to a customer after the Company provides (5 days) written notice to the customer to comply with the violation listed below, but the customer does not comply:
 - a) Fails to provide the Company reasonable access to its equipment and property.
 - b) Fails to comply with the terms and conditions of service offerings and/or violation of Commission rules.
 - c) Fails to comply with contractual obligations.
 - d) When there is knowledge that the service is being or will be used for unlawful purposes, or upon order by any court, the Commission, or any other duly authorized public authority.

5. TERMINATION OF SERVICE (Cont'd)

C. Disconnect for Non-Payment

- 1) When a customer does not pay an entire bill by the due date, excluding charges that are in the process of being disputed, or made payment that was rejected for insufficient funds, the Company will temporally disconnect service and send a written notice regarding full disconnect. To avoid termination of service, a customer must pay all charges due including Non-Sufficient Funds charge, Late Payment Fee plus any applicable Reconnection charges or negotiate a Deferred Payment Arrangement within 5 days after the date of the written notice.
- 2) The Company may attempt to make at least one telephone call to the customer prior to disconnecting service.
- 3) If the customer does not pay the entire bill or contact the company to make payment arrangements by the termination date, service will be fully terminated. Any payment received after service has been fully terminated, will be considered a new application for service and installation charges may apply.

D. Contract Termination

- 1) Unless specified elsewhere, contracts for service or facilities may not be terminated except upon advance notice, written or verbal, to the Telephone Company, at which time all unpaid charges or guarantees for the period the service or facilities have been furnished plus all applicable minimum and termination charges are due and payable.
- 2) The customer is required to pay only the charges for the period during which service or facilities have been furnished. Minimum or termination charges will not apply when the use of the service or facilities is terminated because of the condemnation, destruction, or damage or property by fire or other cause beyond the control of the customer which renders the premises unfit for occupancy.

E.. Prohibitions Against Disconnection

- 1) Service may not be refused because of a delinquent account if the customer or applicant agrees to a Deferred Payment Agreement.
- 2) The Company may not disconnect or refuse service for the following reasons.
 - a) Delinquency in payment for service by a previous occupant of the premises to be serviced other than a member of the same household residing at the same premises.
 - b) Failure to pay for a different type of or class of utility service.
 - c) Failure to pay the account of another customer as guarantor thereof.
- 3) The Company will not refuse or terminate service for nonpayment of an Non-Sufficient Funds charge.
- 4) The Company will not refuse or terminate a customer's Lifeline local service so long as the charges, taxes, and fees applicable to dial tone service plus local usage, touch tone charges, emergency 9-1-1, and relay service is paid.

**RE: TL718, Quincy Telephone Company
Add Safety Line Service for Business Customers**

Dear Ms. Salak:

The purpose of this letter is to advise the commission that Quincy Telephone will be offering a mixed bundle called Business Safety Line Service. Safety Line is an optional bundle for business customers who have their main telephone service with a wireless provider but, require a landline for emergency back-up and high speed data. The bundle includes a Basic Access line and 1.5 MBPS of high speed data at a monthly rate of \$59.00. Other data speeds may be available for an additional charge.

Safety Line Service will be provisioned where facilities are available. No other optional services or features are allowed with this bundle, except Toll Restriction, Toll Restriction PIN Override, Non-Published Numbers, and Non-Listed Numbers. These four services will be allowed at the rate listed elsewhere in the tariff.

Customers must subscribe to TDS Long distance Corporation as their long distance provider and will be billed at TDS Long Distance toll rates. Service Connection Charges will be waived if a customer signs a 1 year or greater contract. Seasonal Service and Optional Call Plans are not available with this bundle offering.

If you have any questions, please call me at (608) 664-4186.

Sincerely,

Kris A. Groth
Tariff Administrator

**RE: TL718, Quincy Telephone Company
Add Safety Line Bundle**

Dear Ms. Salak:

The purpose of this letter is to advise the commission that Quincy Telephone will be offering a mixed bundle called Safety Line Service. Safety Line is an optional bundle for residential customers who have their main telephone service with a wireless provider but, require a landline for emergency back-up and high speed data. The bundle includes a Residential One-Party line and 1.5 MBPS of high speed data at a monthly rate of \$39.95. Other data speeds may be available for an additional charge.

Safety Line Service will be provisioned where facilities are available. No other optional services or features are allowed with this bundle, except Toll Restriction, Toll Restriction PIN Override, Non-Published Numbers, and Non-Listed Numbers. These four services will be allowed at the rate listed elsewhere in the tariff.

Customers must subscribe to TDS Long distance Corporation as their long distance provider and will be billed at TDS Long Distance toll rates. Service Connection Charges will not apply. Seasonal Service and Optional Call Plans are not available with this bundle offering.

If you have any questions, please call me at (608) 664-4186.

Sincerely,

Kris A. Groth

5. Total Talk Pack

A. General

1. Total Talk Pack is an optional service package. The package permits a customer to receive services and features for a flat monthly rate, for each Total Talk Pack subscriber line provided. Total Talk Pack includes the following services:¹

- a. Residential² or Business³ One-Party Line (includes Touch Tone capability) (C)
- b. Three-Way Calling & Call Waiting (Custom Calling Services)
- c. Caller ID Deluxe, Anonymous Call Rejection, & Priority Ringing (Advanced Calling Services)
- d. Inside Wire Protection Plan (deregulated service)

B. Conditions and Limitations

1. Rules, regulations, and limitations as specified elsewhere in the Company's tariffs for each individual service will apply as part of this bundle.
2. Total Talk Pack customers may terminate their enrollment in the Plan at any time upon notice to the company.
3. Unless terminated by the Total Talk Pack customer or the Company, a customer will remain enrolled in the Plan, as amended from time-to-time, with any applicable changes in rate, for as long as the Plan continues to be offered by the Company.
4. Service Charges, as described in Section A4 of this tariff, apply to requests for new and additional Total Talk Pack lines, and moves of existing lines. Service Charges will not apply when the Total Talk Pack replaces existing Local Exchange Service or if the customer requests a change from the Total Talk Pack back to Local Exchange Service.
5. Total Talk Pack customers are not eligible for discounts or promotional offerings (outside of this bundle) associated with the Custom Calling and Advanced Calling Services included in the Plan, unless specifically provided for in a promotional offering.

¹ Customers must also subscribe to TDS Long Distance's Total Talk Pack.

² This service is grandfathered to existing Residential customers effective January 7, 2009. The service will not be available to new customers after this date.

³ This service is grandfathered to existing Business customers effective December 30, 2010. The service will not be available to new customers after this date. (C)

C. MONTHLY EXCHANGE RATES (cont'd)

2. Residence and Business Main Service Rates (cont'd)

i. Bypass Message or Metered Rate Service

(C)

1. As specified in Section E7.4.2 of the Florida AST and Section B2.1.4.B of the Florida Private Line Tariff and when a special access line, intraLATA and interLATA, interexchange private line or private bypass facility is connected to a device capable of, and for the intention of, interconnecting the special access line, intraLATA and interLATA, interexchange private line or private bypass facility to the local exchange network, the exchange service rate associated with that device (e.g. a business one party or the PBX Trunk in case of a PBX) will be rated as message or metered service as specified below. This rate will only apply when certification procedures as described below are not met.

2. If, at the Company's discretion, the metered rate cannot be offered from the subscriber's serving central office, message rate will be offered.

3. Message or metered rate service is required for all exchanges at rates specified in Section A3.C.i.10). Rotary line charges are applicable where appropriate. All lines capable of carrying local traffic outgoing shall be charged when any one of the lines is interconnected through a device capable of, and for the intention of, interconnecting the group of exchange lines to the special access line, intraLATA and interLATA, interexchange private line or private bypass facility to the local exchange service for those who do not certify.

- 4) The rules and regulations applicable for exchange lines in sections A1, A2 and A3 apply to message or metered rate service.
- 5) Subscribers to message rate service are regularly billed in advance for the minimum monthly charges. Charges for message or metered rate service are billed monthly in arrears.
- 6) The minimum monthly rate will be the rate for the class of service as specified in paragraph A3.C.2. proceeding. There is no minimum monthly allowable usage for message units or metered units.
- 7) The total monthly bill will consist of the sum of the regular class of service rate plus the usage from either the message unit or the metered unit.
- 8) For metered calls, timing begins when the metered station goes off hook and is stopped when both parties disconnect.

BASIC LOCAL EXCHANGE SERVICE

OPERATOR SERVICES

(C)

1. General Description

Operator Services allow customers to complete calls within the local calling area with the assistance of an operator. The Customer dials "0" or "0+ NXX LINE" to get the operator. Charges include a per-call rate as well as a per-minute rate.

2. Definition of Calls

A. Billed to Third Number

When the Customer dialing the Operator requests the call to be billed to a third-party. The third party will need to accept the charges before the caller and the called party can be connected.

B. Collect Calls

When the Customer dialing the Operator requests the call to be billed to the called number.

C. Person-to-Person

When the Customer requests the Operator to complete the call to a specific telephone number and in addition requests to speak to a specific person, department, extension of an office, etc. Once the requested person, department, extension, etc. joins the call, the Operator will connect the call.

D. Station-to-Station

When the Customer requests the Operator to complete the call to a specific telephone number and is willing to speak to whoever answers the called number.

E. Call Completion

When the Customer requests the Operator to complete the call to a called number. This charge is in addition to other charges that may be assessed.

3. Terms and Conditions

A. Operator Services are available 24 hours, 7 days a week. Rates apply to any time of the day and any day of the week

B. Qualified customers with disabilities will not be assessed the charges

C. This service is not available on payphones.

4. Rates

A. The rates will be assessed on a per call basis.

	<u>Rate</u>
1) Operator Assisted Call, per call	\$1.20
2) Call Completion, per minute	\$0.20

SUSPENSION OF SERVICE

(T) (M)

A. General

This service allows a customer to retain their current phone number and associated services when they temporarily disconnect service. When the customer reconnects service they will receive the same phone number and associated services as when they previously held service.

B. Conditions

1. Customers may retain their current phone number for a minimum of one (1) month and a maximum of ten (10) months.
2. The customer must furnish a forwarding address for billing purposes.
3. The customer may purchase in advance the retention of the phone number if a forwarding billing address cannot be furnished.
4. Account Retention is available on all one-party residence lines and up to three one-party business lines subject to the availability of facilities.
5. The customer must have at least one month of regular telephone service paid prior to the establishment of Account Retention.
6. Account Retention may begin and terminate on any day of the month, provided notice is given sufficiently in advance for arrangements to be made.
7. The Company will not provide installations, moves, changes, or maintenance during the period when the customer is billed at the reduced rate.
8. Only two suspension periods will be allowed and shall not exceed ten months in any one calendar year nor exceed ten continuous months at any time regardless of the year.
9. The Company assumes no liability for failure of a calling party to reach the customer while on Suspension of Service.
10. The Company reserves the right to refuse Suspension of Service in the case of a customer whose account is delinquent.
11. The ten (10) month maximum does not apply to military personnel who are on active duty.

C. Rates and Charges

1. The monthly rate will be \$5.00 per Suspension of Service Account.
2. An establishment fee of \$10.00 will apply for the second subscription for Suspension of Service in one calendar year.

G. DIRECTORY ASSISTANCE SERVICE

1. General

Directory Assistance Service gives customers access to telephone numbers of individuals or businesses by dialing 555-1212, 4-1-1 or 1-4-1-1.

2. Definitions

- a. Local numbers are any NPA/NXXs within the customer's local calling area or home NPA.
- b. National numbers are any NPA/NXXs within the United States, Canada, Puerto Rico and the U.S. Virgin Islands, but outside the customer's local calling area or home NPA.

- c. Call Completion is when a customer requests that a call be completed to the number that was provided during the directory assistance call

(D)
(D)
(N)
(N)

3. Regulations

- a. A maximum of two requested telephone numbers are allowed per call.
- b. Rates will apply based on the NPA/NXX requested.
- d. Charges for Directory Assistance Service for requests of local and national numbers are not applicable to calls placed from customers whose physical, visual, or reading handicaps prevent them from using the telephone directory.

H. TELECOMMUNICATIONS ACCESS SYSTEM ACT OF 1991

Pursuant to passage of the Telecommunications Access System Act of 1991 by the Florida Legislature during the 1991 session, a monthly surcharge shall be imposed on all local exchange telecommunications company subscribers on an individual access line basis, except that such surcharge shall not be imposed upon more than 25 basic telecommunications access lines per account bill rendered. The Commission shall determine the amount of the surcharge; however, in no case shall the amount exceed 25 cents per line per month. The surcharge shall appear on the initial bill to the subscriber and be itemized at least once annually.

SERVICE CONNECTION CHARGES

A. GENERAL

1. Service Connection Charges are non-recurring charges for work performed by the Telephone Company in connection with customer-initiated requests for voice services. They apply to ordering, connecting, moving, changing, or rearranging of voice services.

B. SERVICE DESCRIPTIONS

1. Service Order Charge – Initial:
Initial Service Order charge applies to Company representative's time required to establish a new customer into the billing system.
2. Service Order Charge – Subsequent:
Subsequent Service Order charge applies to Company representative's time required in making changes to already established billing records due to a customer's service request.
3. Central Office Work Charge:
Central Office Work charge applies to Company representative's time required in making changes in the switch or with central office systems and equipment at the request of the customer. Work would include, but is not limited to establishment of service, adding lines, adding features, changing a telephone number, and moves.
4. Line Connection Charge:
A Line Connection charge would apply to Company representative's time working on the line between the central office and up to the pedestal, or the demarcation point such as the network interface device (NID) or Optical Network Terminal (ONT); or on a circuit between premises traversing company distribution plant.
5. Premise Visit Charge:
A premise visit charge applies for a Company vehicle deployment when a company representative is required to install lines or isolate trouble at the request of the customer. Also see Conditions and Limitations number 5.
6. Reconnect for Non-Payment:
This charge applies to work performed by the telephone company to reestablish service that has been disconnected for non-payment and where satisfactory arrangements were not made prior to the preparation of the disconnect.

SERVICE CONNECTION CHARGES

C. CONDITIONS AND LIMITATIONS

1. Service Connection Charges contemplate work performed by the Telephone Company during normal work hours. Additional charges may apply to work performed outside of normal work hours at the request of the customer.
2. Service Connection Charges are in addition to recurring rates and any other charges applicable for voice services subscribed to by the customer. Service Connection Charges may apply in addition to special installation charges or construction charges as set forth elsewhere in Company's tariff.
3. Service Connection Charges are non-refundable unless the order is cancelled before work is begun or unless specified elsewhere in the Company's tariff.
4. One Service Order Charge (Initial or Subsequent) applies for all services requested at the same time for the same customer at the same premises.
5. A Line Connection and a Premises Visit will apply to service trouble that is determined to be in customer-provided equipment or inside wire, and the customer does not subscribe to Inside Wire Maintenance. No other Service Connection Charges apply.
6. The charges in this tariff do not include work related to the installation or repair of customer owned equipment or inside wiring.
7. The Company may waive Service Connection Charges from time-to-time as part of a promotion for new or existing products and services.
8. Service Connection Charges DO NOT apply to the following customer requests:
 - a. When a change is made and initiated by the Company, for the convenience of the Company, such as a change in grade of service, change in customer's telephone number, or in changes of service and facilities for continuation of satisfactory service.
 - b. Changes stemming from Company errors or to normal repair and maintenance performed on general voice service and associated equipment.
 - c. Re-establishing voice service at a secondary location immediately following the rendering of a customer's primary location as unfit for occupancy, due fire, flood, etc. At the option of the company, a different telephone number may be used.

CONSTRUCTION CHARGES

I. General

Construction charges are non-recurring charges applicable under certain conditions or for extending company facilities in order to provide telecommunication services. These charges are in addition to applicable charges for the class of service furnished, service connection charges, charges for moves and changes, and other charges that may be applicable.

II. Definitions

- A. Applicant
A residential customer applying for telecommunication services at a location that currently does not have facilities established.
- B. Application
A request to the Company for telecommunication services, as distinguished from an inquiry as to the availability or charges for such service.
- C. Construction Allowance
The portion of new construction and facilities that is provided at no charge.
- D. Costs
Costs associated with the construction of new facilities include, but are not limited to, engineering, labor, materials, equipment, government fees and charges, right-of-ways, road crossings, road boring, trenching, etc.
- E. Developer
An Applicant who is responsible for requesting placement telecommunications services in a new area for permanent residential and/or business telecommunications services prior to, or in conjunction with, a request for telephone service by a customer located in that new area. The area to be developed is defined as land which is divided or is proposed to be divided into 5 or more lots, parcels, or units.
- F. Easement
A right given to another person or entity to trespass upon land that person or entity does not own. Easements are used for roads, private property, etc. given to utility companies for the right to bury cables or access utility lines.
- G. Group Application or Project
A request for telecommunications services to 4 or less premises which are located one-half mile or less between each other by individuals who wish to establish telecommunications services at the same time.
- H. Line Extension
Company outside plant that is required to extend Company facilities and service beyond the existing facilities of the Company.
- I. New Construction
The placement of those additional facilities required to extend telecommunications services from the nearest existing working facility within the wire center to the Applicant(s) premises.

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

CONSTRUCTION CHARGES

(C)

II. Definitions (continued)

- J. Permanent Service
Service provided at premises that has a permanent foundation and permanent connections to basic utilities such as water, gas and electricity.
- K. Right of Way
Legal access to land not owned by the Company for the purpose of digging trenches, laying cable or planting poles.
- L. Service Drop
Service conductor six-pair or smaller delivering service to the customer premise from the service provider's last network access point.
- M. Special Construction
When an Applicant requests specific and/or unusual plant, equipment, or services to be installed.
- N. Temporary Construction
Service provided is for a limited time and there is no immediate prospect of reusing the plant.

III. Terms and Conditions

- A. This tariff applies to requests for extension of residential basic local exchange service.
- B. This tariff does not apply to the application requests listed below. The terms and conditions of these requests shall be governed by an individual contract to be developed between the prospective applicant and the Company:
 - 1. Applications for Extension of Service for Business Service;
 - 2. Applications for Extension of Service by residential customers for other than residential basic local exchange service, unless the Company chooses to treat such application under this tariff;
 - 3. Applications from Developers requesting service to developments.
- C. The Company will determine the location and type of plant facilities required to provide the quantity and class of service, and to meet quality of service standards unless other arrangements have been agreed upon.

New construction is based on actual route and average conditions that will enable the Company to extend service to Applicant(s) at a reasonable cost without adding an undue burden to the general body of existing customers.
- E. Where new construction is required, the Company will consult with other utilities to minimize construction costs (e.g., sharing trenches, poles, etc.).
- F. The Company will construct, own, and maintain outside plant facilities using standard specifications, engineering, design, and materials standards unless other arrangements have been agreed upon.

CONSTRUCTION CHARGES

(C)

III. Terms and Conditions (continued)

- E. Reinforcement of existing physical plant will be provided at the Company's expense except where facilities on private property are provided by the Applicant.
- F. Upon request by an Applicant for service; the Company will provide, without charge, a preliminary sketch and rough estimate of the construction costs to be paid by the Applicant(s).
- I. Any construction performed by the Applicant must be authorized and approved by the Company.
- J. The Company must receive a Service Order plus payment of any agreed upon construction charges before construction begins.
- K. An Applicant(s) ordering service at more than one premise is treated as separate Applications.
- L. The start and completion time will depend on when the Company can coordinate for joint engineering and construction with other utilities; and obtain the material, labor and facilities necessary to complete the new construction.
- M. When the Company receives a group application or project for telephone service, any applicable construction charges for shared facilities (less a Construction Allowance per premises) will be divided between the Applicants.
- N. The Company will provide the Applicant(s) the estimated construction charges to be paid by the Applicant(s) in writing. The estimated construction charges will be good for thirty days after the Company provides a bill to the Applicant(s).
- O. Construction Charges will be associated with the premises for which they were established rather than the Applicant(s). Credit for Construction Charges may not be transferred from one premise to another.
- P. A single Applicant's request may be combined with another Applicant or added to a Group Applicant/Project when there is one-half mile or less of construction between Applicants and/or the grouping results in lower charges (or no increase in construction charges) for all Applicants involved.
- Q. If an Applicant disconnects service, no refund or adjustment is made to the Construction Charge applicable to the Applicant's premises regardless of any future reconnection of basic telephone service by the Applicant or upon connection of telephone service to a new Applicant. Upon disconnect, any outstanding construction charge amounts become due and payable immediately. Charges to remaining Group Applicants will not be affected by disconnects.

IV. Rates and Charges

A. General

1. All Construction charges are payable at the time the application for service is signed or when the account is rendered based on estimated costs, unless other arrangements have been authorized by the Company.
2. The initial NID will be provided at no cost to the Applicant(s).
3. If a single or group applicant disconnects service, all outstanding construction charges will become due and payable immediately.

B. Construction Allowance

1. Each Applicant with an active service order request will be provided with a one-time construction allowance per premises of 1000 feet, which includes a maximum of 300 feet on private property.

C. Charges

1. The cost of construction above the allowance.
2. The Applicant may be responsible for some or all the costs associated with the following:
 - Detail of the estimate, if requested prior to the start of construction;
 - Securing, clearing, and retaining right-of-ways;
 - Specific or unusual plant facilities not normally provided by the Company;
 - Establishment and removal of temporary facilities or seasonal in nature;
 - Rearrangement, change or move of facilities after construction begins;
 - Clearing the ground where facilities are to be laid of trees, stumps and other obstructions plus excavating and backfilling;
 - Removing rock or other abnormal conditions that are encountered;
 - Installation of lines after curb and sidewalks or other obstructions are in place;
 - Overtime work at the Applicant(s) request;
 - Rearrangement or relocation of existing facilities at the customer's request

Effective: February 8, 1983

CHARGES APPLICABLE UNDER SPECIAL CONDITIONS

A. CONSTRUCTION CHARGES (Cont'd)

8. Underground Distribution System - Subdivisions (Cont'd)

- e. The distribution system will be constructed with suitable material to assure that the applicant will receive adequate telephone service for the reasonably foreseeable future.
- f. Any damages to the lines, equipment, or facilities of the Company caused by the customer, sub-divider, builder, developer, their agents, or representatives shall be repaired by the Company and charges associated with such repairs shall be paid by the customer, sub-divider, builder, or developer.
- g. The Company will install the underground distribution system at no charge to the applicant except that the applicant will be required to provide conduit of suitable size for the entrance facilities at multiple-occupancy buildings.
- h. The entrance conduit will be terminated in an accessible space of sufficient size to permit the termination of the entrance and interior facility. The space provided must also be equipped with grounding facility.
- i. A cash deposit may be required as a performance guarantee. When the deposit is necessary, it shall be the difference in cost of the facilities requested and the facilities which the Company would normally provide. This deposit would be equated on a pro rata basis for making quarterly refunds during the first five years after the construction completion. The refund amount would be determined by multiplying the quarterly increase in subscribers by the pro rata share. Quarterly refunds will be made during the first five years after construction completion or until such time as the deposit is depleted if prior to the five years. Any portion of the deposit remaining unrefunded after the fifth year will become the property of the Company. No interest will accrue on the deposit if refunded quarterly. If not refunded quarterly, interest will accrue on the refundable amount at the then current prime interest rate.

C. CONTRACT SERVICE ARRANGEMENTS

1. General

- a. When economically practical, customer specific contract service arrangements may be furnished in lieu of existing tariff offerings, to meet offerings by any competitive provider of the same, or functionally equivalent, non-basic services, as defined in Chapter 364.02(10) of the Florida statutes, in a specific geographic market or to a specific customer. (C)
- b. Rates, Charges, Terms and additional regulations, if applicable, for the contract service arrangements will be developed on an individual case basis, and will include all relevant costs, plus an appropriate level of contribution. (C)
- c. Costs for the contract service arrangements will include one or more of the following items:
 1. Labor, engineering, and materials
 2. Operating expenses, e.g., maintenance, administration, etc.
 3. Return on investment
 4. Taxes
 5. Depreciation
 6. Any other identifiable associated cost
- d. Unless otherwise specified, the regulations for contract service arrangements are in addition to the applicable regulations and rates specified in other Section of this Tariff.
- e. Contract Service Arrangements may be offered on any non-basic service, as defined in Chapter 364.02(10) of the Florida statutes, in this tariff that satisfies the requirements specified in this section of the tariff. Contract Service Arrangements may be offered for a basic service only if the basic service is offered as a part of a package with non-basic services. (C)

C. CONTRACT SERVICE ARRANGEMENTS (Continued)

1. General (Continued)

- f. Contract Service Arrangements are furnished by the Company to a subscriber only for communications in which the subscriber has a direct interest and shall not be used for any purpose for which a payment or other compensation shall be received by him from any other person, firm, or corporation for such use, or in the collection, transmission or delivery of any communication for others unless expressly authorized by state statute. Contract Service Arrangements will not be offered to other Common Carriers (OCC's) or other parties for the purposes of resale and/or shared use.
- g. The subscriber and the company may elect to enter into an agreement where certain rates and/or charges for contract service arrangements are applicable for a fixed period of time. The Company will continue to offer such contract service arrangements without change in the applicable rate and/or charges unless mutual consent has been reached between the Company and the subscriber to undertake such changes. At the completion of this period, the agreement may be renewed at the option of the Company and the subscriber. Revised rates and/or charges may apply to any renewed agreement. The Florida Public Service Commission has the right to modify the terms, conditions, rates, and charges during the period of the contract.

Florida

Section A6
Second Revised Sheet 1
Cancels First Revised Sheet 1

DIRECTORY LISTINGS

A. General

The alphabetical section of the telephone directory consists of a list of names of end users in alphabetical order and is designed solely for the purpose of informing calling parties of the telephone numbers of end users and those entitled to use the end user's service as an aid to the use of the telephone service. Any restrictions, changes or additions are provided for in this section.

B. Conditions and Limitations

1. The rates and regulations specified herein for directory listings apply only to the alphabetical section of the directory.
2. The company has the right to limit the length of any listing to one line in the directory by the use of abbreviations when the clearness of the listing or the identification of the customer is not impaired thereby.
3. A listing must conform to the Company's specifications with respect to its directories.
4. Listings are regularly provided in connection with all classes of exchange service except public telephone service.
5. The length of the contract period for directory listings where the listing actually appears in the directory is the directory period. The directory period is from the day that the directory is distributed to the customers to the day the succeeding directory is distributed to the customers, unless the listing no longer services the customer because of disconnection, removal, etc., of the service, the minimum contract period will be for at least 30 days. When the listing appears on information records only, the minimum contract period will be for at least 30 days.
6. The Telephone Company shall not be liable for damage claimed on account of errors in or omissions from its directories; nor for the result of the publications of such errors in the directory; nor will the Telephone Company be a party to controversies arising between end users or others as a result of listing published in its directories.
7. In cases of extra listing in the alphabetical section of the directory for which a charge is made, the Telephone Company's liability shall be limited to cancellation of the charges and refunding of any charges to the customer in question.
8. Listings are furnished only as specified for the various services mentioned in this section. Listings which, in the opinion of the company, are not necessary in connection with any services or facilities not specifically mentioned in this section are not furnished either with or without charge.

DIRECTORY LISTINGS

C. Primary Listings

A Primary Listing, which may include the name, address and telephone number of the individual, organization, firm or corporation for whom the service has been contracted will be furnished at no charge.

1. Listings will be limited to such information as is necessary for the proper identification for the customer.
2. The length of a listing may be limited to the use of abbreviations where the clarity of the listing and the identification of the customer will not be impaired.
3. The Company may refuse to insert any listing, which in its judgment does not facilitate the use of the directory.
4. Primary business listings must be the name under which the subscriber is conducting business.
5. Business listings may include a designation descriptive of the business or profession if the name does not indicate the nature of the business.
6. Titles are permitted in business or residence primary service listings where required (M)
(M)

When two or more main station lines or private branch exchange trunk lines are consecutively operated, the first number of the group is considered the primary listing. Where two or more main station lines or private branch exchange trunk lines are consecutively operated, a primary listing may be made for each line. DID trunk numbers and trunk hunting lines listed will be charged the applicable listing charges for regular or additional listings.

D. Additional Listings

1. General
 - a. Additional listings for which a charge is made, are available to business and residence customers and are subject to the same regulations as Primary listings.
 - b. Additional listings must bear the same address and telephone number as the primary or regular listing. An exception to this may be made in the case of off-premises access lines that are located in other premises solely occupied by the customer, in which case, a different address may be listed. This exception is not permitted when the off-premise access line is located in the residence of an employee of the customer.

(T)

1. General (Continued)

- c. Additional listings must be contracted for by the customer who is responsible for the charges.
- d. Residence additional listings are available for other persons who are members of the customer's domestic establishment and occupy the same premises.
- e. After insertion of an additional listing in the directory, such listing shall not be discontinued during the life of the directory unless the telephone is also discontinued or the party having the additional listing moves from the premises in which the telephone service is located.
- f. Additional listings may come in various forms. Below are a few examples:
 - Reverse order of the individual names
Primary Listing: Jones, John & Mary 123 Main St.-----123-4567
Additional Listing: Jones, Mary & John 123 Main St.-----123-4567
 - Reference to certain other telephone numbers
Primary Listing: Joe's Garage 12 West Main St.-----555-1212
Additional Listing: After five and weekends-----555-1243
 - Reference to another listing
Primary Listing: Housing, City
Additional Listing: See Government-Planning and Development
 - Other information possibly listed on a separate line
 - Email address -Office Hours
 - Fax Number -Former name of a company
 - Residence number for a doctor, dentist, attorney, etc.

DIRECTORY LISTINGS

E. Non-Published and Non-Listed Numbers

(T)

1. General

At the request of the customer, a listing or listings (including name, address and telephone number) may be omitted or deleted from the telephone directory. The divulgence of the customer's telephone number to the public is dependent upon the type of service provided.

a) Non-Published Numbers

The customer listing is omitted or deleted from the telephone directory. Only the name and address of the customer will be carried in the telephone company records, and the number will not be given to any calling party.

b) Non-Listed Numbers

The customer listing is omitted or deleted from the telephone directory, but such listings will be carried in the telephone company information records and the number will be given to any calling party upon request.

2. Regulations

a) The Company shall not be liable should a non-listed or non-published telephone number be divulged inadvertently. When a non-published or a non-listed number is inadvertently published in a directory, the Company's liability shall be limited to and satisfied by a refund of any monthly charges that the customer has incurred for such service.

COIN TELEPHONE SERVICE

1. PAYSTATION SERVICE

A. GENERAL

Paystation Service provides telephone service to a customer-leased or owned paystation with or without coin collecting devices. A Paystation Access Line permits providers of such service to provide pay telephone service to the public.

B. DEFINITIONS

Coin Line Service - A standard dial tone first coin line for pay telephones. This service will include the following features: Coin Supervision, Central Office Blocking, Operator Screening and Selective Class of Call Screening. (N)
I
(N)

Coin Supervision - Provides signaling capability from the central office for paystations that do not have signaling capability within the telephone. This signaling capability provides operators and/or operator systems coin control.

Customer - For the purposes of this tariff, the customer is the Paystation Service Provider.

Network Interface Device - A company-provided jack or its equivalent. It is the point of connection between the Company owned wiring and wiring owned by the customer. For the purposes of this tariff, the network interface device will be installed at a location mutually agreed upon by the customer and the Company.

Originating Line Screening (OLS) - Enables operator service providers to determine whether there are billing restrictions on the exchange access line from which a call originates. OLS service delivers codes on operator assisted calls to identify calls originating from privately owned paystations, inmate locations, and hotels/motels, etc. Rates for this service are found in the appropriate interstate access tariff, when facilities and service are available.

Paystation Access Line - A basic coin transmission dial tone line. It is a line side connection from the local exchange switch to the point of demarcation at the customer premises.

Selective Class of Call Screening - Enables the customer to restrict outgoing operator-handled calls, placed over the Company's network, from the service point to only those calls which are charged to a called telephone, a third number or a calling card. Selective Class of Call Screening will be provided at the customer's option, where such facilities are available.

1. PAYSTATION SERVICE

C. RULES AND REGULATIONS

1. Paystation Service will be considered a business service for the purpose of applying the terms, rates and conditions found elsewhere in this tariff.
2. Only one paystation instrument may be connected to each Paystation Access Line. Off-Premise Extensions are not permitted.
3. The customer shall be responsible for the installation, operation and maintenance of any paystation instrument used in connection with this service.
4. Requests to Directory Assistance Service originated from paystations will be charged the applicable rate of the Directory Assistance Service Provider.
5. Directory listings may be provided under the regulations that govern the furnishing of listings for business customers.
6. Coin-free operator and emergency 911 access must be available from all paystations.
7. One directory will be distributed to the customer without charge for each paystation business exchange line.
8. The customer is responsible for the provision of booths, shelves, directories and all other ancillary equipment.
9. The customer shall be responsible for the payment of charges for all local and toll messages originating from or accepted at this type of service, including any Directory Assistance Calls. The Company shall not be liable for shortages of coins collected and deposited at the customer's paystation instrument.
10. The Company reserves the right to disconnect service when the customer does not comply with the F.C.C. and state rules and regulations related to paystation service and equipment.
11. The Multiline Business Subscriber Line Charge, found in the interstate access tariff, is applicable to all paystation access lines.

INTRALATA PRESUBSCRIPTION

INTRALATA PRESUBSCRIPTION

(N)

A. General

IntraLATA Presubscription is a procedure whereby a customer designates to the Telephone Company the carrier which the customer wishes to be the carrier of choice for intraLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. IntraLATA Presubscription does not prevent a customer, who has presubscribed to an intraLATA toll carrier, from using carrier access codes or additional dialing to direct calls to an alternative intraLATA toll carrier on a per call basis.

All intraLATA toll message calls are subject to IntraLATA Presubscription. An intraLATA toll message call is a completed call on the public switched network between the originating location and a terminating location within a given LATA, but outside the local service area of the originating location.

All 0- calls, calls to 1-HNPA-555-1212 or 555-1212, 411, 611, 911, Public Announcement Service calls (976-XXXX), and all local calls, including Extended Area Service (EAS) and Expanded Local Calling calls, are excluded from IntraLATA Presubscription. Calls using the 500, 700, 800 series, or 900 service access codes shall be routed in accordance with the North American Numbering Plan.

B. IntraLATA Presubscription Options

Option A: Customer may select any carrier choosing to provide intraLATA toll service as the presubscribed carrier for intraLATA toll calls subject to Presubscription.

Option B: Customer may select no presubscribed carrier for intraLATA toll calls subject to Presubscription which will require the customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

INTRALATA PRESUBSCRIPTION (Continued)

(N)

C. Rules and Regulations

Customers of record as of the effective date of this tariff will retain their current dialing arrangements until they request that their dialing arrangements be changed.

Customers of record or new customers may select either Options A or B for intraLATA Presubscription.

Customers may change their Option and/or their presubscribed IntraLATA toll carrier at any time subject to charges specified in Paragraph D.2. below.

D. IntraLATA Presubscription Charges

1. Applications of Charges

Customers will be allowed to make an initial PIC free of charge during the first **one hundred and twenty (120) days** following the implementation date. After the initial PIC or the lapse of the first **one hundred and twenty (120) days** period, charges will be levied for each subsequent change of IntraLATA PIC.

New local service customers will be asked to select a carrier(s) for their intraLATA toll and interLATA calls subject to Presubscription at the time they place an order with the Telephone Company for local exchange service. If the new customer is unable to make a selection, at that time, the new customer will be read a random listing of all available intraLATA toll carriers to aid their selection. If the new customer is still unable to make a selection at that time, the Telephone Company will inform the new customer that he/she will be given ninety (90) days in which to inform the Telephone Company of an intraLATA toll Presubscription carrier choice at no charge. The new customer will also be informed that the Telephone Company will assess a charge for any selections made after the ninety (90) day window and that until such a selection is made, the customer will be required to dial a carrier access code to route all intraLATA toll calls.

After a customer's initial selection for a presubscribed intraLATA toll carrier, for any change thereafter, an IntraLATA Presubscription Change Charge, as set forth in Paragraph D.2 will apply. The applicable Presubscription charge for each interLATA PIC Change submitted is set forth in the National Exchange Carrier Association Tariff FCC No. 5, Section 13.4.

INTEGRATED SERVICES DIGITAL NETWORK

A. GENERAL

(N)

+

1. Integrated Services Digital Network (ISDN) describes the end-to-end digital telecommunications network architecture which provides for the simultaneous access, transmission and switching of voice, data, and video services. These functions are provided via channelized transport facilities. The ISDN architecture consists of digital switching systems which connect Basic Rate Interface (BRI) lines to their serving central office. Caller ID - Number is included with this service.
2. BRI is an optional service arrangement which can be used in conjunction with a customer's Individual Line Business or Residence service. It uses the ISDN architecture to provide the customer with the capabilities of simultaneous access, transmission, and switching of voice, data, and video services via channelized transport. In addition, BRI provides the customer with access to Circuit Switched Voice Service, Circuit Switched Data Service, and Packet Switched Data Service.
3. A BRI arrangement obtains its capabilities from a properly equipped telephone company central office switch. The BRI arrangement may consist of up to two "B" channels and one "D" channel (2B+D).
 - a. "B" Channel: The "B" Channel is a bi-directional synchronous channel capable of supporting 64 kilobit per second (kbps) of digital transmission of information between users. The "B" Channel be configured to offer voice service, data service or voice/data service.

INTEGRATED SERVICES DIGITAL NETWORK

A. GENERAL (Continued)

(N)

3. a. B-Channel (Continued)

One Primary Directory Number with one Primary Directory Listing for the first "B" Channel ISDN Service line is provided. Additional listings may be provided as specified for Additional Listing Service in the Directory Listings section of this Company's tariff.

b. "D" Channel: The "D" Channel is a 16 kbps digital signaling channel that carries signaling and control for the "B" channel and has maximum packet transmission throughput of 9.6 kbps.

4. All ISDN Service lines consist of central office facilities, including the outside plant facilities, extended from the Company's switching equipment to the customer's demarcation point.

5. ISDN Service is provided at the option of the Company, and is furnished subject to central office switching capacity and the availability of outside plant facilities. The availability, functionality and capabilities of the ISDN Service features may vary, or may not be available dependent upon type of serving central office switch, related software controlling that switch and associated outside plant.

6. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of ISDN Service render any facilities provided by the customer obsolete or require modification or alteration of such customer's equipment or systems, or otherwise affect its use or performance.

INTEGRATED SERVICES DIGITAL NETWORK

B. SERVICE DESCRIPTION

1. **CIRCUIT SWITCHING** - Circuit Switching is a switching technique in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of time slots is dedicated to a given call. Circuit Switched Service provides the ability to originate and receive circuit switched voice, data and voice/data calls over a 64 kbps "B" channel.

(D)
|
(D)

The customer may choose among the following Circuit Switched features based upon application needs.

a. **Electronic Key Telephone Service (EKTS) Features:**

Electronic Key Features provide the customer with the ability to access the following features where available:

(i) **Multiple Call Appearances of a Directory Number**

An arrangement that allows the user to have appearances of the directory number assigned to the customer-provided set, providing the capability of multiple incoming or outgoing calls associated with that directory number. Multiple incoming calls to this directory number or secondary telephone number (if purchased) can be terminated to the telephone if one or more idle call appearances are available to accept the calls. In certain central offices, this arrangement may impact the use of the Shared Call Appearance feature.

1. CIRCUIT SWITCHING (Continued)

a. Electronic Key Telephone Service (EKTS) Features:
(Continued)

(ii) Shared Call Appearances of a Directory Number An arrangement that allows a directory number(s) from one customer-provided set to appear as a call appearance(s) on the customer-provided sets of other users. Bridging, an arrangement that allows the user to connect onto a currently active call, is included.

(iii) Analog Line Pickups

An arrangement that allows an ISDN set to provide coverage for an analog number(s). This arrangement is limited to analog numbers that are terminated in the same central office switch. This feature may limit the use of other features and/or functionality on the analog line. Bridging, an arrangement that allows the analog user to connect onto a currently active call, is included.

(iv) Privacy Release (Automatic Exclusion)

An arrangement that allows a customer to specify that no other user can bridge onto an existing call(s). On a call by call basis, this feature can be disabled to allow bridging to occur.

(N)

1. CIRCUIT SWITCHING (Continued)

+

a. Electronic Key Telephone Service (EKTS) Features:
(Continued)

(v) Manual Exclusion (Privacy)

An arrangement (opposite of Privacy Release) that allows the customer to restrict other stations from picking up an existing call on hold or bridging onto an existing call that is active at that station.

(vi) Intercom Calling - An arrangement that allows for ISDN station-to-station calls.

(vii) Bridging

An arrangement that allows the user to join an active call by pressing the active call appearance button. Bridging is inhibited if Manual Exclusion is activated on the terminal engaged in the active call.

b. Secondary Telephone Numbers

An arrangement that allows a customer-provided set to have access to an additional telephone number(s). The additional telephone number(s), or Secondary Telephone Number(s), may originate or receive calls independent of the customer-provided set's Primary Directory Telephone Number.

B. SERVICE DESCRIPTION (Continued)

(N)

+

2. ALTERNATE CIRCUIT SWITCHED VOICE SERVICE/CIRCUIT SWITCHED DATA SERVICE -Alternate Circuit Switched Voice Service/Circuit Switched Data Service provides the ability to originate and receive either Circuit Switched Voice calls or Circuit Switched Data calls over a single "B" channel but not simultaneously. This arrangement is available where technology permits. The features applicable to Circuit Switching Service are also applicable to this service.

C. INTRASWITCH PACKET SWITCHED DATA "D" CHANNEL SERVICE

Packet Switching is a technique in which packets of data are individually addressed and combined on a transmission path with other addressed packets. Packet Switched Data "D" Channel Service provides the ability to originate and receive X.25 packet data calls on an intraswitch basis. This arrangement provides a maximum throughput of 9.6 kbps. Each "D" channel packet terminal will provide logical channel up to the technical capabilities of the serving central office. Multiple packet calls can be active simultaneously by a user on a single "D" channel. Up to eight data terminals can be supported per Basic Rate Interface. Service includes one data telephone number.

1. Flow Control Parameter Negotiation - An arrangement that permits negotiation on per call basis of the flow control parameters. This feature automatically negotiates the maximum packet size and window size for each direction of data transmission. This can be presubscribed (fixed) or it can be established on a per call basis.

(N)

2. Throughput Class Negotiation - An arrangement that allows the calling data terminal to request specific throughput classes (bits/second) in the call request packet for both directions of data transmission.
3. Logical Channels - An arrangement that is a virtual circuit, offering multiple logical connections at the packet level of X.25. ISDN packet data service offers the ability to send and/or receive packet data calls on separate logical channels within one ISDN "D" channel. The logical channels can be assigned as permanent virtual circuits, incoming only, outgoing only, or two-way (incoming and outgoing).
4. Incoming Calls Barred - An arrangement that prohibits a data terminal from terminating an incoming call.
5. Outgoing Calls Barred - An arrangement that prohibits a data terminal from originating outgoing calls.
6. Closed User Groups - An arrangement that allows ISDN users to establish subnetworks of ISDN packet switching data users from which members can communicate with each other. The Closed User Group is established on a per line basis. The first member of a Closed User Group is included. Additional members are charged at the rate established in the rate schedule. Each data terminal in a Closed User Group can be arranged in one of the following modes:

- (a) Closed User Group with Outgoing Access

The data terminal makes outgoing calls only.

E. CUSTOMER PREMISE EQUIPMENT AND FACILITIES:

(N)

The customer is responsible for providing compatible premises equipment in order to utilize the ISDN offering. All customer-provided equipment used to interface with ISDN Service is required to conform with the Technical Reference Specification as used by the Company and is found in the following Technical References:

<u>Subject</u>	<u>Technical Reference</u>	<u>Voice Contact Available</u>
Basic Rate Interface	AT&T 235-900-341	1-800-432-6600
Customer Premises Planning Guide	AT&T 533-700-100	1-800-432-6600

The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provision of ISDN Service render any facilities provided by the customer obsolete or require modification or alternation of such equipment or system, or otherwise affect its use or performance.

F. SPECIAL CONSTRUCTION

Please refer to Section A5 of this tariff

An average amount of entrance and distribution facilities may be furnished by the Company provided the facilities are of the standard type normally furnished for the particular location or kind of service.

If additional entrance or distribution facilities are required; if the conditions are such as to require special equipment; if the installation is for temporary or semi-permanent purpose or if for any other reason the construction costs are excessive, the applicant shall be required to pay the costs over and above those applicable for a normal installation. Each special construction situation will be evaluated on an individual case basis.

INTEGRATED SERVICES DIGITAL NETWORK

2. PRIMARY RATE INTERFACE (PRI)

(N)

A. GENERAL DESCRIPTION

1. Integrated Services Digital Network (ISDN) is a public network-based set of communications services that make it possible to send, receive, and modify information using regular telephone facilities. ISDN provides end-to-end digital communications and gives the ability to transmit data and voice over the same telephone line simultaneously. This functionality is provided via channelized transport facilities. The ISDN architecture provides for Primary Rate Interface (PRI) which is typically used when a customer wants to connect large quantities of digital lines to the network.
2. ISDN-PRI uses the ISDN architecture to provide the customer with the capability to transmit voice and data simultaneously over the same digital facility. Under various optional arrangements, PRI provides the customer with access to Circuit-Switched Voice Services and Circuit-Switched Data Services.

B. PRIMARY RATE INTERFACE (PRI) SERVICE ARRANGEMENT

1. An ISDN-PRI arrangement connects an ISDN-capable Telephone Company central office switch to ISDN-capable customer premise equipment (CPE). Depending on the application, that CPE might be a PBX, a router, a multiplexer, etc. The PRI ISDN arrangement provides a total of twenty-four digital communications channels within a single physical facility. Twenty-three of these channels are called Bearer, or B Channels and they carry the actual voice or data. Another channel, called the Delta or D Channel, is used to transport signaling for the other 23 channels. This configuration is known as 23B+D.
 - a. **B Channel** - The B Channel is a bi-directional synchronous channel capable of supporting digital transmission speeds of 64 kilobits per second (kbps). Each B Channel of a PRI may carry:
 - (1) Circuit-Switched Voice
 - (2) Circuit-Switched Data
 - b. **D Channel** - The D Channel is a 64 kbps digital signaling channel that carries signaling and control for the B Channels.

INTEGRATED SERVICES DIGITAL NETWORK

2. PRIMARY RATE INTERFACE (PRI) (Continued)

B. PRIMARY RATE INTERFACE (PRI) SERVICE ARRANGEMENT (Continued)

2. **Primary Rate Access Facility** - The Primary Rate Access Facility provides a high capacity digital link over which the Primary Rate services are delivered. This facility is based on a 1.544 mbps DS1 carrier (T1 facility).
3. **Multiple PRI Arrangement** - There may be situations where more than 23 B Channels are needed at a particular customer premise. In those situations, multiple PRI facilities can be assigned to a PRI arrangement. With the multiple PRI arrangement, the D Channel in the first PRI facility is used to transport signaling for additional PRI facilities. The first PRI would be configured as 23B+D and the other PRIs would be configured as 24B. This use of Non-Facility Associated Signaling (NFAS) allows the overhead of the D Channel to be distributed over multiple PRI facilities, thereby increasing channel efficiency.
4. **D Channel Backup** - In Multiple PRI Arrangements, a second D Channel can be assigned (where available) as an automatic backup to the primary D Channel. This can be offered when more than one PRI is provided to the same customer in order to provide redundancy of the signaling channel.
5. **ISDN-PRI Failover Solution** - Allows a customer's incoming ISDN-PRI traffic to overflow to a predetermined alternate route in an out-of-service situation. The incoming traffic is forwarded to a remote call forward number and then forwarded to one or more basic access lines in a hunt group.

(N)
|
(N)

C. CIRCUIT SWITCHED SERVICE DESCRIPTIONS

Circuit Switching is a switching arrangement in which an entire circuit or B Channel is dedicated to a given call. The circuit is connected on a per call basis and can carry circuit-switched voice or circuit-switched data. Circuit switched related services include:

1. **Clear Channel Capability** - A characteristic of the transmission paths on the "B" channel that allows the full bandwidth on the "B" channel, 64 kbps, to be available to the customer. However, ISDN interconnection to non-ISDN equipped central offices will be potentially subjected to analog transmission or sub-rated to 56 kbps.
2. **Dedicated Trunk Groups** - The B Channels of a PRI can be dedicated for calls to and from the public network: Incoming, Outgoing, 2-way, Direct Outward Dialing (DOD) or Direct Inward Dialing (DID).

2. PRIMARY RATE INTERFACE (PRI) (Continued)

(N)

C. CIRCUIT SWITCHED SERVICE DESCRIPTIONS (Continued)

3. **Primary Rate Call-By-Call Service** - The Primary Rate Call-By-Call (CBC) feature offers access to additional services such as:

- Foreign Exchange,
- Tie Trunk,
- InWATS,
- and OutWATS

via the B Channels of an ISDN-PRI. With this feature, any B Channel on the PRI can be used to offer the above services on a per-call basis in addition to trunk calls to/from the public network (i.e., DOD/DID).

4. **Multiple Directory Numbers** - Each PRI includes an individual directory number. Additional directory numbers, a range of directory numbers, or several ranges of directory numbers can be optionally added.
5. **Advanced Calling Services** - ISDN-PRI can support access to the following Advanced Calling Services (also called CLASS services) from suitably equipped CPE:
- a. **Caller ID - Basic**- This feature allows the central office and the customer's equipment to communicate the calling party's directory number on calls carried by the Primary Rate service. The number can then be made available to be displayed on a properly equipped telephone set or adjunct equipment.

D. TECHNICAL SPECIFICATIONS

1. **Transmission Specifications** - The Primary Rate Access Facility provides a high capacity digital link over which the Primary Rate services are delivered. This facility is based on a 1.544 Mbps DS1 carrier (T1 facility) whose characteristics are as follows:

- Line Code = Bipolar 8 Zero Substitution (B8ZS)
- Framing Format = Extended Super Frame (ESF)
- Signaling = Q.931 Signaling
- Data Rate = 64 kbps clear or kbps restricted
- D Channel = 24th channel on the T1 facility

2. **Customer Premise Equipment (CPE) and Facilities** - Compatible CPE is required to utilize ISDN-PRI. All equipment used to interface with these services is required to conform with ISDN guidelines as referenced in the following Bellcore specifications:

<u>Document Number</u>	<u>Description</u>
TR-NWT-001268	ISDN Primary Rate Interface Call Control Switching and Signaling Generic Requirements for Class II Equipment
SR-NWT-002343	ISDN Primary Rate Interface Generic Guidelines for Customer Premises Equipment

The Telephone Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provisioning of ISDN services render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

E. REGULATIONS AND CONDITIONS

1. Unless specifically exempted, ISDN services shall be subject to all general regulations applicable to the provision of service by the Telephone Company as stated in the general tariff.
2. ISDN-PRI is provided at the option of the Company. These services are furnished subject to central office switching capacity, capability, and the availability of outside plant facilities.
 - a. The availability, functionality, and capabilities of ISDN-PRI may vary, or may not be available, dependent upon type of serving central office switch, related software controlling that switch and associated outside plant.
 - (1) Where facilities are not available, or unusual expenditures are involved in making them available, the customer may be required to pay additional charges to cover the unusual expenditure, or to contract for services beyond the normal service term, or both.
 - (2) Mileage Charges: Provision of the underlying PRI Access facility (T1) is mileage sensitive. As such, additional mileage charges may apply.
3. Payment for Service:
 - a. The minimum charge period for services provided under this tariff is one month.
 - b. The customer may choose to pay for the service on a month-to-month basis.
 - c. Suspension of service is not allowed.
4. Directory Listings: One directory listing is provided without charge for each ISDN-PRI customer. Additional listings may be provided as specified for Additional Listing Service in the Rates & Charges section of this ISDN-PRI tariff.

E. REGULATIONS AND CONDITIONS (Continued)

5. Billable Call Treatment: Normal toll charges (including InWATS and OutWATS charges) shall apply to calls that are made outside of the Local Service Area.
6. Customer Premise Equipment (CPE):
 - a. This tariff does not include terminal equipment on the customer's premises. Terminal equipment may be covered under a separate tariff, sold or leased separately by the Telephone Company (under a separate contract), or may be provided by the customer.
 - b. The customer is responsible for providing the power required for any and all CPE connected to an ISDN-PRI.
7. The Telephone Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failure, or malfunctions of ISDN services or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Telephone Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.
8. Service Establishment Charges do not apply for the establishment of the Communication Channels when the customer signs an agreement to subscribe to ISDN-PRI for a minimum of 3 years. If the customer discontinues service prior to the conclusion of the 3 year agreement, the customer will incur a disconnection charge equal to the Service Establishment Charges. The disconnection charge will not apply if the customer purchases other services from the Company which replace ISDN-PRI service.
9. PRI Service is provided for use by the end-user customer only as a local switched service. PRI service is not available for use by Commercial Mobile Radio Carriers, Private Mobile Radio Carriers, Inter-exchange Carriers, VoIP Service Providers or other carriers or providers for use in aggregating or transporting inter-exchange traffic. Such usage is strictly prohibited by this Tariff. Other services designed for and intended for such use are offered by the Company specifically via interconnection agreement or the Access Tariff.

SECTION A11

THIRD REVISED SHEET 1

CANCELS SECOND REVISED SHEET 1

Issued: May 5, 1989

Effective: MAY 15 1989

PRIVATE BRANCH EXCHANGE SERVICE

A. GENERAL

1. Private branch exchange service is provided by means of an arrangement of switching equipment and stations for intercommunicating among the stations in the system, and for connections through the local and long distance message telephone network to other customers.
2. The rates quoted herein for private branch exchange service contemplate the use of standard equipment. When equipment of a special type is desired, the determination of the rates to apply is based on the individual requirements of each case.
3. Private branch exchange service is furnished only upon conditions that seemingly justify the investment and where the reliability of the subscriber to carry out the agreement is reasonably assured.
4. All operation at the subscribers premises is performed at the expense of the subscriber and must conform with the operating practices and procedures of the Company necessary to maintain a proper standard of service.
5. Additional equipment or service required by a customer, but not covered herein this section, may be provided for use in connection with private branch exchange service to the extent that limitations and capabilities of the associated equipment permit. The rates and charges for such equipment or service shall be determined as set forth in other sections of this tariff.
6. The rates specified hereinafter apply for systems located inside the exchange area and for stations located within the same building as the switchboard. Extension line mileage charges apply for stations not located in the same building as the switchboard as specified in the "Miscellaneous Service Arrangements" section of this tariff. (C)
+
(C)
7. Provided that separate exchange service is also installed, private branch exchange stations may be located on premises of other than the subscriber. Such stations are to be used only for communication with such other stations as are connected with the private branch exchange.

PRIVATE BRANCH EXCHANGE SERVICE

A. GENERAL (Cont'd)

7. (Cont'd)

switchboard and located on the premises of the subscriber. Extension line mileage charges are applicable as stated in the "Miscellaneous Service Arrangements" section of this tariff.

8. Suitable commercial power including conveniently located outlets, necessary conduit required in the installation, adequate lighting, ventilation, and air conditioning, protective enclosures, and any other environmental conditions required for the operation of the equipment associated with private branch exchange service shall be furnished by the subscriber.

9. Private branch exchange service is available for business and residence service, and for service at hotels, motels, apartments, hospitals, and convalescent homes for the joint use of management and guests or patients. The management may subscribe for separate business service for its administrative use. Guests or patients may individually subscribe to separate residence service.

10. Rates and charges for private branch exchange trunks contemplate service to all stations within the local calling area of the exchange from which the service is provided without additional charge.

11. The rates and charges set forth herein contemplate that the power equipment, main frame, switching equipment, and consoles will be located in the same building on the customer's premises. If this condition is not met, additional recurring or non-recurring charges based on cost may be applicable. (C)

12. Foreign exchange service may be furnished in association with private branch exchange service.

13. Flat-rate private branch exchange service is available for business and residence service except for service at hotels to be used for guests' and patients' use. This service consists of flat-rate trunks and flat-rate stations to form the branch exchange system.

PRIVATE BRANCH EXCHANGE SERVICE

F. DIRECT INWARD DIALING (DID) SERVICE

1. General

The Telephone Company will provide, subject to the availability of facilities, Direct Inward Dialing (DID) Service. DID service provides for the completion of local and toll calls to associated station numbers without intermediate handling by an attendant.

2. Rates

- a. The rates and charges for central office trunk associated with Direct Inward Dialing (DID) Service are as found below:

	<u>Monthly Rate</u>	<u>NRC</u>
1. Direct Inward Dialing Trunk Termination per DID Trunk, each	\$14.70*	\$27.50**
2. DID Number Assignment Charge (per number)	\$0.55	-

* Associated monthly rates for trunks are applicable.

**These charges are in addition to all applicable service connections charges as found in Section A4.

3. Conditions

- a. The service is furnished subject to the availability of Central Office facilities and compatibility of customer-provided equipment.
- b. The service includes central office switching equipment for in-dialing from the exchange and toll network directly to stations associated with customer premises equipment.

(M)-Material previously appeared on Sheet 17 of this Section.

PRIVATE BRANCH EXCHANGE SERVICE

F. DIRECT INWARD DIALING (DID) SERVICE (Continued)

3. Conditions (Continued)

- c. The rates herein contemplate the use of standard Telephone Company equipment and serving arrangements and are in addition to rates and charges for the service with which it is furnished. When equipment or service of a special type is requested and provided, rates and charges are related to the costs involved to meet the individual requirements of each case.
- d. Operational characteristics of interface signals between the Telephone Company-provided connecting arrangements and the customer-provided equipment must conform to the rules and regulations the Telephone Company considers necessary to maintain proper standards of service.
- e. The Telephone Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provisioning of DID services render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.
- f. Directory listings will be provided in accordance with the regulations of the "Directory Listings" section of this Tariff. DID numbers furnished herein are not entitled to free directory listings.
- g. Customer-provided equipment must be arranged by the customer to provide for the intercepting of assigned but unused station numbers.
- h. The customer being provided DID service will be responsible for all toll calls billed to the DID numbers.
- i. DID numbers will be sold in conjunction with DID service only.
- j. The assignment of telephone numbers and the sequence of numbers assigned to a DID service is determined by the Company based on the rules established in FCC order 00-104. The customer may request a sequential block of numbers to be placed into service at a later date. Non-Recurring Charges for DID numbers may apply to recover the cost of reserving the numbers. Reserved numbers can only be held for a maximum of six months. After six months, the reserved numbers must be placed in service for that specific customer or the numbers will be categorized as available for use by other customers.

MISCELLANEOUS SERVICE ARRANGEMENTS

C. CUSTOM CALLING SERVICES

(T)

1. General

Custom Calling Services are optional services offered in addition to regular exchange service to those customers served by central offices arranged to provide such services. The number of Custom Calling Services available depends upon the exchange central office providing the service and is subject to the availability of its facilities.

(T)

(T)

2. Service Descriptions

a. Call Forwarding

(D)

This service redirects incoming calls to another telephone number. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. When activated, all calls that are forwarded when the line is idle cause a short ring on the forwarded line as a reminder that the service is active. To deactivate Call Forward, a customer must dial a special access code. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

(T)

b. Call Forwarding-Busy (Customer Programmable)

(M)

This service routes incoming calls to another telephone number when the customer's dedicated number is busy. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward - Busy, a customer must dial a special access code. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

(M)

c. Call Forwarding-Busy (Programmed by Telco)

This service automatically redirects incoming calls to a predesignated telephone number or voice mail service when the customer's line is busy. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the line is busy. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All call forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

(T)

(M)-Material previously appeared on Sheet 4.1 of this Section.

MISCELLANEOUS SERVICE ARRANGEMENTS

C. CUSTOM CALLING SERVICES (Continued)

(T)

2. Service Descriptions (Continued)

d. Call Forwarding-No Answer (Customer Programmable)

(D)

This service redirects incoming calls not answered after a predetermined number of rings to another telephone number. The number of rings is determined and set by the Company unless otherwise specified by the customer. The customer can activate this service by dialing a code and entering the number to which calls should be forwarded. To deactivate Call Forward - No Answer, a customer must dial a special access code. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

(M)
|
(M)

e. Call Forwarding-No Answer (Programmed by Telco)

This service automatically redirects incoming calls to another telephone number or voice mail service when the customer's telephone is not answered in a pre-determined number of rings. The number of rings is determined and set by the Company unless otherwise specified by the customer. The customer activates the service by contacting the telephone company and designating the number to which all calls will be forwarded when the telephone is not answered within an established period of time. The telephone company then establishes the fixed forward-to telephone number within the switch. To cancel the service or change the forward-to telephone number, the customer must contact the telephone company. All calls forwarded with this service are subject to transmission limitations and all applicable local and long distance charges.

f. Call Forward-Remote Access

(M)

This service allows the customer to activate and deactivate Call Forwarding from a telephone in another location. All calls forwarded are subject to transmission limitations and all applicable local and long distance charges.

(M) (T)

Cancels First Revised Sheet 4.2

MISCELLANEOUS SERVICE ARRANGEMENTS

C. CUSTOM CALLING SERVICES (Continued)

(T)

2. Service Descriptions (Continued)

(T)

g. Call Hold

(M) (T)

This service allows a customer to place a current caller on hold, which frees the line so the customer can initiate another call. To activate Call Hold, the customer depresses the switchhook to receive a dial tone and then dials a specific code. Only one call per access line can be placed on hold at a time. The held call cannot be added to another call, however, the customer can toggle between each call.

(M)
(D)

h. 3-Way Calling

This service allows a customer to add a third party to an existing telephone call. To add a third party, the customer depresses the switchhook once to place the current party on hold, receives a dial tone, dials the third party's number, and then depresses the switchhook again to establish the three-way connection. All 3-way calls are subject to transmission limitations and all applicable local and long distance charges.

(T)

This service is available on a flat monthly rate and a pay-per-use basis. Pay-per-use 3-Way Calling will have a per activation rate and a monthly price cap. After the monthly price cap has been reached, each activation thereafter will be at no charge.

i. 6-Way Calling

(M1) (T)

This service allows a customer to call up to five parties and establish a six-way conference call. To activate this service, the customer dials an access code, dials the desired telephone number (calling party must answer), depresses the switchhook to add the calling party to the line, then depresses the switchhook again to receive a new dial tone. If the called party line is busy or there is no answer, the customer must dial a special access code to drop the line. This process needs to be repeated until all parties (up to five) have been connected to the customer's line. All 6-Way Calls are subject to transmission limitations and all applicable local and long distance charges.

(M1) (T)

(M)-Material previously appeared on Sheet 4.4 of this Section.

MISCELLANEOUS SERVICE ARRANGEMENTS

C. CUSTOM CALLING SERVICES (Continued)

2. Service Descriptions (Continued)

j. Call Transfer

This service allows the customer to hold and transfer incoming, out-going and intragroup calls. If the customer has established a three way call, this service will allow the customer to hang up while the other two parties remain connected. Any applicable long distance charges will apply for the duration of the call, even if the customer drops off the call.

(N)

(N)

(D)

k. Call Waiting/Cancel Call Waiting

(T)

This service alerts a customer who is on the phone that another local or long distance caller wants to get through the line. The customer will receive a tone signal to indicate another incoming call and the caller will receive the usual ringing tone. To place the first call on hold and answer the incoming call, the customer depresses the switchhook once. The customer can then toggle between both calls by depressing the switchhook. If the customer hangs up when a call is still on hold, the customer's line will automatically ring back.

Cancel Call Waiting allows a Call Waiting customer to deactivate the Call Waiting service by dialing a code. When this service is activated, the customer will not be interrupted by the Call Waiting tone and the incoming caller will receive a busy signal. Call Waiting will remain disabled for the rest of the call, but will be automatically restored upon call termination.

l. Long Distance Call Waiting

This service is additive to Call Waiting and uses a special tone signal to indicate to the customer that the incoming call is long distance. The tone is different than the Call Waiting tone signal received for a local call. The long distance caller will receive the usual ringing tone.

m. Home Intercom-Basic

(M)

This service allows customers to redial their own directory number in order to talk to another party at a different extension. To activate this service, customers redial their own directory number and then hang-up. After a short interval, the phone will ring back. Once both parties pick-up the phone, they will be able to have a two-way conversation. This service is also known as Revertive Ringing.

(M) (T)

MISCELLANEOUS SERVICE ARRANGEMENTS

C. CUSTOM CALLING SERVICES (Continued)

2. Service Descriptions (Continued)

n. Home Intercom-Enhanced

This service allows customers to establish a talking path between two or more of their extensions. To activate this service, the customer dials one of the access code numbers predetermined by the Company, receives an announcement, and then hangs up the phone. The phone will ring back in one of the distinctive patterns, depending on the access code dialed. Also included in this package is dialable hold, where one extension can transfer an outside call to another extension.

(D)

(D)

q. Personal Ringing

This service allows the customer to have up to three distinct telephone numbers on a single line. The second and third number will each have a distinctive ringing pattern so the customer can identify which number has been called. If a customer also subscribes to Call Waiting, each phone number will have a distinctive Call Waiting tone. If a customer also subscribes to Call Forward, the main directory number or all three telephone numbers can be forwarded.

C. CUSTOM CALLING SERVICES (Continued)

2. Service Descriptions (Continued)

r. Speed Call 8

This service allows the customer to keep a list of eight specified telephone numbers which can be dialed by using a one-digit (2 through 9) access code.

s. Speed Call 30

This service allows the customer to keep a list of 30 specified telephone numbers which can be dialed by using a two-digit (20 through 49) access code.

t. Call Reminder

This service allows a customer to program a time at which a reminder call is desired. At the programmed time, the customer will receive a call placed by the Central Office Equipment. When the call is answered, the customer will hear a tone or a Company recorded announcement.

u. Toll Restriction

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. When a restricted call is attempted from a line/trunk equipped with this service, a dial tone or Company recorded announcement will be heard by the caller.

v. Toll Restriction with PIN Override

(T)

This service enables customers to restrict all or a combination of 0+ and 1+ toll calls from being placed over their exchange lines/trunks. In addition, customers will have the ability to override the restriction on a per call basis by using a Personal Identification Number (PIN). To activate the override, the customer dials a code, the PIN, waits for a dial tone and then dials the toll number. When a restricted call is attempted without the PIN, from a line/trunk equipped with this service, a Company recorded announcement will be heard by the caller.

MISCELLANEOUS SERVICE ARRANGEMENTS

C. CUSTOM CALLING SERVICES (Continued)

3. Limitations

- a. Custom Calling Services require special central office equipment and will be provided only where facilities are available.
- b. Custom Calling Services are only available on single-line party service.
- c. Custom Calling Services will not be provided in connection with Paystation Service (except for the business line extension), Private Branch Exchange Trunk Line Service, or Centrex Service.

4. Rotary Hunting

Call forwarding features shall not be used as a substitute for rotary line service to which the customer would otherwise subscribe. Therefore, business customers who subscribe to more than one access line on a single premises may not also subscribe to Call Forwarding - Busy - Variable. However, business customers with multiple lines at the same premises may subscribe to Call Forwarding - Busy - Fixed, as long as the forward - to number is located at a premises other than the provisioned premises.

D SMART PACK LITE⁽¹⁾

(C)

1 General

Smart Pack Lite is an optional service package. The package permits a customer to receive services and features for a flat monthly rate, for each Smart Pack Lite subscriber line provided. Smart Pack Lite includes the following services:

- a Residential One-Party Line
- b Caller ID Deluxe
- c One CCS or ACS feature of the customer's choice
- d Inside Wire Maintenance (deregulated service)

2 Conditions and Limitations

- a Rules, regulations and limitations as specified elsewhere in the Company's tariffs for each individual service will apply as part of this bundle.
- b Unless terminated by the Smart Pack Lite customer or the Company, a customer will remain enrolled in the Plan, as amended from time to time, with any applicable changes in rate, for as long as the Plan continues to be offered by the Company.
- c Smart Pack Lite customers are not eligible for discounts or promotional offerings (outside of this bundle) associated with the Custom Calling and Advanced Calling Services included in the Plan, unless specifically provided for in a promotional offering.
- d Customers enrolled in the Plan, who fail to pay the entire rate per month, will be subject to having all existing Smart Pack Lite services converted to the applicable tariff rates. Service charges will not apply for converting services back to the tariff rates. Such customers will not be permitted to re-enroll in this Plan until such time as all associated unpaid balances are satisfactorily paid in full.

- ¹. This service is grandfathered to existing customers effective January 7, 2009. The service will not be available after this date.

J. RELOCATION FORWARDING SERVICE

(N)

GENERAL

Relocation Forwarding Service (RFS) is a voice only application service which allows calls sent to a telephone number programmed in the central office to automatically forward to a customer's terminating premises equipment or voice mail box. The customers premise equipment or voice mail box may be located in the same or different exchange from the call forwarding location.

CONDITIONS AND LIMITATIONS

1. RFS service is offered subject to availability of suitable facilities.
2. RFS is provided on the condition that the Telephone Company's facilities are able to adequately handle calls to the RFS customer without interfering with or impairing any services offered by the Telephone Company. If in the opinion of the Telephone Company, the facilities are inadequate to handle the calls to the RFS customer, the customer will be required to pay for the cost of additional services and facilities.
3. Only one call will be forwarded at one time. Another call will not be sent through until the previous call is completed.
4. Customers subscribing to this service are responsible for any toll call charges between the call forwarding location and the terminating point.
5. One listing in the white and yellow page directories, covering the exchange in which the call forwarding central office is located, is provided without additional charge.
6. The minimum service period is one month.
7. RFS service is not offered where the terminating station is a coin telephone.
8. Service is not available on ported numbers or to Internet Service Providers.

RATES AND CHARGES

	Non-Recurring <u>Charges</u>	Per <u>Month</u>	Trans. <u>Code</u>
Relocation Forwarding, per number	(1)	75% of B1	CCBRF

(1) Subsequent Service Order and Line Connect charges apply. The rates are listed elsewhere in this tariff.

K. CENTREX SERVICE⁽¹⁾

(T)

1. General

- a. Centrex is a central office communications system package provided in association with individual line or trunk exchange business services furnished from digital central office equipment located in company buildings. Centrex is not provided in association with PBX trunks, or public or semi-public telephone service or COCOTS.
- b. Centrex is a premium service and may be subject to the availability of outside plant and/or central office facilities.
- c. A combination of business and residence lines or trunks in a Centrex system is not allowed. All exchange lines in a Centrex system must have the same billing arrangement, i.e., either flat rate or measured/metered service, where offered and must be billed to the same account.
- d. All Centrex features are available to lines utilizing touch call signaling.
- e. The minimum charge for services provided under this tariff shall be one month.
- f. Vacation rates for Centrex lines or features are not offered.
- g. Calls between lines within the Centrex group are not subject to local measured or metered service.
- h. The minimum requirement for Centrex service is two (2) Centrex lines and one (1) Network Access Register.
- i. All station lines and features in the same Centrex system, regardless of location, must be covered by the same term payment plan option.
- j. All station lines will be equipped with the standard features specified as set forth in K.5.c.1. Additional features may be obtained on an individual basis or through the Premium Package plan.

⁽¹⁾ Effective June 20, 2006, this service will no longer be available to new customers. Once current customers disconnect this service, they will not be able to reestablish it.

(T)

2. System Features

a. Features Selected Per Line

Feature capabilities may vary depending on the type of central office equipment.

1. Call Forward - All Calls

Allows a station user to have all incoming calls to a station automatically forwarded to a predetermined telephone number.

2. Call Forward - Busy

This feature allows incoming calls to be transferred automatically to a predetermined line within the Centrex customer group if the Centrex line is busy.

3. Call Forward - No Answer

This feature allows incoming calls to be transferred automatically to a predetermined line within the Centrex customer group if the line is not answered.

4. Call Hold

Allows a station user to place a call on hold by flashing the switchhook and dialing a code.

5. Call Pick-up

Allows a station user to answer incoming calls to another station within a defined call pick-up group by dialing a code.

6. Call Transfer

Allows a station user to hold and transfer incoming, outgoing and intragroup calls.

⁽¹⁾ Effective June 20, 2006, this service will no longer be available to new customers.
Once current customers disconnect this service, they will not be able to reestablish it.

2. System Features (Cont.)

a. Features Selected Per Line (Cont.)

7. Call Waiting

Called busy station may acknowledge the incoming caller and place the existing caller on hold, then alternate the callers or abandon one of the calls. (This feature will not function when Busy Transfer is activated).

8. Direct Connect

Provides an automatic connecting between a calling station that goes off hook and a predetermined location. This feature can be set up to connect immediately or with a time delay.

9. Deny Originating

This feature allows the line terminating calls only.

10. Three-Way Calling

This feature allows the station user to place an existing call on hold, then originate a call to another party with the party on hold being excluded from the conversation until the station user flashes the swithhook and conferences all parties.

11. Deny Terminating

This feature allows the line originating calls only.

12. Directory Number Hunting

This feature allows a call to advance to another number when the original number called is in use.

13. Intercom Dialing

This feature provides intra Centrex group communications by dialing 1-to-3-digits.

⁽¹⁾ Effective June 20, 2006, this service will no longer be available to new customers. Once current customers disconnect this service, they will not be able to reestablish it.

14. Speed Calling 8

Allows a user to place calls to a previously designated list of 8 frequently dialed numbers.

15. Speed Calling 30

Allows a user to place calls to a previously designated list of 30 frequently dialed numbers.

16. Station-To-Station Dialing

This feature allows Centrex to operate like a PBX with station-to-station dialing, and requires "9" access to place outside calls.

17. Toll Denied

This feature restricts the station from originating toll calls.

18. Do Not Disturb

This feature allows you to divert incoming calls to a busy tone indicating that the phone is in the Do Not Disturb status.

19. Do Not Disturb (with PIN number)

This feature allows you to divert incoming calls to a busy tone or optional announcement indicating that the phone is in the do not disturb status. Selected callers can override the do not disturb status by entering a personal identification number.

- (1) Effective June 20, 2006, this service will no longer be available to new customers.

MISCELLANEOUS SERVICE ARRANGEMENTS

K. CENTREX SERVICE⁽¹⁾ (Continued)

(T)

2. System Features (Cont.)

b. Features Selected Per Group

1. The following features are selected for use by the entire Centrex group:

a. Group Speed Calling

This feature allows the Centrex customer group to establish a 30 number speed call list. It is group-assignable and accessed by line. Group Speed Call can be accessed by anybody in the group.

b. Network Access Registers

Network Access Registers (NARs) provide outgoing access to local exchange, long distance, and private networks. The number of simultaneous exchange and toll network calls to and from Centrex lines of a centrex business group is limited by the number of Network Access Registers ordered by the customer. Intercom calls will not be limited by the number of NARs.

c. Linear Hunting

Linear Hunting provides a sequential hunt over the stations in the Multiline Hunt Group (MHG). With this arrangement, calls to the Pilot Number (Listed Directory Number) attempt to terminate to the first equipment number (EN) in the MHG. If the first EN is busy, hunting proceeds in a sequential fashion across all members of the group until an idle station is located or the end of the list is reached. If an idle station is available, the call is terminated to it. If no idle stations are available, busy tone is returned unless the Queueing option is equipped.

Individual stations within the MHG may be provided with Directory Numbers (DNs). These DNs may be either hunting or non-hunting (often called "right") numbers. If a call is made to one of the hunting DNs within the MHG (meaning to a number other than the Pilot Number), and that station is busy, hunting takes place from the accessed DN to the final member in the MHG.

⁽¹⁾ Effective June 20, 2006, this service will no longer be available to new customers. Once current customers disconnect this service, they will not be able to reestablish it.

K. CENTREX SERVICE⁽¹⁾ (Continued)

(T)

2. System Features (Cont.)

b. Features Selected Per Group (Cont.)

1. The following features are selected for use by the entire Centrex group: (Cont.)

d. Circle Hunting

Circle Hunting is similar to Linear Hunting except that when calls are directed to a hunting DN, which is busy, hunting proceeds from the accessed DN to the final member of the MHG and then "wraps around" to the first member of the group. Hunting continues until all stations in the group have been scanned for the idle condition. If no idle stations are available, busy tone is returned unless the Queueing option is equipped.

e. Uniform Call Distribution

Uniform Call Distribution provides a hunting scheme which is intended to distribute calls in a uniform manner across the MHG. When an incoming call is terminated to a station within the MHG, a search is made for the next idle station in the MHG. The location of the idle station is stored and is used as the starting point for hunting when the next incoming call is received. Once begun, hunting proceeds in a circular manner through the group, assuring that all stations in the hunting sequence are checked. If no idle stations are available, busy tone is returned unless the Queueing option is equipped.

f. Preferential Hunting

Preferential Hunting provides an alternate hunting sequence for some or all of the Hunting Directory Numbers (HDNs) in an MHG. If a call is directed to the Pilot Number of the MHG rather than to an HDN associated with a Preferential Hunting List, hunting proceeds through the group in a normal fashion. However, if a call is directed to an HDN which has a Preferential Hunting list assigned, and the HDN is busy, hunting occurs in a different or shortened order through the preferential list. If all members in the Preferential Hunt Group (PHG) are busy, hunting may optionally return to the primary Hunt Group. If the PHG is not set up to return to the MHG, the calling party receives busy tone. A common arrangement would be to have a secretarial phone as the preferential termination if an individual manager's phone is busy.

(1) Effective June 20, 2006, this service will no longer be available to new customers. Once current customers disconnect this service, they will not be able to reestablish it.

2. System Features (Cont.)

b. Features Selected Per Group (Cont.)

1. The following features are selected for use by the entire Centrex group: (Cont.)

g. Queueing

With the Queueing option, calls to hunt groups in which all lines are busy are queued, and ringback tone is returned to the calling party. Calls remain in the queue until a release is detected from one of the stations in the MHG. The queue length is set at the time of database generation and is in effect for all MHGs in the System. The maximum allowable queue size per MHG is 10 calls. A delay announcement may be provided with Queueing in lieu of ringback tone. Queueing cannot be provided for the members of a Preferential Hunt Group.

h. Delay Announcement for Queued Calls

The Delay Announcement for Queued Calls option allows the Telephone Company to provide a non-barge-in announcement to a calling party after a call has been queued. The announcement is repeated at regular intervals until the maximum number of announcement cycles has been exceeded.

3. Conditions

- a. The Company will furnish listings per Section A6, without charge. Additional listings are offered subject to the provisions set forth in Section A6.
- b. The rates and charges shown for Centrex service apply to Centrex service only. Other services as provided for in the tariffs of the Company may be furnished in connection with this service at rates and charges specified for such services.
- c. Each request for establishment of a Centrex service system must be placed in writing by the customer. Should the customer elect to cancel such a request after acceptance by the Company and before the start of the initial contract period described below, he may do so subject to notice in writing and payment to the Company for all resulting nonrecoverable labor and material costs.

- (1) Effective June 20, 2006, this service will no longer be available to new customers. Once current customers disconnect this service, they will not be able to reestablish it.

3. Conditions (Cont.)

- d. Centrex service is offered on a contractual basis commencing on the date the service is established.
 - 1. Centrex Line rates, Network Access Register rates, plus the selected Feature rates as set forth in K.5, apply each month for the duration of the contract.
- e. A Centrex line may be extended to a location outside the same continuous property of the Centrex customer to any location within the exchange area. Standard Centrex system rates as set forth in this tariff will apply.
- f. Centrex system lines are not subject to Local Exchange Service Rates as set forth in Section A3, Sheets 2-4.
- g. Reserved for Future Use.
- h. Interstate end user access charges will apply as stated in FCC Tariff No. 5.
- i. This tariff (including the rates and charges shown herein) for Centrex service is subject to such changes or modifications as the Florida Public Service Commission may from time to time direct or allow in the exercise of its jurisdiction.
- j. Subsequent line additions.

Subsequent line additions will be rated under a new contract or added to an existing contract based upon the remaining period of the initial contract. If the line addition results in the customer's total Centrex line count exceeding the threshold of the line group previously contracted, all lines will be billed at the rate for the larger group.
- k. Feature Package upgrades are permitted. Service charges as set forth in Section A4 will apply.

4. Liability of the Telephone Company

- a. The liability of the Telephone Company for interruptions in or failure of service provided under the Centrex service tariff or for any damages arising from the provision of service is provided for in Section A2, Sheets 27-29.

- (1) Effective June 20, 2006, this service will no longer be available to new customers. Once current customers disconnect this service, they will not be able to reestablish it.

k. Connection Charges

1. In addition to the recurring monthly charges, Service Connection Charges, as specified in Section A4, apply to the connection of one or more lines at the same time and on the same service of the customer, with the following exceptions:

- a. No Service Connection charges will apply to any Feature Package changes requested for a period of ten (10) days immediately following the initial installation of Feature Packages. Following the ten (10) day period, charges for any changes or additional requests will apply as described in Section A4.

6. Term Payment Plan

- a. The monthly rates for customers choosing the term payment plans are guaranteed against telephone company initiated changes during the selected service contract period.
- b. Centrex station line additions under the term payment plan may be made at contracted rates for the duration of the contract period. If this election is made the additions would be subject to termination liabilities.
- c. Upon expiration of the term payment plan, the customer must select a new contract period as offered in the current tariff or revert to current tariff rates for the month to month payment option.

7. Termination Liability

- a. If service is terminated in whole or in part, except as otherwise provided herein, prior to the expiration of the agreed to term payment plan, the customer shall be required to pay a termination charge for the unexpired portion of the contract period determined as follows:

The number of Centrex lines multiplied by the monthly charge for Centrex lines and features terminated multiplied by the number of months remaining in the contract period times 50 percent.

L. ADVANCED CALLING SERVICES

1. General

Advanced Calling Services (ACS) is a group of telephone company central office call management features offered in addition to basic telephone company services. ACS consists of the following:

a. Call Return

This feature enables a customer to place a call to the telephone number associated with the most recent call received whether or not the call was answered or the number is known. The customer can dial a code to request that the network place the call.

If the called line is not busy, the call is placed. If the called line is busy a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next 30 minutes both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed.

This feature is not available on operator handled calls. In connection with Call Return, if the most recent incoming call is blocked, the subscriber will get a Company recorded announcement indicating the number is a private number and the call can not be returned.

(C)
|
(C)

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for Call Return.

If the incoming call originated from a multi-line hunt group, the telephone number transmitted and Call Returned will always be the main number of the hunt group, unless, facilities permitting, the telephone numbers are identified within the group.

EFFECTIVE: July 12, 2013

MISCELLANEOUS SERVICE ARRANGEMENTS

L. ADVANCED CALLING SERVICES - Continued

1. General - Continued

(D)

c. Priority Ringing

(D)

Priority Ringing provides a distinctive ringing pattern to the subscribing customer for up to six specific telephone numbers.

The customer creates a screening list of up to six telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern. Calls from telephone numbers not included on the screening list will produce a normal ring.

If the customer subscribes to Call Waiting and a call is received from a telephone number on the Priority Ringing screening list while the line is in use, the Call Waiting tone will also be distinctive.

When a telephone number on the Priority Ringing screening list also appears on the Preferred Call Forwarding list, the Preferred Call Forwarding will take precedence. Likewise, when the same number is shown on the Call Rejection list, the call will be blocked.

Quincy Telephone Company

d/b/a TDS Telecom/Quincy Telephone

SECTION A13
Original Sheet No. 35

ISSUED: June 21, 1994

EFFECTIVE: AUG 20 1994

MISCELLANEOUS SERVICE ARRANGEMENTS**L. ADVANCED CALLING SERVICES - Continued****1. General - Continued****c. Priority Ringing - Continued**

This feature will not work if the incoming call is from a telephone number in a multiline hunt group unless the telephone number is the main telephone number in the hunt group, or is telephone number identified.

d. Preferred Call Forwarding

Preferred Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of up to six numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list.

If the customer also subscribes to Call Rejection and the same telephone number is entered on both screening lists, the Call Rejection feature must be deactivated to allow the call to forward.

This feature will not work if the calling line is not referenced to and originated by the main telephone number, or a Telephone Number identified number that represents all the lines in a collection of lines such as multiline hunt groups.

e. Call Rejection

This feature provides the customer the ability to prevent incoming calls from up to six different telephone numbers. A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party to which the call is being attempted does not wish to receive the call at this time.

1. General - Continued

e. Call Rejection - Continued

If the customer also subscribes to Preferred Call Forwarding and/or Priority Ringing and the same telephone numbers appear on those screening lists, Call Rejection will take precedence.

This feature will not work if the incoming call is from a telephone number in a multiline hunt group unless the telephone number is the main telephone number in the hunt group, or is telephone number identified.

f. Special Call Acceptance

Special Call Acceptance allows customers to automatically screen incoming calls by creating a list of six (6) phone numbers from which the customer is willing to accept calls. A call from a phone number **not** on the customers' list is sent to an announcement that informs the caller that the customer is not receiving calls at this time.

(T)

(T)

(T)

g. Call Trace

Call Trace enables the customer to initiate an automatic trace of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company equipment indicating the calling number, the time the trace was activated, and in some locations, the time the offending call was received. The customer using this feature would be required to contact the Telephone Company for further action. The customer is not provided the traced number.

Only calls from locations with compatible signalling services are traceable using Call Trace.

h. Caller ID - Number Delivery

This feature enables the customer to view on a display unit the Directory Number on incoming telephone calls.

When Caller ID - Number is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called Customer Provided Equipment during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID - Number Delivery will be responsible for the provision of a display device. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein. The Company will forward all telephone numbers where technically feasible.

Anonymous Call Rejection is included with Caller ID - Number at no charge. Incoming calls originating from a telephone number which has invoked a blocking option will automatically be rejected when a customer subscribes to Caller ID - Number Delivery.

If the incoming call is from a caller serviced by a PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originated from a multiline hunt group, the telephone number transmitted will always be the main number of the hunt group, unless, facilities permitting, the lines are Telephone Number identified within the group.

Calling party number is not available on operator handled calls.

j. Caller ID Blocking - Per Call

(T)

Caller ID Blocking - Per Call allows the caller to temporarily prevent the transmission of that customer's Directory Name and Number and thus control its availability to the called party. The transmission of the Directory Name and Number can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Name and Number.

(T) (M)

(C)

(C)

(C) (M)

k. Caller ID Blocking - Per Line

(T)

This feature, when established on a customer's line, enables the calling customer to permanently prevent transmission of their Directory Name and Number on all outgoing calls placed from the customer's line. Per Line Blocking can be deactivated on a per call basis by dialing a deactivation code prior to placing a call.

(C)

(N)

(N)

This service is available upon request, at no charge, to the following entities: (a) established shelters of private, non-profit and publicly funded domestic violence intervention agencies; and (b) federal, state, and local law enforcement agency offices.

Caller ID Blocking - Per line is established and/or removed from the customer's line via a service order.

(T)

1. Anonymous Call Rejection

(T)

This feature allows customers to automatically reject incoming calls when the call originated from a telephone number which has invoked a blocking feature that prevents the delivery of their number to the called party. When Anonymous Call Rejection

is activated on the customer's line and an incoming call marked private is received, the called party's telephone will not ring.

(M)

The call will be routed to an announcement and subsequently terminated. The announcement informs the calling party that the number the caller is trying to reach will not accept the call as long as the calling number is not delivered. Incoming calls are checked for acceptance or rejection by Anonymous Call Rejection regardless of the current state of the ACS customer's line (e.g., off hook or idle.)

A service order is required to establish or discontinue Anonymous Call Rejection. Subsequent to establishment, the feature can be activated and deactivated at the customer's discretion through the use of preassigned feature access codes. Anonymous Call Rejection is included with Caller ID at no charge.

(N) (M)

(N)

2. Regulations and Limitations of Service:

- a. ACS is provided subject to the availability of facilities. Additionally, the features described will only operate on calls originating and terminating within and between other compatible ACS service equipped offices. Also feature screening lists can only effectively operate with telephone numbers of subscribers served out of such compatible ACS service equipped offices.
- b. ACS is available to single party residence and business customers.
- c. ACS basic features cannot be provisioned with Company provided Public and Semi-Public Telephone Service, Customer Owned Coin Operated Telephones, toll terminals, trunks or some remote switching locations.

N. DIGITAL TRANSPORT SERVICE

1. General

Digital Transport Service (DTS) provides customers with a cost effective option to deliver voice grade service from the serving Central Office to a customer's premises. DTS is only provided with a DS1 Channel (1.544 Mbps) as provisioned in the Local Private Line tariff. DTS supports Direct Inward Dialing (DID) Service, Dedicated 800 Service, and Local Exchange Business Trunks. The primary users of this service include Internet Service Providers and owners of PBX Systems.

2. Definitions

DS0 - One voice grade circuit. This circuit generally has a 64 Kbps transmission speed.

DS1 - Digital facility that is equivalent to 24 DS0s. Total transmission speed is 1.544 Mbps.

3. Regulations

- a. DTS is subject to the availability of central office equipment and appropriate outside plant facilities.
- b. The rate structure for DTS requires charges for Trunk Terminations, DS1 facility, Digital Interface Termination and Subscriber Line Charges (SLC).
- c. The Digital Interface Termination rate is available on a month to month basis or under variable rate periods with rates based on lengths of 12 months, 36 months and 60 months.
- d. The total number of Trunk Terminations activated by the customer may not exceed the capacity of each DS1 facility.
- e. Applicable F.C.C. charges will be assessed per the NECA F.C.C. Access Tariff No. 5.
- f. Additional charges for Central Office services and features, such as telephone numbers associated with Direct Inward Dialing (DID) Service, are applicable when appropriate, as specified elsewhere in this tariff.

3. Regulations (Continued)

- g. Calls will be subject to any applicable usage charges for services provisioned on the DTS channels. Message Telecommunications charges will apply to calls outside the Local Service Area.
- h. Touch-tone signaling is required for DTS.
- i. Unless specifically exempted, DTS is subject to all general regulations applicable to the provision of service by the Company as stated in the general tariff.
- j. As a result of any interface or technical changes required of the Company due to the possible future adoption of FCC rules under Part 68, the Company shall not be responsible if changes in any of the equipment, operations or procedures of the Company utilized in the provision of DTS render any customer premises equipment provided by a customer obsolete or require modification or alteration of such equipment or systems or otherwise affect its use or performance.

MISCELLANEOUS SERVICE ARRANGEMENTS

O. DEDICATED DS1 SERVICE

1. General

Dedicated DS1 Service is a point-to-point intraexchange service that provides for simultaneous two-way transmission at 1.544 Megabits per second (Mbps). This service only transmits digital signals and uses only digital transmission facilities. Dedicated DS1 service and its features are offered subject to the availability of central office equipment and appropriate outside plant facilities. This service is specifically designed for customers that require dedicated DS1 facilities from a TDS TELECOM Central Office to their location.

2. Definitions

Clear Channel Capability - An optional feature of DTS that allows a customer to transport 1.536 Mbps on a 1.544 Mbps line with no constraint on quantity or bit sequence.

DS1 - Digital facility that is equivalent to 24 DS0s. Total transmission speed is 1.544 Mbps.

Digital Local Channel - A transmission path for Dedicated DS1 Service furnished from the Central Office to the demarcation point on the customer's premises.

3. Regulations

- a. Dedicated DS1 Service is available for a minimum service period of one month.
- b. Dedicated DS1 Service is available on a month-to month basis or under variable rate periods, with rates based on lengths of 12 months, 36 months and 60 months.
- c. Rates for Dedicated DS1 under contract will not be increased by Company initiative until the contract period expires. Rates in effect at the time the service is installed will be applicable until the contract expires. Upon expiration of the customer's current payment period option, the customer may select a new payment period option at current rates or revert to current rates on a month-to-month basis.
- d. For channelization of Dedicated DS1 Service, please see Digital Transport Service in this Section.

MISCELLANEOUS SERVICE ARRANGEMENTS

O. DEDICATED DS1 SERVICE (Continued)

3. Regulations (Continued)

- e. If the service is canceled by the customer prior to the completion of the service period, the customer will be obligated to pay a termination charge. The applicable termination charge will be equal to the number of months remaining in the contract times the monthly rate provided under the contract. Termination charges will not apply, however, if the customer replaces the service with comparable service and a contract length that is equal to or greater than the original contract period.
- f. The rates listed in Paragraph 4., following, assume the provision of a digital quality facility that uses existing exchange cable facilities compatible with this service. If such equipment, new facilities or changes to existing facilities are required for the provision of this service, a special construction charge based on the cost incurred to make the changes will apply in addition to the rates for Dedicated DS1 Service.
- g. The two types of non-recurring charges associated with Dedicated DS1 Service include a Design Order Charge and an Installation Charge. The Design Order Charge applies once per order while the Installation Charge will apply for each Digital Local Channel installed.
- h. The Installation Charge and Design Order Charge will not apply for the establishment of Dedicated DS1 Service when the customer signs an agreement to subscribe to the service for a minimum of 3 years. If the customer discontinues service prior to the conclusion of the 3 year agreement, the customer will incur a disconnection charge equal to the Design Order Charge and applicable Installation Charges. The disconnection charge will not apply if the customer purchases other services from the Company which replace Dedicated DS1 Service.

P. THREE DIGIT DIALING SERVICES (211 and 511)

(C)

1. General

- a. 211 Dialing Service ("211") is a three digit local dialing arrangement available in specified areas, with Quincy Telephone Company for delivery of general information via voice grade facilities, for community information and referral services. Pursuant to Order 00-256, issued by the Federal Communications Commission (FCC) in CC Docket 92-105, the 211 code is assigned for access to community information and referral services. In addition, the 211 subscriber must comply with any orders and rules pertaining to 211, adopted by the FCC in rulemaking proceeding CC Docket 92-105.

511 Dialing Service ("511") is a three-digit local dialing arrangement available in specified areas for the delivery of travel information services via voice grade facilities. Pursuant to Order 00-256, issued by the Federal Communications Commission (FCC) in CC Docket 91-105, the 511 code is assigned for access to travel information services.

(D)

(D)

- b. The Local Calling Area of the 211 and 511 customers shall be the basic Local Calling Area specified in Section A3 of this Tariff, as facilities permit. If local calling areas are merged, and the 211 and 511 numbers exists in all areas, the 211 and 511 subscribers who established the 211 and 511 Services first in time will be entitled to retain the 211 and 511 numbers in the merged calling area.

(C)

(C)

- c. Limitations and use of service as stated in Section A2 of this Tariff apply.

- d. Access to 211 and 511 Services are not available to the following classes of service:

(C)

- 1+
- 0+, 0- (Credit Card, Third Party Billing, Collect Calls)
- Inmate Service
- Cellular - Type 2A
- 101XXXX

In addition, operator assisted calls to the 211 and 511 numbers will not be completed.

P. THREE DIGIT DIALING SERVICES (211 and 511) (Continued)

(C)

1. General (Continued)

- e. The 211 and 511 customers must comply with any orders and rules, pertaining to 211 and 511 Services, adopted by the FCC in rulemaking proceeding (CC Docket 92-105).
- f. 211 and 511 will not provide calling number information in real time to the 211 and 511 subscribers. If the 211 and 511 subscribers need this type of information, the 211 and 511 subscribers must subscribe to a compatible Calling Number Identification service in A13 preceding.

(C)

(C)

2. Service Requirements and Conditions

- a. The 211 and 511 customers must (1) obtain a new 7 or 10-digit number, (2) designate an existing non-published 7 or 10-digit number, or (3) change an existing published 7 or 10-digit number to a non-published number, which will be established as the lead number in the hunt group, ACD, etc., of the customer. This 7 or 10-digit number must be non-published. When the 211 and 511 Service is disconnected or discontinued, the 211 and 511 customers must surrender this 7 or 10-digit number as part of the 211 and 511 Service. This 7 or 10-digit number can be either disconnected or a new 7 or 10-digit number can be assigned.
- b. Use of 211 and 511 Services is subject to possible recall of the 211 and 511 codes by the NANP (North American Numbering Plan) Administrator for national use. If the NANP Administrator recalls the 211 and 511 codes, the Company will work with the 211 and 511 customers to transfer their service arrangements, if technically and economically feasible at the time, to a different abbreviated dialing arrangement. If it is not feasible, the Company will transfer it to a seven-digit dialing arrangement. The 211 and 511 customers will be required to migrate to any standard access arrangement for information services subsequently agreed to by the industry and approved by the FCC. The 211 and 511 customer will be charged the appropriate tariff rates for the establishment of the new access arrangement.
- c. The 211 and 511 Service is provided where facilities permit. Only one 7 or 10-digit number may be used as the lead number per basic local calling area.
- d. Quincy Telephone only provides 211 and 511 Services for calls routed through its Central Office. Quincy Telephone is not obligated to transport any 211 or 511 calls originated in the Quincy Serving Territory over wireless or Alternative Carrier Networks unless an agreement can be reached between the customer, Quincy Telephone and the originating carrier.

VIRTUAL TELEPHONE NETWORK

A. GENERAL

Virtual Telephone Network (VTN) allows business customers to integrate multiple telephone features and functions by configuring VTN lines into a single VTN Group. The line type and quantity is determined by the customer's need. A customer may provision VTN service on VTN Standard or VTN Digital Key Lines and Channels.¹

(C)

VTN is offered only as a complete, integrated service arrangement. The network access, features, and other components of the service are not provided separately or in conjunction with other exchange services. Any other arrangements are outside the scope of this offering.

B. STANDARD AND OPTIONAL FEATURES

1. All VTN systems will have the option to be equipped with the following features at no charge:
 - a. Intercom Dialing
Allows VTN users to call other stations within their VTN Group using an abbreviated dialing pattern.
 - b. Distinctive Ringing
Allows VTN users to listen to the ringing pattern or Call Waiting tone to determine the type of call (intergroup, intragroup, recall, or other feature notification).
 - c. Station Restriction
 - Unrestricted
Allows VTN users to place all calls.
 - Toll Restricted
Restricts VTN users from placing toll calls.
 - Fully Restricted
Allows VTN users to only place calls within the VTN Group.
 - 900/976 Call Blocking
Restricts VTN users from placing 900/976 calls.
 - 900/976 & International Call Blocking
Restricts VTN users from placing 900/976 and international calls.
 - d. Attendant Dial "0"
Allows VTN users to reach an internal attendant by simply pressing "0".
 - e. Direct Inward Dialing (DID)
Allows VTN users to directly receive incoming calls without the assistance of an attendant.

¹ The VTN Key Line & Channel Service will be grandfathered to existing customers effective August 8, 2013. The service will not be available to new customers after this date.

B. STANDARD AND OPTIONAL FEATURES (Continued)

1. All VTN systems will have the option to be equipped with the following features at no charge: (Continued)
 - f. Direct Outward Dialing (DOD)
Allows VTN users to call outside the VTN Group directly without the assistance of an attendant.
 - g. Call Forwarding of Call Waiting Calls
Allows the VTN user to divert all Call Waiting Calls to another directory number.
 - h. Station Usage Billing
Provides for toll bills to be separated by each VTN station.
2. Each VTN station will have the option to be equipped with the following features at no charge:
 - a. Call Forwarding - Variable
Allows a VTN user to direct all incoming calls to another directory number.
 - b. Call Forwarding - Busy
Allows all calls to be redirected to an alternate number when the called number is busy.
 - c. Call Forwarding - Don't Answer
Allows all calls to be redirected to an alternate number after a predetermined number of rings.
 - d. Call Forwarding - Remote Activation
Allows the VTN user to activate and deactivate Call Forwarding from any location.
 - e. Call Hold
Allows a VTN user to place a call on hold.
 - f. Call Park
Allows a VTN user to store a call against their directory number within the VTN Group and retrieve the call from any other number within the group.
 - g. Deny Incoming Calls
Prevents a VTN user from receiving incoming calls from outside of the VTN Group to their VTN DID station.
 - h. Direct Call Park
Allows a VTN user to store a call against any directory number within the VTN Group and retrieve the call from any other number within the group.
 - i. Call Pickup - Group
Allows a VTN user to answer a call that is ringing at another station within the group by dialing an access code.

B. STANDARD AND OPTIONAL FEATURES (Continued)

2. (Continued)

- j. Call Pickup - Direct
Allows a VTN user to answer a call that is ringing at another station within the group by dialing an access code and the ringing station number.
- k. Call Transfer - All Calls
Allows a VTN user to hold and transfer incoming, out-going and intragroup calls outside of their VTN Group.
- l. Call Transfer - Intragroup Only
Allows a VTN user to transfer calls to another station within the VTN Group.
- m. Call Waiting/Cancel Call Waiting
Alerts the VTN user who is on the phone that another call is waiting to be answered. Cancel Call Waiting allows the VTN user to deactivate this feature for one call by dialing a special code.
- n. Call Waiting Intragroup/Cancel Call Waiting
Alerts the VTN user who is on the phone that another call from within the VTN Group is waiting to be answered. Cancel Call Waiting allows the VTN user to deactivate this feature for one call by dialing a special code.
- o. Caller ID - Intragroup Number
Allows for the display of the calling party's telephone number on calls made within the VTN Group. VTN users must provide their own compatible premises equipment in order to process and display the number transmission.
- p. Message Waiting - Stuttered Dial Tone
This is a message waiting indication in the form of an audible interrupted dial tone. This tone is provided by the central office to inform the VTN user that an unplayed message is waiting.
- q. Message Waiting Visual/Lamp
This is a message waiting indicator which illuminates a lamp at the customer's premise to inform the VTN user that an unplayed message is waiting. The customer must supply compatible customer premise equipment (CPE) capable of receiving and displaying the message waiting lamp indicator.
- r. Speed Call Short List
Allows the VTN user to call a short list of user programmed directory numbers by dialing one or two digits instead of the directory number.
- s. Station Hunting
Allows calls directed to busy VTN stations to be directed to the next available station in the hunt group.

B. STANDARD AND OPTIONAL FEATURES (Continued)

2. (Continued)

- t. 3-Way Calling
Allows a VTN user to add a third party to an existing call.
- u. Last Number Redial
Allows a VTN user to automatically redial the last outgoing telephone number dialed.
- v. Call Blocking (per call)
Allows a VTN user to block the delivery of their Caller ID information on a per call basis by dialing a special code prior to placing a call.
- w. Consultation Hold
Allows a VTN user to place a call on hold in order to initiate a second call, answer a waiting call, consult privately with another party, or return to the previously held call.
- x. Make Set Busy
Allows a VTN user to make a particular station appear busy to incoming calls.

3. Each VTN Digital Key¹ Station will have the option to be equipped with the following features at no charge. VTN users must provide their own compatible premises equipment to utilize these features.

(C)

- a. Expansion Modules
Provides the VTN user with a Digital Key telephone to have additional keys for features or call appearances by adding one or two Expansion Modules to their VTN Digital Key station.
- b. Automatic Dial
Provides autodialing of a single directory number via a single key on a Digital Key telephone.
- c. Multiple Call Appearances of a Directory Number
Allows the VTN user to have up to five (four additional) appearances of the primary directory number or secondary directory number assigned to the Digital Key telephone, providing the capability of multiple hunting incoming or outgoing calls associated with that directory number.
- d. Shared Call Appearances of a Directory Number
Allows a directory number(s) from any VTN station to appear on customer-provided sets of other users.
- e. Busy Lamp Field / Direct Station Selection
Allows the VTN Digital Key station to monitor the busy status of another VTN station line or to directly call another VTN station by depressing the associated BLF/DSS key.

¹ The VTN Key Line & Channel Service will be grandfathered to existing customers effective August 8, 2013. The service will not be available to new customers after this date.

B. STANDARD AND OPTIONAL FEATURES (Continued)

4. The following are optional, chargeable individual line features:

- a. 6-Way Calling
Allows the VTN user to call up to five parties and establish a six-way call.
- b. Assume Dial "9"
Enables a VTN line to place outgoing calls without the requirement of a network access "9" digit.
- c. Caller ID Number (Standard VTN line)
Allows the VTN user to see, where technically feasible, the directory number associated with an intergroup incoming call. VTN users must provide their own compatible premises equipment in order to process and display the number transmission.
- d. Caller ID Name and Number
Allows the VTN user to see, where technically feasible, the name and directory number associated with an incoming call. VTN users must provide their own compatible premises equipment in order to process and display the number transmission.
- e. Direct Connect
Allows a call to be automatically placed to a designated directory number without dialing by lifting the receiver off the switchhook.
- f. Ground Start
A type of signaling on the VTN line in which one side of the two-wire trunk is momentarily grounded to receive dial tone.
- g. Speed Call 30
Allows the VTN user to call a list of 30 preselected directory numbers by dialing two or three digits instead of the directory number.
- h. Warm Line Transfer
Allows a call to be placed to a designated directory number without dialing. The call will be placed once the VTN user's phone has been off-hook for a predetermined amount of time.
- i. Secondary Directory Numbers
An arrangement that allows a Digital Key telephone to have access to an additional telephone number(s). The additional telephone number(s), or Secondary Directory Number(s), may originate or receive calls independent of the Digital Key Telephone's Primary Directory Number.

C. CONDITIONS AND LIMITATIONS

1. A VTN customer must have a minimum of two VTN lines and all lines must be served by the same switch in the same local calling exchange.
2. The minimum charge period for services provided under this tariff shall be for twelve months.
3. VTN is offered subject to the availability of outside plant and/or Central Office facilities. Individual feature availability and availability of Digital Key lines may differ by customer location. (T)
4. Requests for special feature or service arrangements not listed in this tariff may be subject to additional charges.
5. The Customer is responsible for the payment of any additional cost incurred when forwarding or transferring calls over the public switched network between the VTN station and the station at which the call is forwarded or transferred.
6. VTN service does not include any terminal equipment which may be required on the customer's premises.
7. Unless specifically exempted, VTN service shall be subject to all general regulations applicable to the provision of service by the telephone company as stated in the general tariff.
8. Account Retention is not available with VTN Service.
9. Each VTN Digital Key line may be provisioned with a maximum of 2 Digital Key Channels.
10. Customers are entitled to one directory listing per VTN Group without charge. If the customer chooses not to list their main directory number, a Non-Published Number charge will apply. Additional Business Directory Listings are available. Please refer to Section A1 of this tariff.
11. VTN lines are provided in a non-blocking arrangement without trunk equivalents or simulated facility groups.
12. VTN Digital Key lines are provisioned for voice-only applications and may not be used for data transmission.

(N)

C. CONDITIONS AND LIMITATIONS (Continued)

- 13 The local exchange calling area of any VTN line will be determined elsewhere in the Company's tariffs.
- 14 Individual Case Basis (ICB) or Special Pricing may be provided by the Company for VTN customers with 100 or more lines.
- 15 When subscribing to VTN Service, customers will be required to commit to a minimum number of lines they will maintain in service throughout the length of the contract. This minimum line commitment will be used to determine the appropriate line rate. Actual lines in service may be higher than the commitment level.

D. RATES AND CHARGES¹

1. Line and Channel Rates

VIRTUAL TELEPHONE NETWORK STANDARD LINE RATES ²					
VTN TERM PERIOD					
Minimum Total VTN Lines ³		12 Months	24 Months	36 Months	60 Months
	2+	29.30	22.50	20.30	16.20
	5+	25.70	19.80	17.80	14.20
	20+	21.80	16.80	15.00	12.10
	50+	20.10	15.50	13.90	11.20
	80+	18.20	14.00	12.60	10.10
100+	ICB	ICB	ICB	ICB	ICB

¹ All rates in this section are exclusively offered in conjunction with VTN service.

² The total number of VTN Standard and Digital Key lines at all locations served by the VTN Group will be used to determine the discount level. Secondary Directory Numbers, Digital Key Channels, and other features related to directory numbers are not included in determining discount levels.

³ Discount levels are based on the minimum number of lines a customer commits to for the term of the contract. The actual number of lines in service may be higher.

4. **DID Number Block**
A \$0.50 recurring charge will apply for each block of 5 DID numbers utilized by the customer. A customer may only purchase numbers in consecutive blocks of 5.
5. **Retained Number Charge**
A \$1.50 recurring charge applies for each telephone number within a VTN Group that is a non-consecutive number and independent from a VTN DID Number Block.
6. **Extra Bill**
Each VTN Group is provided a single monthly bill. Additional monthly bills for specific VTN services will be available for \$2.50 per month.
7. **Number Intercept/Telephone Number Referral Service**
When customers disconnect a number, the Company will furnish a message that provides information regarding the disconnected number. This service will be available in increments of 90 days and will be limited to 4 such increments. At the initiation of this service the customer will be required to specify the length of time for this service. They will also be obligated to pay the entire service cost in advance.
 - a. **Primary and Additional Directory Listings**

First 90 days, per number	No Charge
Each additional 90 days, per number	\$20.00

E. TERMINATION LIABILITY

If the Customer cancels VTN Service prior to the completion of the term of the Agreement, the Customer shall be obligated to pay one of the following termination liability charges. Customers who fall below their minimum line commitment will have an option of continuing to pay for the minimum number of lines committed to in the contract until the end of the contract term or terminate the contract. If the Customer terminates the contract, the applicable termination liability charge will apply.

1. 12-Month Term

If the Customer cancels service prior to 12 months of service, they will be assessed a liability charge equal to 75 percent of the remaining revenues from the minimum number of lines for the 12-month term.

(Minimum Number of Lines) X (12 Month Line Rate) X (Months to reach 12) X 75%

2. Multi-Term (Canceled Prior to 12 Months)

If the Customer cancels service prior to 12 months they will be assessed the 12-Month Term liability charge. In addition, the Customer will also be charged the difference between the price they paid and the price they would have paid if on a 12-month term.

(Minimum Number of Lines) X (12 Month Line Rate) X (Months to reach 12) X 75%

(Number of Lines) X (Difference between billed rate and the 12-month line rate) X (Months in Service)

3. Multi-Term (After 12 Months)

If the Customer cancels service after 12 months, but prior to the expiration of the contract, the Customer will be retroactively billed as if the Customer had initially ordered the service at the most recently expired term offered for VTN service.

(Minimum Number of Lines) X (Difference between billed rate and most recently expired line rate) X (Months in Service)

MISCELLANEOUS SERVICE ARRANGEMENTS

S CUSTOMIZED 911 (C911)

(N)

1 General

Customized 911 (C911) is an optional service that allows a PBX customer to provide specific information for their PBX station telephone numbers or business lines in addition to the primary number information for 911 call records. The information is sent to the Company. The Company processes the information using the standard 911 process for each county.

2. Conditions

- a. The customer shall provide the Company with accurate, specific address and location information for each number enrolled in C911 in the required format that the Company uses in submitting information to the PSAP.
- b. The customer is responsible for ensuring their PBX system is able to recognize the 911 digits as a complete dialing code when the station user dials it.
- c. The customer is responsible for ensuring the ANI associated with the individual station line is passed.
- d. The customer is responsible for notifying the Company of any changes or additions made to the numbers within 48 hours of the changes being made. This includes adding new numbers. If the customer fails to provide any changes or additions to the Company within 48 hours of the change, and the Company receives a "No Record Found" report from the 911 database provider/administrator, a charge will be assessed, as listed in the Rates Section below, for the Company's time and expenses associated with correcting the information. If the Company receives 3 of these "No Record Found" reports within 1 year, the service will be terminated with the customer. At that time, the customer is responsible for providing 911 via the primary number.
- e. Except where caused by the willful misconduct or gross negligence of TDS Telecom, the customer agrees to release, indemnify, defend and save harmless the Company from claims, suits, actions, damages, costs, judgments and actions of any nature or from any person related to the C911 Service provided.
- f. The customer agrees to indemnify and hold harmless TDS Telecom for any infringement or invasion of the right to privacy of person or persons, caused or claimed to be caused by acts or omissions of the Customer and their operation or use of C911 Service.

PRIVATE LINE SERVICE

A. GENERAL

Private Line Service is telecommunications service between two, or more, terminals, none of which is connected to, or otherwise made available to, any local exchange switching facility. The service is provided only under special conditions where warranted by the circumstances and where facilities are available.

Private Line Services and Channels are provided:

- Between points within the Company's serving area or
- Between points within the Company's serving area and the serving area of other exchanges that are within the Florida intrastate intra-LATA jurisdiction.

Requests for intraLATA Interexchange Private Line Services will be provided under the Company's Interstate Special Access Tariff for terms and conditions.

(C)
(C)

B. CONDITIONS AND LIMITATIONS¹

(T)

Any applicant for Private Line Service extending beyond this Company's service area, who is located in this Company's area will normally contract for service with this Company and be treated as its subscriber, however, such procedure is not mandatory.

The Company undertakes to maintain and repair the facilities, which it furnishes. The Customer or authorized user may not rearrange, disconnect, remove or attempt to repair any equipment installed by the Company except upon the written consent of the Company.

The rates and charges specified in this Tariff contemplate that work will be performed during regular working hours and that work once begun will not be interrupted by the customer. If, at the request of the customer, work is performed outside of regular working hours, either to meet his convenience or because the time allowed is insufficient to permit completion during regular hours or if the customer interrupts work which has begun, the customer may be required to pay any additional costs incurred.

IntraLATA Private Line Service is the furnishing of the Company facilities for communication between specified locations 24 hours daily seven days per week. Facilities may be those of the Company only or those of the Company and connecting companies.

The Company does not undertake to transmit messages.

IntraLATA Private Line Service is available to end user customers only. BellSouth, Interexchange Carriers (IXC), Competitive Local Exchange Companies (CLEC), and other carriers must order Private Line Services under the Company's Special Access Tariff.

Provisions of Private Line Services referenced in this Section are subject to availability of Company facilities, equipment, and technical capabilities, and, as applicable any limitations and operating characteristics of equipment and technical capabilities.

¹ The above information is grandfathered to existing customer as of September 25, 2015

PRIVATE LINE SERVICE

B. CONDITIONS AND LIMITATIONS ¹ (continued)

(T)

Customers may order local channels which are designed to meet specific communications requirements. The customer is responsible for determining that his terminal equipment is compatible with the service provided by the Company.

Channel Services provided under the provisions of this Tariff are offered for IntraLATA Services only. Services consisting of Local Channels, Interoffice Channels, and Optional Features and Functions are classified by series. The various series are sub-divided into different types and are described in terms of circuit characteristics and use.

Where multi-point service is furnished, the local channels are bridged in the wire center.

This tariff is limited to the provision of Voice Grade, Digital Data, and High Capacity Private line Services that are at or below a speed of 44.736 Mbps. Any service requiring speeds above 44.736 Mbps will be provided on an Individual Case Basis (ICB).

(T)

C. DEFINITIONS ¹

(T)

Local Channels

Denotes the element of a private line service required for connecting customer premises to its serving wire center.

A local channel provides for a communications path between a designated customer premises and the service wire center of that premises. One local channel charge applies per channel termination.

When service is provided by non-wire center connected channels, a non-wire center connected channel charge applies in lieu of local channel charges.

Interoffice Channels

Denotes that element of a private line service which interconnects Local Channels which service customers located in different central office areas (wire center serving areas).

Non-Wire Center Connected Channels – Served direct channels are provided on a direct basis and are limited to one airline mile in length. These Channels will be provided only at the option of the Company.

Optional Features and Functions may be added to a service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of the performance characteristics which may be obtained as follows:

Hub Functions

A hub is a Company designated wire center where bridging or multiplexing functions are performed i.e., connecting three or more customer premises in a multipoint arrangement or channelizing analog or digital services requiring a lower capacity or bandwidth.

¹ The above information is grandfathered to existing customer as of September 25, 2015

PRIVATE LINE SERVICE

D. MILEAGE MEASUREMENTS¹

(T)

1. When station locations of a private line service are located in different wire center serving areas, interoffice channel charges apply. Charges are based on the direct airline distance measured between the serving wire centers. Mileage is determined in accordance with the following:
 - a. Obtain the "V" and "H" coordinates for each wire center, as listed in the National Exchange Carrier Association Tariff FCC No. 4.
 - b. Obtain the difference between the "V" coordinates of the two wire centers. Obtain the difference between the "H" coordinates.
 - c. (The difference is always obtained by subtracting the smaller coordinate from the larger coordinate.)
 - d. Square each difference obtained in b. preceding.
 - e. Add the squares of the "V" difference and the "H" difference obtained in c. preceding.
 - f. Divide the sum of the squares obtained in d. preceding by 10.
 - g. Obtain the square root of the result obtained in e. preceding. This is the rate distance in miles. (Fractional miles being considered as full miles.)

EXAMPLE: The rate distance is required between City One and City Two.

	V	H
City One	7260	2083
City Two	7364	1865
Difference	104	218
Squared	10,816	47,524
58,340 divided by 10 = 5834		
Square root of 5834 = 76.38 = 77 Airline Miles		

2. When a private line is furnished over facilities which the Company elects to provide on a direct basis and is not routed through a central office, one two-point channel charge will apply. The arrangement is limited to channels not more than one airline mile in length.
3. On a multipoint circuit, each channel connecting a hubbing wire center with a serving wire center or a hubbing wire center with another hubbing wire center or a serving wire center with another serving wire center is considered a separate channel for which a mileage charge is independently computed. The total charge for a multipoint channel is the combination of individual legs that connect all points and results in the lowest charge. Bridging charges apply when three or more channels connect at the same location.
4. For Series 2000 channels the customer may specify the sequence in which the service points are to be connected in which case the rate mileage is the shortest airline mileage determined in accordance with paragraph 3. preceding which will connect the wire centers of the service points in the specified sequence.

¹ The above information is grandfathered to existing customer as of September 25, 2015

PRIVATE LINE SERVICE

E. VOICE GRADE SERVICE¹

Series 2000 Voice Grade Service provides for voice and/or data communications on a two point or multipoint basis for service 7 days per week, 24 hours per day, for a minimum period of one month. Channels which provide Tie Line Service will not be furnished to connect a flat rate system with a message rate system. Voice Grade services and channels include channels with an approximate bandwidth of 300-3000 Hz for voice and data transmission. Channels are furnished with transmission characteristics and for applications as set forth below.

1. Types and Descriptions

Type 2464

A two wire interface with four wire facilities engineered for a 1004 Hz net loss of 16dB. Generally used in the provision of analog data services.

Type 2101

Furnished for voice transmission, for half duplex (or for duplex on a 2-point basis) and engineered for an approximate bandwidth of 300-3000 Hertz. Channels may be used to connect customer-provided terminal equipment or communications systems to other customer provided terminal equipment or communications systems to connect such equipment or systems to a PBX system, Centrex system, other switching equipment, or station equipment furnished to the customer by the Company. Intra-exchange service is furnished between locations within one exchange area.

Type 2102

Furnished for voice transmission or combined voice transmission and control purposes for half-duplex (or duplex on a 2-point basis) in connection with remote operation of mobile radiotelephone systems and engineered for an approximate bandwidth of 300-3000 Hertz. These channels are furnished between specified locations for remote operations of land radiotelephone stations established for communications with mobile units.

Channels furnished for combined voice transmission and control purposes may be used by the customer in accordance with the normal transmission characteristics of such channels for voice transmission purposes and to transmit more than one tone or signal alternately or simultaneously or create additional channels for remote control and indication purposes

¹ This service is grandfathered to existing customers effective October 16, 2012. This service will not be available to new customers as of this date.

F. DIGITAL DATA SERVICE

(T)

Digital Data Service provides the customers with simultaneous two-way transmission of digital signals at synchronous speed of 2.4 kbps, 4.8 kbps, 9.6 kbps, 19.2 kbps, 56 kbps, and 64 kbps.

(D)(N)

1. Basic Description (56 Kbps only)¹

A Digital Data channel is a channel for four-wire transmission of synchronous serial data at the rate of 56 Kbps. The channel provides a synchronous service with timing provided by the Company through the Company's facilities to the customer in the received bit stream. Digital Data channels are only available via Company designated Digital Data Hubs and are provided between a customer's designated premises or between a customer's designated premises and a Company Digital Data Hub.

A Hub Termination Charge applies per Digital Data Local Channel. This rate element covers the Hub functions (e.g. Timing, Testing) for the service.

2. Rates and Charges¹

Original Sheet 1

OBSOLETE SERVICE OFFERINGS **MISCELLANEOUS SERVICE ARRANGEMENTS**

A. EXTENSION LINE MILEAGE

(M)

1. General

- a. The basic rates for extension stations and PBX stations as specified elsewhere in this tariff are for such stations which are located within the same building as the main station or PBX switchboard. Where extension stations or PBX stations are provided at other locations, and for other circuit extensions of similar character, such as bells, or gongs, extension line mileage charges are applicable as set forth below, in addition to the basic rates applicable to the particular service against which mileage charges are assessed.
- b. Mileage charges are computed separately for each extension line on direct airline measurements as follows:
 - (1) When isolated wire or cable is placed, the direct airline mileage is measured point-to-point, i.e., from the location of the extension station, PBX station, or other service.
 - (2) When the extension line is bridged to the main line in the central office, the direct airline mileage is measured from the location of the serving central office (i.e., the central office serving the main station of PBX where the extension line is bridged) via any intermediate central office if necessary, to the location of the extension station, PBX station, or other service.
- a. Where, for the purpose of furnishing extension lines, it is necessary to lay underground conduit or to set poles on the subscriber's premises, the subscriber may be required to provide and install such underground conduit and to provide and erect such poles, or the Company will do the work at the subscriber's expense. Where the work is performed by the subscriber, it must be in accordance with the standard specifications of the Company.

(M)

Section A116
Original Sheet 2

OBSOLETE SERVICE OFFERINGS MISCELLANEOUS SERVICE ARRANGEMENTS

A. EXTENSION LINE MILEAGE (Continued)

(M)

1. General (Continued)

- d. When it is known or realized that the life of all or part of the outside circuit extensions will be shorter than the normal life of the plant, or the cost of providing the plant is such as to render inadequate the mileage charges quoted herein, the plant required to furnish such service will be provided on the following basis:

The subscriber may be required to pay construction and installation charges based upon the costs incurred in addition to mileage charges.

- e. In connection with party line service, extension stations must be located on the same premises as the main station.
- f. When the provision of service to an extension station or PBX station of this character requires the use of four-wire (two-pair) circuit, the extension line mileage charge shall be doubled. When provision of service to an extension station or PBX station requires the use of load coils, amplifiers, repeaters, or other equipment, they will be furnished at the rates as specified elsewhere in this tariff.
- g. Nonrecurring charges for establishing extension stations are applicable as stated in the "service Charges" section of this tariff, with the exception that certain extension service connection charges can consist of more than one access line charge, (such as for off-central office). Access line charges will be applicable on a "per central office involved" basis, and other nonrecurring charges will be on a "per work function required" basis as applicable for establishing extension service.
- h. Mileage charges and mileage measurements also apply to customer-provided terminal equipment and communications systems subject to the provisions as stated in other sections of this tariff.

OBSOLETE SERVICE OFFERINGS MISCELLANEOUS SERVICE ARRANGEMENTS

A. EXTENSION LINE MILEAGE (Continued)

2. Rates

- a. Between different buildings on the same premises (where the extension station or PBX station is located on the same premises as the main station or PBX switchboard)

	Monthly Rate
Per 100 feet, or fraction thereof	\$1.30*

- b. Between buildings on different premises (where the extension station or PBX station is located on other than the same premises as the main station or PBX switchboard)

	Monthly Rate
Per 100 feet, or fraction thereof	\$1.30*

* Mileage charge is not applicable to extensions on PBX, PABX, or intercommunication systems (where trunk charges apply) that are installed in different buildings on the same premises, or continuous property.

** In connection with PBX systems, where the necessary signaling device and means of connecting the distant extension to the main system are provided, and where the separate buildings are on a noncontiguous property and/or in the judgment of the Company a more feasible method of connecting the 2 stations would be the use of existing cable plant, the rate shall be, in addition to the regular extension rate, \$2.15 per ¼ mile airline measurement or fraction thereof, the distance being measured between the main station and the extension.
